

Care and Cleaning

Clean lint screen after every load.

Do not store or place laundry products on top of dryer at any time. They can damage the finish or controls.

⚠ WARNING To reduce risk of fire or serious injury to persons or property, comply with the basic warnings listed in *Important Safety Instructions*, pages 2-3, and those listed below.

- Before cleaning the dryer interior, **unplug the electrical power cord** to avoid electrical shock hazards.
- Do not use any type spray cleanser when cleaning dryer interior. Hazardous fumes or electrical shock could occur.

Inside

- Clean the lint screen after every load. Lint build-up in the screen restricts air flow, which causes longer drying times. The screen is located at the bottom of the door opening. Remove by pulling straight up. Remove the lint and replace the screen.
- Occasionally a waxy build-up may form on the lint screen from using dryer-added fabric softener sheets. To remove this build-up, wash the lint screen in warm, soapy water. Dry thoroughly and replace. Do not operate the dryer without the lint screen in place.
- If the dryer drum becomes stained from noncolorfast fabrics, clean the drum with a damp cloth and a mild liquid household cleanser. Remove cleanser residue before drying the next load.
- Every 18 months an authorized servicer should clean the dryer cabinet interior and exhaust duct. These areas can collect lint and dust over time. An excessive amount of lint build-up could result in inefficient drying and possible fire hazard.

Outside

- Clean the cabinet with mild soap and water. **Never use harsh, gritty or abrasive cleansers.**
- If the cabinet becomes stained, clean with diluted chlorine bleach [1/2 cup (120 ml) in 1 quart (.95 liter) water]. Rinse several times with clear water.
- Remove glue residue from tape or labels with a mixture of warm water and mild detergent. Or, touch residue with the sticky side of the tape or label.
- **Before moving the dryer**, place a strip of cardboard or thin fiberboard under the front leveling legs to prevent damage to floor.

the authors the world and especially the United States have received three significant wake up calls on energy production
and consumption The first of these occurred on October 15 1973 when the Yom Kippur War began with an attack by Syria
and Egypt on Israel The United States and many western countries supported Israel Because of the western support of Israel
several Arab oil exporting nations imposed an oil embargo on the west These nations withheld five million barrels of oil per
day Other countries made up about one million barrels of oil per day but the net loss of four million barrels of oil production
per day extended through March of 1974 This represented 7% of the free world s i e excluding the USSR oil production In
1972 the price of crude oil was about 3 00 per barrel and by the end of 1974 the price of oil had risen by a factor of 4 to over
12 00 This resulted in one of the worst recessions in the post World War II era As a result there was a movement in the
United States to become energy independent At that time the United States imported about one third of its oil about five
million barrels per day After the embargo was lifted the world chose to ignore the wake up call and went on with business as
