The Latham Letter , 2005      **To Touch the Whale** Lynne Mitchell, 2008-12-30 Life along the bay is slow and hot and full of deep rooted memories For all those that live along this sandy shore they have to be weather tough and strong as the salt encrusted shells to survive the hard tide pull of their lives Katherine an unfulfilled artist goes to a cabin by the bay to rediscover her art and her life before it is too late For some the dark reflective waters can reveal too much but Katherine is determined to dive in and confront the faces of her past and cut loose the anchors that have left her feeling stranded in place Along the way she is helped by Annie and Amos two old survivors with stories of their own Together they will peer into the slow hot tides of this Southern coast and see things which for some can take nearly a lifetime to see at all      **Encyclopedia of Marine Mammals** Bernd Würsig, J.G.M. Clayton, 1998 On Friday October 7 1988 Roy Ahmaogak of Barrow Alaska discovered three young gray whales trapped in ice off the Arctic coast The three week rescue operation that followed cost more than a million dollars and grew to include the White House the Soviet Union the environmental community Eskimo whalers Alaskan oil companies school children and journalists from around the world the Alaska National Guard and a host of other corporate governmental scientific and individual participants Some called it a non event a fiasco an absurd waste of money while others considered it the most extraordinary animal rescue effort ever undertaken In any case it is a story not likely to be forgotten Both complex and moving this story grounds Patti Clayton s overview of environmental ethics theory Using the story as a touchstone for critical comparison Clayton explores three major traditions of environmental philosophy extensionism ecofeminism s care ethic and Heideggerian Phenomenology In doing so she guides readers through the evolution and central concepts of each tradition moving intriguingly between theory and the well known rescue story as an apt illustration of the complexities of ethical deliberation Clayton s critical thinking leads to a deeper appreciation of the ways in which different sets of assumptions yield unique

interpretations of such issues Readers have the opportunity to consider the implications of this environmental ethics issue as a microcosm of human nonhuman interaction The unifying narrative of the whale story which is based on the commentary of participants and observers provides both an engaging vehicle for the study of environmental ethics and a real world testament to the multifaceted nature of human nonhuman relationships encouraging readers to reflect on the connection of such incidents in their own lives Author note Patti H Clayton is Visiting Lecturer in the Division of Multidisciplinary Studies at North Carolina State University
