What I Learned About Cuba By Going To Cuba:

What I Learned about Cuba by Going to Cuba Antonio R. Zamora, 2013 This book is about one man's trips to Cuba and about the relationship between the United States and the island nation Since his first trip back to the homeland in 1995 he has been back to Cuba more than forty times travelling not only under specific licenses to attend meetings and conferences but also under a general license to conduct professional research as well as family visits It is unusual for a Cuban American to travel to Cuba so often more so because of Antonio Zamora's age and political background As a result of his trips he has accumulated a wealth of knowledge well worth sharing In the months and years ahead the discussion in the United States on what to do about Cuba is certain to increase significantly This book provides important answers to the reality of Cuba and U S policy *The Square Deal*, 1913 **Bargaining and Learning in Recurring Crises** Russell J.

Leng, 2000 Study of the most prominent interstate rivalries in the second half of the century and of the lessons that the leaders of the rival states drew from their recurring crises **Learning to Die in Miami** Carlos Eire, 2010-11-02

Continuing the personal saga begun in the National Book Award winning *Waiting for Snow in Havana* the inspiring sad funny bafflingly beautiful story of a boy uprooted by the Cuban Revolution and transplanted to Miami during the years of the Kennedy administration In his 2003 National Book Award winning memoir *Waiting for Snow in Havana* Carlos Eire narrated his coming of age in Cuba just before and during the Castro revolution That book literally ends in midair as eleven year old Carlos and his older brother leave Havana on an airplane along with thousands of other children to begin their new life in Miami in 1962 It would be years before he would see his mother again He would never again see his beloved father *Learning to Die in Miami* opens as the plane lands and Carlos faces with trepidation and excitement his new life He quickly realizes that in order for his new American self to emerge his Cuban self must die And so with great enterprise and purpose he begins his journey We follow Carlos as he adjusts to life in his new home Faced with learning English attending American schools and an uncertain future young Carlos confronts the age old immigrant's plight being surrounded by American bounty but not able to partake right away The abundance America has to offer excites him and regardless of how grim his living situation becomes he eagerly forges ahead with his own personal assimilation program shedding the vestiges of his old life almost immediately even changing his name to Charles Cuba becomes a remote and vague idea in the back of his mind something he used to know well but now it had ceased to be part of the world But as Carlos comes to grips with his strange surroundings he must also struggle with everyday issues of growing up His constant movement between foster homes and the eventual realization that his parents are far away in Cuba bring on an acute awareness that his life has irrevocably changed Flashing back and forth between past and future we watch as Carlos balances the divide between his past and present homes and finds his way in this strange new world one that seems to hold the exhilarating promise of infinite possibilities and one that he will eventually claim as his own An exorcism and an ode *Learning to Die in Miami* is a celebration of renewal of those

times when we are certain we have died and then are somehow miraculously reborn

Organizational Learning in the Global Context Michael Kenney, 2017-03-02 Organizational learning is an area of study that focuses on models and theories about the way an organization learns and adapts. This volume investigates how various global and regional intergovernmental organizations, states and national bureaucracies as well as nongovernmental organizations exploit experience and knowledge to change their understanding of the world, their policies and their behaviours. Drawing upon and synthesizing organizational, social and individual level learning theories, the cases explicate various learning processes, learning by illicit actors and deterrents to organizational learning. The twelve case studies of this volume consider organizational learning associated with multiple issue areas including the United States embargo against Cuba, food security in the European Union, the Russian energy sector, Colombian drug trafficking, terrorist groups, the Catholic Church and foreign aid agencies. Based entirely on original research, the volume is relevant to international relations, comparative politics, organizational sociology and policy studies.

The Warren Commission Report U.S. Government, President's Commission on the Assassination of President Kennedy, 2023-11-13 The Warren Commission Report is the result of the investigation regarding the assassination of United States President John F. Kennedy. The U.S. Congress passed Senate Joint Resolution 137 authorizing the Presidential appointed Commission to report on the assassination of President John F. Kennedy, mandating the attendance and testimony of witnesses and the production of evidence. After eleven months of the investigation, the Commission presented its findings in an 888-page final report. The key findings presented in this report were that President Kennedy was assassinated by Lee Harvey Oswald, that Oswald acted entirely alone, and that Jack Ruby also acted alone when he killed Oswald two days later. The Commission's findings have proven controversial and have been both challenged and supported by later studies.

