Communicating Mobility and Technology Ehren Helmut Pflugfelder, 2016-07-07 Winner of the 2018 CCCC Technical
and Scientific Communication Award in the category of Best Book in Technical or Scientific Communication Responding to
the effects of human mobility and crises such as depleting oil supplies Ehren Helmut Pflugfelder turns specifically to
automobility a term used to describe the kinds of mobility afforded by autonomous automobile based movement technologies
and their ramifications Thus far few studies in technical communication have explored the development of mobility
technologies the immense power that highly structured environmentally significant systems have in the world or the human
machine interactions that take place in such activities Applying kinaesthetic rhetoric a rhetoric that is sensitive to and
developed from the mobile material context of these technologies Pflugfelder looks at transportation projects such as electric
taxi cabs from the turn of the century to modern day open source vehicle projects and a large case study of an autonomous
electric pod car network that ultimately failed Kinaesthetic rhetoric illuminates how mobility technologies have always been
persuasive wherever and whenever linguistic symbol systems and material interactions enroll us often unconsciously into
regimes of movement and ways of experiencing the world As Pflugfelder shows mobility technologies involve networks of
sustained arguments that are as durable as the bonds between the actors in their networks Lemon-Aid New Cars and

unprecedented quality control problems Lemon Aid guides steer the confused and anxious buyer through the economic
meltdown unlike any other car and truck books on the market Phil Edmonston Canada's automotive Dr Phil for more than 40
years pulls no punches In this all new guide he says Chrysler's days are numbered with the dubious help of Fiat Electric cars
