really tell the difference between a Stradivari and a modern violin This thought provoking book also examines violin acoustics and how acoustic science can be married to the art of violin making while merging time honoured techniques with new materials and design II In the Cards A Conversation with Fred Gitelman world champion bridge player and co founder of Bridge Base Online This comprehensive conversation provides behind the scenes insights into the world of professional bridge the psychological stress of top flight competition how the human mind can compute amazing feats of memory bridge in schools coaching Bill Gates and Warren Buffett and more III Embracing the Anthropocene Managing Human Impact A Conversation with Mark Maslin Professor of Geography at University College London This in depth conversation explores Mark Maslin s research on the Anthropocene which according to his definition began when human impacts on the planet irrevocably started to change the course of the Earth s biological and geographical trajectory leading to climate change loss of biodiversity deforestation and more IV The Joy of Mathematics A Conversation with Ian Stewart Emeritus Professor of Mathematics at the University of Warwick and bestselling science and science fiction writer For Ian Stewart mathematics is far more than dreary arithmetic while mathematical thinking is one of the most important and overlooked aspects of contemporary society This conversation explores what mathematics is and why it s worth doing symmetry networks and patterns the relationship between logic and proof the role of beauty in mathematical thinking the future of mathematics linking mathematical oscillations to animal gaits how to deal with the peculiarities of the mathematical community and much more V On Atheists and Bonobos A Conversation with primatologist Frans de Waal the Charles Howard Candler Professor of Primate Behavior in the Department of Psychology at Emory University and director of the Living Links Center at the Yerkes National Primate Research Center at Emory Frans de Waal is renowned for his work on the behaviour and social intelligence of primates This thought provoking conversation examines fascinating questions such as Are we born with an innate sense of the good Do we learn from others what is wrong Does religion determine or is it a result of morality and more Howard Burton is the founder and host of all Ideas Roadshow Conversations and was the Founding Executive Director of Perimeter Institute for Theoretical Physics He holds a PhD in theoretical physics and an MA in philosophy Ideas Roadshow offers an expanding series of Ideas Roadshow Collections visit our website <https://ideasonfilm.com/ideasroadshow> for further details 18

Unconventional Essays on the Nature of Mathematics Reuben Hersh, 2006-01-16 This book comes from the Internet Browsing the Web I stumbled on philosophers cognitive scientists sociologists computer scientists even mathematicians saying original provocative things about mathematics And many of these people had probably never heard of each other So I have collected them here This way they can read each other s work I also bring back a few provocative oldies that deserve publicity The authors are philosophers mathematicians a cognitive scientist an anthropologist a computer scientist and a couple of sociologists Among the mathematicians are two Fields Prize winners and two Steele Prize winners None are historians I regret to say but there are two historically oriented articles These essays don t share any common program or ideology The standard

for admission was Nothing boring Nothing trite nothing trivial Every essay is challenging thought provoking and original Back in the 1970s when I started writing about mathematics instead of just doing mathematics I had to complain about the literature Philosophy of science was already well into its modern revival largely stimulated by the book of Thomas Kuhn But philosophy of mathematics still seemed to be mostly foundationist ping pong in the ancient style of Rudolf Carnap or Willard Van Ormond Quine The great exception was Proofs and Refutations by Imre Lakatos But that exciting book was still virtually unknown and unread by either mathematicians or philosophers I wrote an article entitled Introducing Imre Lakatos in the Mathematical Intelligencer in 1978
