What Is Life What Is Life:

Think Different for Living Happy Life A. V. Chaudhari, 2020-01-31 Think Different For Living Happy Life title given to this book is appropriate as it covers many aspects of life and discusses many topics that are of greater importance in our life. By reading this book one can get proper ideas of leading better life because everyone sets higher goals and wants to achieve them but very few are successful to do it. We all have burning desires to fulfill and many wishes to complete and have possibility and potential both doing so but very few of us become successful in it. We have a long list of wishes and expectations and we want make them Happen but most of us live monotonous life so are not in a position to reach the level we want. Most of people are traditional thinkers and are feared of thinking out of the box. This book helps to think such a way that we can be able to understand the various aspects of our life. One interesting thing about why the author wanted to pen this book is that the author writes WhatsApp status every day morning for last few months. Some of friends as well as relatives read that status updates everyday and get inspired and be motivated. Due to getting good response from readers the author thought a good idea of preparing a book so people around the world can read it to give noble cause to their life. This book flashes light on virtues that help us lot for living enlightened happy and peaceful life. The virtues like discipline, dedication, pity, persistency, nobility, kindness, humanity, humility, generosity, positivity and many more we have to put into practice to live as a true human being. This book is penned with a view and proper notion that we live better life thinking in a proper way being rational, sensible, responsible, intelligent, emotional, concerned and be human being in a true spirit. At last I would very humbly urge to think for wellbeing of every fellow human being.

Sociological Life Course Research

Matthias Wingens, 2022-08-04 This introductory book provides an insight into sociological life course research and informs about its theoretical assumptions, analytical concepts and main results. Sociological life course research like biographical research has developed into an independent and fruitful field of research since the end of the 1960s. It is true that half a century earlier in their famous study of The Polish Peasant in Europe and America 1918-20, Thomas and Znaniecki had already used life records to examine the connection between social change, social structures and the life histories of individuals. However, such a research perspective was supplanted by other methodological, conceptual approaches to empirical social research for over fifty years. It was not until the 1960s that sociological interest in life course and biographical theoretical issues reawakened. Today life course research is considered one of the most important conceptual innovations in sociology in recent decades. The content: The life course as a social construction. What is life course research? The life course as an institution. Collective life courses, generations, cohorts and social change. Structures of the life course. Life course research: a conceptual perspective. Life course research: quo vadis? The author Prof Dr Matthias Wingens teaches sociology at the University of Bremen, Bremen International Graduate School of Social Sciences (BIGSSS).

What is Life? Josef Seifert, 2021-11-15 This book makes four bold claims: 1. life is an ultimate datum open to philosophical analysis and

irreducible to physical reality hence all materialist reductionist explanations most current theories of life are false 2 All life presupposes soul entelechy without which a being would at best fake life 3 The concept of life is analogous and the most direct access to life in its irreducibility is gained through consciousness 4 All life possesses an objective and intrinsic value that needs to be respected human life possesses beyond this an inviolable dignity Life and personal life are pure perfections it being absolutely better to possess personal life than not to possess it Chapter 1 the metaphysical essence and the many meanings of life as well as its transcendental character Chapter 2 the irreducibility of biological life its amazing empirical and philosophically intelligible essential features and the ways of knowing them Chapter 3 the immediate evidence and indubitable givenness of mental conscious life as well as questions of brain death and immortality Chapter 4 the inviolable objective dignity of personal life and its self transcendence a new theory of the fourfold source of human dignity and rights Chapter 5 in dialogue form methods and results of philosophy versus those of empirical life sciences **Feminist**
