Uncorking The Past The Quest For Wine Beer And Other Alcoholic Beverages:

Uncorking the Past Patrick E. McGovern, 2009-10-30 In a lively gastronomical tour around the world and through the millennia *Uncorking the Past* tells the compelling story of humanity's ingenious intoxicating search for booze. Following a tantalizing trail of archaeological, chemical, artistic, and textual clues, Patrick E. McGovern, the leading authority on ancient alcoholic beverages, brings us up to date on what we now know about the creation and history of alcohol and the role of alcohol in society across cultures. Along the way, he integrates studies in food and sociology to explore a provocative hypothesis about the integral role that spirits have played in human evolution. We discover, for example, that the cereal staples of the modern world were probably domesticated in agrarian societies for their potential in fermenting large quantities of alcoholic beverages. These include the delectable rice wines of China and Japan, the corn beers of the Americas, and the millet and sorghum drinks of Africa. Humans also learned how to make mead from honey and wine from exotic fruits of all kinds, even from the sweet pulp of the cacao chocolate fruit in the New World. The perfect drink, it turns out, whether it be mind-altering, medicinal, a religious symbol, liquid courage, or artistic inspiration, has not only been a profound force in history but may be fundamental to the human condition itself. This coffee table book will sate the curiosity of any armchair historian interested in the long history of food and wine.

The Aesthetics of Food Kevin W. Sweeney, 2017-12-29 *The Aesthetics of Food* sets out the continuing philosophical debate about the aesthetic nature of food. The debate begins with Plato's claim that only objects of sight and hearing could be beautiful; consequently, food, as something we smell and taste, could not be beautiful. Plato's sceptical position has been both supported and opposed in one form or another throughout the ages. This book demonstrates how the current debate has evolved and critically assesses that debate, showing how it has been influenced by the changing nature of critical theory and changes in art historical paradigms: Expressionism, Modernism, and Post modernism, as well as by recent advances in neuroscience. It also traces changes in our understanding of the sensory experience of food and drink, from viewing taste as a simple, single sense to current views on its complex, multi-sensory nature. Particular attention is paid to recent philosophical discussion about wine: whether an interest in a wine reflects only a subjective or personal preference, or whether one can make objective judgments about the quality and merit of a wine. Finally, the book explores how the debate has been informed by changes in the cooking, presenting, and consuming of food, for example, by the appearance of the restaurant in the early nineteenth century, as well as the rise of celebrity chefs.

A Natural History of Wine Ian Tattersall, Rob DeSalle, 2015-01-01 A captivating survey of the science of wine and winemaking for anyone who has ever wondered about the magic of the fermented grape. An excellent bottle of wine can be the spark that inspires a brainstorming session. Such was the case for Ian Tattersall and Rob DeSalle, scientists who frequently collaborate on book and museum exhibition projects. When the conversation turned to wine one evening, it almost inevitably led the two—one a palaeoanthropologist, the other a molecular biologist—to begin exploring the many intersections

between science and wine This book presents their fascinating freewheeling answers to the question What can science tell us about wine And vice versa Conversational and accessible to everyone this colorfully illustrated book embraces almost every imaginable area of the sciences from microbiology and ecology for an understanding of what creates this complex beverage to physiology and neurobiology for insight into the effects of wine on the mind and body The authors draw on physics chemistry biochemistry evolution and climatology and they expand the discussion to include insights from anthropology primatology entomology Neolithic archaeology and even classical history The resulting volume is indispensable for anyone who wishes to appreciate wine to its fullest

Soju Hyunhee Park, 2021-02-18 Hyunhee Park offers the first global historical study of soju the distinctive distilled drink of Korea Searching for soju's origins Park leads us into the vast complex world of premodern Eurasia She demonstrates how the Mongol conquests of the thirteenth and fourteenth centuries wove together hemispheric flows of trade empire scientific and technological transfer and created the conditions for the development of a singularly Korean drink Soju's rise in Korea marked the evolution of a new material culture through ongoing interactions between the global and local and between tradition and innovation in the adaptation and localization of new technologies Park's vivid new history shows how these cross cultural encounters laid the foundations for the creation of a globally connected world

