Uncharted Big Data As A Lens On Human Culture:

Uncharted Erez Aiden, Jean-Baptiste Michel, 2013-12-26 One of the most exciting developments from the world of ideas in decades presented with panache by two frighteningly brilliant endearingly unpretentious and endlessly creative young scientists Steven Pinker author of *The Better Angels of Our Nature* Our society has gone from writing snippets of information by hand to generating a vast flood of 1s and 0s that record almost every aspect of our lives who we know what we do where we go what we buy and who we love This year the world will generate 5 zettabytes of data That's a five with twenty one zeros after it Big data is revolutionizing the sciences transforming the humanities and renegotiating the boundary between industry and the ivory tower What is emerging is a new way of understanding our world our past and possibly our future In *Uncharted* Erez Aiden and Jean Baptiste Michel tell the story of how they tapped into this sea of information to create a new kind of telescope a tool that instead of uncovering the motions of distant stars charts trends in human history across the centuries By teaming up with Google they were able to analyze the text of millions of books The result was a new field of research and a scientific tool the Google Ngram Viewer so groundbreaking that its public release made the front page of *The New York Times* *The Wall Street Journal* and *The Boston Globe* and so addictive that Mother Jones called it the greatest timewaster in the history of the internet Using this scope Aiden and Michel and millions of users worldwide are beginning to see answers to a dizzying array of once intractable questions How quickly does technology spread Do we talk less about God today When did people start having sex instead of making love At what age do the most famous people become famous How fast does grammar change Which writers had their works most effectively censored by the Nazis When did the spelling donut start replacing the venerable doughnut Can we predict the future of human history Who is better known Bill Clinton or the rutabaga All over the world new scopes are popping up using big data to quantify the human experience at the grandest scales possible Yet dangers lurk in this ocean of 1s and 0s threats to privacy and the specter of ubiquitous government surveillance Aiden and Michel take readers on a voyage through these uncharted waters

Humanizing Big Data Colin Strong, 2015-03-03 Big data raises more questions than it answers particularly for those organizations struggling to deal with what has become an overwhelming deluge of data It can offer marketers more than simple tactical predictive analytics but organizations need a bigger picture one that generates some real insight into human behaviour to drive consumer strategy rather than just better targeting techniques *Humanizing Big Data* guides marketing managers brand managers strategists and senior executives on how to use big data strategically to redefine customer relationships for better customer engagement and an improved bottom line *Humanizing Big Data* provides a detailed understanding of the way to approach and think about the challenges and opportunities of big data enabling any brand to realize the value of their current and future data assets First it explores the nuts and bolts of data analytics and the way in which the current big data agenda is in danger of losing credibility by paying insufficient attention to what are often fundamental tenets in any form of analysis Next it sets out a

manifesto for a smart data approach drawing on an intelligent and big picture view of data analytics that addresses the strategic business challenges that businesses face Finally it explores the way in which datafication is changing the nature of the relationship between brands and consumers and why this calls for new forms of analytics to support rapidly emerging new business models After reading this book any brand should be in a position to make a step change in the value they derive from their data assets
