Everglades restoration This study employed camera trapping to determine effects of changing marsh water levels tree island size temperature and rainfall on small and medium sized mammals in the Everglades Camera height was also tested for its effect on detection of each species Camera traps were deployed on 68 tree islands over the course of almost 11 months Tree island use by *Odocoileus virginianus* White tailed Deer was positively affected by higher water levels but detection was not affected by camera height Use by *Sylvilagus palustris* Marsh Rabbit was also positively affected by water levels and they were detected more often when camera height was lower *Lynx rufus* Florida Bobcat use of tree islands may be correlated with lower average daily temperatures but total rainfall and camera height do not seem to have an effect Use of tree islands by *Procyon lotor* Northern Raccoon and *Oryzomys palustris* Marsh Rice Rat was not related to any of the variables tested When all species were combined higher water levels and lower camera height resulted in more use and detection of wildlife on tree islands respectively This information can be used to inform biologists on managing wildlife populations that will be affected by Everglades restoration **Tree Islands of the Florida Everglades** Debra Ann Willard,2004 **Florida**

Digging Miami Robert S Carr, 2012-09-30 Unearthing the rich 11 000 year human heritage of the Miami area The pace of change of Miami since its incorporation in 1896 is staggering The seaside land that once was home to several thousand Tequesta is now congested with roads and millions of people while skyscrapers and artificial lights dominate the landscape Ironically Miami s development both continually erases monuments and traces of Indigenous people and historic pioneers yet also leads to the discovery of archaeological treasures that have lain undiscovered for centuries In *Digging Miami* Robert Carr traces the rich 11 000 year human heritage of the Miami area from the time of its first inhabitants through the arrival of European settlers and up to the early twentieth century Carr was Dade County s first archaeologist later historic preservation director and held the position at a time when redevelopment efforts unearthed dozens of impressive archaeological sites including the Cutler Site discovered in 1985 and the Miami Circle found in 1998 *Digging Miami* presents a unique anatomy of this fascinating city dispelling the myth that its history is merely a century old This comprehensive synthesis of South Florida s archaeological record will astonish readers with the depth of information available throughout an area barely above sea level Likewise many will be surprised to learn that modern