The Immortality Key Brian C. Muraresku, 2020-09-29 THE NEW YORK TIMES BESTSELLER As seen on The Joe Rogan Experience A groundbreaking dive into the role psychedelics have played in the origins of Western civilization and the real life quest for the Holy Grail that could shake the Church to its foundations The most influential religious historian of the 20th century Huston Smith once referred to it as the best kept secret in history Did the Ancient Greeks use drugs to find God And did the earliest Christians inherit the same secret tradition A profound knowledge of visionary plants herbs and fungi passed from one generation to the next ever since the Stone Age There is zero archaeological evidence for the original Eucharist the sacred wine said to guarantee life after death for those who drink the blood of Jesus The Holy Grail and its miraculous contents have never been found In the absence of any hard data whatever happened at the Last Supper remains an article of faith for today's 2.5 billion Christians In an unprecedented search for answers The Immortality Key examines the archaic roots of the ritual that is performed every Sunday for nearly one third of the planet Religion and science converge to paint a radical picture of Christianity's founding event And after centuries of debate to solve history's greatest puzzle Before the birth of Jesus the Ancient Greeks found salvation in their own sacraments Sacred beverages were routinely consumed as part of the so called Ancient Mysteries elaborate rites that led initiates to the brink of death The best and brightest from Athens and Rome flocked to the spiritual capital of Eleusis where a holy beer unleashed heavenly visions for two thousand years Others drank the holy wine of Dionysus to become one with the god In the 1970s renegade scholars claimed this beer and wine the original sacraments of Western civilization were spiked with mind altering drugs In recent years vindication for the disgraced theory has been quietly mounting in the laboratory The constantly advancing fields of

archaeobotany and archaeochemistry have hinted at the enduring use of hallucinogenic drinks in antiquity And with a single dose of psilocybin the psychopharmacologists at Johns Hopkins and NYU are now turning self proclaimed atheists into instant believers But the smoking gun remains elusive If these sacraments survived for thousands of years in our remote prehistory from the Stone Age to the Ancient Greeks did they also survive into the age of Jesus Was the Eucharist of the earliest Christians in fact a psychedelic Eucharist With an unquenchable thirst for evidence Muraresku takes the reader on his twelve year global hunt for proof He tours the ruins of Greece with its government archaeologists He gains access to the hidden collections of the Louvre to show the continuity from pagan to Christian wine He unravels the Ancient Greek of the New Testament with the world s most controversial priest He spelunks into the catacombs under the streets of Rome to decipher the lost symbols of Christianity s oldest monuments He breaches the secret archives of the Vatican to unearth manuscripts never before translated into English And with leads from the archaeological chemists at UPenn and MIT he unveils the first scientific data for the ritual use of psychedelic drugs in classical antiquity The Immortality Key reconstructs the suppressed history of women consecrating a forbidden drugged Eucharist that was later banned by the Church Fathers Women who were then targeted as witches during the Inquisition when Europe s sacred pharmacology largely disappeared If the scientists of today have resurrected this technology then Christianity is in crisis Unless it returns to its roots Featuring a Foreword by Graham Hancock the NYT bestselling author of *America Before* *Divine Vintage* Randall Heskett, Joel Butler, 2012-11-13 Winner of the Gourmand Wine Books prize for Best Drinks Writing Book in the UK A fascinating journey through ancient wine country that reveals the drinking habits of early Christians from Abraham to Jesus Wine connoisseur Joel Butler teamed up with biblical historian Randall Heskett for a remarkable adventure that travels the biblical wine trail in order to understand what kinds of wines people were drinking 2 000 to 3 500 years ago Along the way they discover the origins of wine unpack the myth of Shiraz and learn the secrets of how wine infiltrated the biblical world This fascinating narrative is full of astounding facts that any wine lover can take to their next tasting including the myths of the Phoenician Greek Roman and Jewish wine gods the emergence of kosher wine as well as the use of wine in sacrifices and other rites It will also take a close a look at contemporary modern wines made with ancient techniques and guide the reader to experience the wines Noah the first wine maker Abraham Moses and Jesus drank **Alcohol** Roderick Phillips, 2014 In this innovative book on the attitudes toward and consumption of alcohol Rod Phillips surveys a 9 000 year cultural and economic history uncovering the tensions between alcoholic drinks as healthy staples of daily diets and as objects of social political and religious anxiety In the urban centers of Europe and America where it was seen as healthier than untreated water alcohol gained a foothold as the drink of choice but it has been regulated by governmental and religious authorities more than any other commodity As a potential source of social disruption alcohol created volatile boundaries of acceptable and unacceptable consumption and broke through barriers of class race and gender Phillips follows the ever changing cultural

meanings of these potent potables and makes the surprising argument that some societies have entered post alcohol phases

Jacket Distilled Rob DeSalle, Ian Tattersall, 2022-07-12 An imaginative natural history survey of the wide world of spirits from whiskey and gin to grappa and moonshine In this follow up book to *A Natural History of Wine* and *A Natural History of Beer* authors Rob DeSalle and Ian Tattersall yet again use alcoholic beverages as a lens through which to gain a greater appreciation of natural history This volume considers highly alcoholic spirits in the context of evolution ecology history primatology molecular biology physiology neurobiology chemistry and even astrophysics With the help of illustrator Patricia Wynne DeSalle and Tattersall address historical and cultural aspects and ingredients the distillation process and spirits and their effects They also call on an international group of colleagues to contribute chapters on brandy vodka tequila whiskies gin rum eaux de vie schnapps baiju grappa ouzo and cacha a Covering beverages from across the globe and including descriptions of the experience of tasting each drink this book offers an accessible and comprehensive exploration of the scientific dimensions of spirits