The SAGE Handbook of Learning and Work Margaret Malloch, Len Cairns, Karen Evans, Bridget N. O'Connor, 2021-10-13 The first two decades of the 21st century have contributed a growing body of research, theorisation and empirical studies on learning and work. This Handbook takes the consideration of this topic into a new realm, moving beyond the singular linking of identity, learning and work to embrace a more holistic appreciation of learners and their life-long learning. Across 40 chapters, learners, learning and work are situated within educational, organisational, social, economic and political contexts. Taken together, these contributions paint a picture of evolving perspectives of how scholars from around the world view developments in both theory and practice and map the shifts in learning and work over the past two decades.

Part 1 Theoretical perspectives of learning and work
Part 2 Intersections of learning and work in organisations and beyond
Part 3 Learning throughout working lives and beyond

Disruptive Learning Narrative Framework Manu Sharma, Andrew Allen, Awad Ibrahim, 2021-11-04 Written by scholars and educators based in Canada and the USA, this book articulates and implements a new cutting-edge theoretical framework entitled the disruptive learning narrative (DLN). The contributing authors analyze their experiences with international service learning students using

DLN to uncover important lessons about race relations power and privilege They offer fresh insight on how DLN is useful in understanding and unpacking controversial teaching moments abroad and provide further reflections on how others can adapt the DLN framework to meet the contextual needs of their international educational experience The chapters offer case studies and learning from international service learning and study abroad programs in Canada China Columbia Cuba Kenya Tanzania and the USA The book provides essential knowledge and insights for educators who wish to address the inherent messiness and complexity of international experiences It will help educators and researchers to better understand the controversial and sensitive issues of race relations power and privilege dynamics Learning Through Collective Memory Work

Congressional Record United States. Congress, 1979 **Global Learning and International Development in the Age of Neoliberalism** Stephen McCloskey, 2021-10-13 This book argues that the international development sector is in crisis which can be mostly sourced to its side stepping the dominant development question of our age the neoliberal growth paradigm It argues that this crisis can be addressed at least in part by the sector's re engagement with the radical

development education process that it helped to foster and sustain for over two decades The recent safeguarding scandal is symptomatic of a sector that is becoming overly hierarchical brand conscious and disconnected from its base This book argues that many of the problems the sector is facing can be sourced to its failings in grappling with the question of neoliberalism and formulating a coherent critique of how market orthodoxy has accelerated poverty in the global North and South This book recommends re embracing the radical origins of global learning situated in the participative methodology and praxis reflection and action of Paulo Freire both as internal capacity building and external public engagement The book proposes a new development paradigm focusing on bottomup participative approaches to policy making based on the needs of those NGOs claim to represent the poor marginalised and voiceless rather than constantly following the agenda of donors and governments The recommendations made by this book will serve as an important resource for researchers and students of international development and global learning as well as to NGOs civil society activists and education practitioners looking for solutions to the problems within the sector

Operation Pedro Pan and the Exodus of Cuba's Children Deborah Shnookal, 2022-06-28 This in depth examination of one of the most controversial episodes in U S Cuba relations sheds new light on the program that airlifted 14 000 unaccompanied children to the United States in the wake of the Cuban Revolution Operation Pedro Pan is often remembered within the U S as an urgent rescue mission but Deborah Shnookal points out that a multitude of complex factors drove the exodus including Cold War propaganda and the Catholic Church s opposition to the island s new government Shnookal illustrates how and why Cold War scare tactics were so effective in setting the airlift in motion focusing on their context the rapid and profound social changes unleashed by the 1959 Revolution including the mobilization of 100 000 Cuban teenagers in the 1961 national literacy campaign Other reforms made by the revolutionary government affected women education religious schools and relations within the family and between the races Shnookal exposes how in its effort to undermine support for the revolution the U S government manipulated the aspirations and insecurities of more affluent Cubans She traces the parallel stories of the young Pedro Pans separated from their families in some cases indefinitely in what is often regarded in Cuba as a mass kidnapping and the children who stayed and joined the literacy brigades These divergent journeys reveal many underlying issues in the historically fraught relationship between the U S and Cuba and much about the profound social revolution that took place on the island after 1959 Publication of the paperback edition made possible by a Sustaining the Humanities through the American Rescue Plan grant from the National Endowment for the Humanities
