Environmental Publics Sally Eden, 2016-12-08 How do ordinary people think about the environment as they go about their daily lives? Does thinking about the environment make them do things differently? This book is the first to explore the idea of environmental publics, that is the ways in which ordinary people engage with environmental issues across different practical contexts of work, play and home. Emphasising the practices of environmental engagement, *Environmental Publics* examines how people consume the environment, learn about it, campaign for its protection and enjoy it through their leisure time. But the book avoids relying on idealisations of consumers or citizens or theoretical constructs about behavioural norms that have traditionally dominated research in this field. Instead, this book differentiates environmental publics not by who they are but by what they are doing, their daily practices. It also analyses specifically the geographies of those practices, how what people do affects the environment but in different ways across time and space and at different scales, aspects of practices that are neglected in the literature. With an interdisciplinary perspective, this book will be of interest to students and scholars in geography, sociology, science and technology studies, political science and anthropology. It is written in an accessible and readable style so as to be useful for preliminary and more advanced courses in environmental management, perception and policy as well as in studies of modern society, consumption and environmentalism.

Solar Powered Charging Infrastructure for Electric Vehicles Larry E. Erickson, Jessica Robinson, Gary Brase, Jackson Cutsor, 2016-10-14 The Paris Agreement on Climate Change adopted on December 12, 2015 is a voluntary effort to reduce greenhouse gas emissions. In order to reach the goals of this agreement, there is a need to generate electricity without greenhouse gas emissions and to electrify transportation. An infrastructure of SPCSs can help accomplish both of these transitions. Globally, expenditures associated with the generation, transmission and use of electricity are more than one trillion dollars per year. Annual transportation expenditures are also more than one trillion dollars per year. Almost everyone will be impacted by these changes in transportation, solar power generation and smart grid developments. The benefits of reducing greenhouse gas emissions will differ with location but all will be impacted. This book is about the benefits associated with adding solar panels to parking lots to generate electricity, reduce greenhouse gas emissions and provide shade and shelter from rain and snow. The electricity

can flow into the power grid or be used to charge electric vehicles EVs Solar powered charging stations SPCSs are already in many parking lots in many countries of the world The prices of solar panels have decreased recently and about 30% of the new U S electrical generating capacity in 2015 was from solar energy More than one million EVs are in service in 2016 and there are significant benefits associated with a convenient charging infrastructure of SPCSs to support transportation with electric vehicles Solar Powered Charging Infrastructure for Electric Vehicles A Sustainable Development aims to share information on pathways from our present situation to a world with a more sustainable transportation system with EVs SPCSs a modernized smart power grid with energy storage reduced greenhouse gas emissions and better urban air quality Covering 200 million parking spaces with solar panels can generate about 1 4 of the electricity that was generated in 2014 in the United States Millions of EVs with 20 to 50 kWh of battery storage can help with the transition to wind and solar power generation through owners responding to time of use prices Written for all audiences high school and college teachers and students those in industry and government and those involved in community issues will benefit by learning more about the topics addressed in the book Those working with electrical power and transportation who will be in the middle of the transition will want to learn about all of the challenges and developments that are addressed here
