Uses and Misuses of Inflation and Price Indices Jeff Ralph,Paul A. Smith,Robert O'Neill,2024-01-23 In recent years the sharp rise in inflation across the world has brought about challenges for businesses and households alike In the UK many pay offers have not met the expectations of employees resulting in widespread strikes The action of the Bank of England in raising interest rates to bring inflation down has led to sharp rises in mortgage interest rates putting further pressure on households This book explores what is meant by inflation and how we go about measuring it It recounts the history of price rises over the past few decades and how pensions pay and benefits have been affected It also examines the political and economic factors that have driven government responses to inflation The book completes the broad picture of recent price changes by looking at house prices rents and business prices as well as how they are reported as official statistics

WHO Technical Manual on Tobacco Tax Administration World Health Organization,2010 Tobacco use is the single largest cause of preventable death globally killing more than five million people each year Tobacco use also creates considerable economic costs from greater spending on health care to treat the diseases it brings on in users and those exposed to tobacco smoke to the lost productivity resulting from the premature deaths it causes Of all the many interventions for reducing tobacco use a significant increase in tobacco product taxes and prices has been demonstrated to be the single most effective and cost effective intervention particularly among the poor and the young At the same time because of the inelasticity of demand for tobacco products in most countries and the low share of tax in price in many significant increases in tobacco taxes generate significant increases in the revenues generated by these taxes This technical manual aims to help governments achieve both objectives by identifying a set of best practices for tobacco taxation It

documents governments existing approaches to tobacco taxation discusses barriers to using tobacco taxes to achieve health and revenue objectives and provides case studies of effective tobacco tax administration This manual is intended to be useful to tax administrators at the Ministry of Finance level by making them aware of the practices used and challenges faced by other countries It will also be useful to officials in a country's Ministry of Health or similar organizations by providing them with a more thorough understanding of key issues in tax structure and administration

Life Didier Fassin, 2018-06-22 How can we think of life in its dual expression matter and experience the living and the lived Philosophers and more recently social scientists have offered multiple answers to this question often privileging one expression or the other the biological or the biographical But is it possible to conceive of them together and thus reconcile naturalist and humanist approaches Using research conducted on three continents and engaging in critical dialogue with Wittgenstein Benjamin and Foucault Didier Fassin attempts to do so by developing three concepts forms of life ethics of life and politics of life In the conditions of refugees and asylum seekers in the light of mortality statistics and death benefits and via a genealogical and ethnographical inquiry the moral economy of life reveals troubling tensions in the way contemporary societies treat human beings Once the pieces of this anthropological
