What is a Photograph? Carol Squiers, Geoffrey Batchen, George Baker, George Thomas Baker, Hito Steyerl, 2013 Organized by ICP Curator Carol Squiers, *What Is a Photograph* will explore the intense creative experimentation in photography that has occurred since the 1970s. Conceptual art introduced photography into contemporary art making, using the medium in ways that challenged it artistically, intellectually, and technically, and broadened the notion of what a photograph could be in art. A new generation of artists began an equally rigorous but more aesthetically adventurous analysis which probed photography itself from the role of light, color, composition, to materiality and the subject. *What Is a Photograph* brings together these artists who reinvented photography.

The Focal Encyclopedia of Photography Michael R. Peres, 2013-05-29 This volume is a complete revision of the 1996 third edition, sharing the ever-changing breadth of photographic topics with a special emphasis on digital imaging and contemporary issues. Produced by an international team of photographic and imaging experts with collaboration from the George Eastman House, the world's oldest photography museum, this fourth edition contains essays and photographic reproductions sharing information where photography and imaging serve a primary role, ranging from the atomic to the cosmic.

Photography and Political Aesthetics Jane Tormey, 2023-11-30 This accessible book explores the creative uses of photography with political purpose, both in terms of subject matter and of the political perspectives that have driven attitudes to viewing photographs. The shorter Part I reviews twentieth-century thinking that has influenced attitudes to photography and the political. Part II identifies the political ideas that drive practical strategies in the twenty-first century. It considers the politics of photography by looking at what affects people's lives and agency, attitudes to difference and identity, power relations between institutions, individuals, and communities, the impact of trauma and global change. With a focus on the exchange of ideas between visual practice and theories, a selection of projects are examined from a range of perspectives, such as postcolonial and feminist thinking, posthumanism, and cultural and social theory, with references ranging from Michel Foucault and Judith Butler to Achille Mbembe, Bruno Latour, and Chantal Mouffe. The pursuit of political aesthetics borrows from Jacques Rancière's ideas about cultural production. *Photography and Political Aesthetics* identifies photography as politically productive when positioned within political movements and champions practices that perform, investigate, or give attention to presentation and
