The Education of the Child and Early Lectures on Education Rudolf Steiner, 1996 It is necessary for human beings to remember not only what they already understand but to come to understand what they already know that is what they have acquired by memory in the way the child acquires language In a certain sense understanding things through concepts should proceed from the stored up treasures of the memory The more children know in memory before they begin to understand through intellectual concepts the better p 31 As early as 1884 while tutoring a boy with special needs Steiner began a lifelong interest in applying spiritual knowledge to the practical aspects of life Steiner originally published the essay at the core of this book in 1907 It represents his earliest ideas on education in which he lays out the soul spiritual processes of human development describing the need to understand how the being of a child develops through successive births beginning with the physical body's entry into earthly life and culminating in the emergence of the I being with adulthood Also included are several early lectures on education ranging from 1906 to 1911 well before the birth of the Waldorf movement in 1919

The Foundations of Human Experience Rudolf Steiner, 1996 Opening address Stuttgart August 20 1919 14 lectures Stuttgart August 21 September 5 1919 CW 293 2 lectures Berlin March 15 and 17 1917 CW 66 Although we can physically see children only after their birth we need to be aware that birth is also a continuation We do not want to look only at what the human being experiences after death that is at the spiritual continuation of the physical We want to be aware that physical existence is a continuation of what higher beings have done without our assistance Our form of educating can have the correct attitude only when we are aware that our work with young people is a continuation of what higher beings have done before birth Rudolf Steiner This course on education contains some of the most remarkable and significant lectures ever given by Rudolf Steiner Because these lectures were given to teachers however they have suffered the misconception that they are useful only to teachers Any teacher who wants to teach in a way that encompasses the whole child certainly needs a functional understanding of what Steiner presents here but these lectures will also greatly benefit parents psychologists counselors or anyone else involved with child development Steiner gives his most concise and detailed account of human nature in these lectures which are absolutely essential for anyone who wants a deeper understanding of Steiner's spiritual science Those who are willing to work through this work will

discover here a new powerful convincing and profoundly phenomenological anthropology of human spiritual psychology In these lectures Steiner laid out for the first time the principles that form the basis for renewing the art of teaching The Foundations of Human Experience is the most important text for studying and understanding the human developmental and psychological basis for Waldorf education READ BOBBY MATHERNE S REVIEW OF THIS BOOK Translated from the German editions Allgemeine Menschenkunde als Grundlage der P dagogik GA 239 appendix from Geist und Stoff Leben und Tod GA 66 An older translation of CW 239 was titled Study of Man The Roots of Education Rudolf Steiner,1997 These five lectures on Waldorf education were given as a course during Easter week in Bern in 1924 Although they were delivered more than seventy years ago they are remarkably contemporary Every word still resonates with passion and dedication to the human adventure When he gave these lectures Rudolf Steiner had only eleven months left to live The first Waldorf School had been founded five years before and the intervening period had seen Steiner active in every aspect of school life Now in a sense it was time to bring the ripe fruit of this work before the public Together with its companion course The Essentials of Education given three days before The Roots of Education provides a stimulating synthesis of the Waldorf approach Teachers parents and anyone interested in education will find here the fundamental characteristics of the process of a new art of education back cover *The Child's Changing Consciousness and Waldorf Education* Rudolf Steiner,1988-01-01

Rhythms of Learning Rudolf Steiner,1998 Key lectures on children and education have been thoughtfully chosen from the vast amount of material by Steiner and presented in a context that makes them approachable and accessible In his many discussions and lectures Steiner shared his vision of an education that considers the spirit soul and physiology in children as they grow *The Kingdom of Childhood* Rudolf Steiner,1995 These seven intimate aphoristic talks were presented to a small group on Steiner s final visit to England Because they were given to pioneers dedicated to opening a new Waldorf school these talks are often considered one of the best introductions to Waldorf education Steiner shows the necessity for teachers to work on themselves first in order to transform their own inherent gifts He explains the need to use humor to keep their teaching lively and imaginative Above all he stresses the tremendous importance of doing everything in the knowledge that children are citizens of both the spiritual and the earthly worlds And throughout these lectures he continually returns to the practical value of Waldorf education These talks are filled with practical illustrations and revolve around certain themes the need for observation in teachers the dangers of stressing the intellect too early children s need for teaching that is concrete and pictorial the education of children s souls through wonder and reverence the importance of first presenting the whole then the parts to the children s imagination Here is one of the best introductions to Waldorf education straight from the man who started it all German source Die Kunst des Erziehens aus dem Erfassen der Menschenwesenheit GA 311 SYNOPSIS OF THE LECTURES LECTURE 1 The need for a new art of education The whole of life must be considered Process of incarnation as a stupendous task of the spirit Fundamental changes at seven and fourteen At seven the forming of

about teachers who freely and unitedly unrestricted by external prescription develop their educational methods exclusively out of a thorough knowledge of human nature He spoke to us about a kind of knowledge needed by the teacher a knowledge of the being of man and the world which is at the same time scientific and also penetrates into the most intimate inner life which is intuitive and artistic These lectures form one of the best introductions to Waldorf education Contents Introduction by Christopher Bamford The Spiritual Ground of Education The Perception of Soul and Spirit The Spiritual Ground of Physical Education The Art of Educating Young Children The Art of Educating Older Boys and Girls Teachers As Artists in Education The Organization of the Waldorf School Moral Teaching Eurythmy in the Waldorf School Teachers in the Waldorf School German source Die geistig seelischen Grundkr fte der Erziehungskunst Spirituelle Werte in Erziehung und sozialem Leben GA 305 *The Foundations of Human Experience* Rudolf Steiner,1996-08-15 This lecture is part of the collection The Foundations of Human Experience by Rudolf Steiner Steiner 1861 1925 was an Austrian philosopher social reformer architect and esotericist He gained initial recognition as a literary critic and cultural philosopher At the beginning of the 20th century he founded a spiritual movement Anthroposophy He is considered the father of Waldorf education biodynamic agriculture anthroposophical medicine and spiritual science A comprehensive view of cosmic laws as a basis for being a teacher The duality of the human being as the greatest error of modern psychology The misleading law of The Conservation of Energy the formation of new energy and matter in the human being Understanding what is dying in nature through the intellect and what is becoming through the will How perceiving the I is based in the physical body Freedom and sense free thinking Nature without the human being the danger of extinction The function of the human corpse for the development of the Earth The prevalence of death bringing forces in the dead bones and dying nerves and life giving forces in the blood and muscles Rickets The relationship of geometry to the skeleton Geometry as a reflection of cosmic movements The human being is not an observer of the world but its stage The creation of new matter and forces through the touching of blood and nerves Concerning the scientific method postulates instead of universal definitions The entire Collected Works of Rudolf Steiner are available from SteinerBooks **The Essentials of Education** Rudolf Steiner,1926
