Understanding Chinese Families rus Y. Cyrus rus Chu,Ruoh-Rong Yu,2009-12-17 This book provides the reader with a comprehensive introduction to the distinguishing features of Chinese families This first full scale study seeks to understand Chinese families within the Chinese social context and draws comparisons with existing western theories and models of the family It also explores the connection between two Chinese societies across the Taiwan Strait and investigates if the unique features of Chinese families can be applied to broaden the scope of family analysis in general This book covers ten core areas including co residence marriage fertility education mobility gender preferences family supports filial feedbacks housework allocation and the dynamics of family norm changes The book uses theory based empirical studies with data collected from a unique panel survey conducted in various areas across the Taiwan Strait namely Taiwan and Southeast China The two focal points of the study are geographically close ethnically homogeneous and are open to the modern market economy A comprehensive analysis of these two areas provides new insights into the similarities and differences of Chinese families to what extent they are distinct from Western ones and how these similarities and differences were formed The uniquely complex nature of intra family interactions in Chinese families and the rapidly changing social background against which these interactions occur make this a hugely fascinating topic

Cooperation in Chinese Communities Charles Stafford, Ellen R. Judd, Eona Bell, 2020-05-26 When humans cooperate what are the social and psychological mechanisms that enable them to do so successfully Is cooperativeness something natural for humans built in to our species over the course of evolution or rather something that depends on cultural learning and social interaction This book addresses these central questions concerning human nature and the nature

of cooperation The editors present a wide range of vivid anthropological case studies focused on everyday cooperation in Chinese communities for example between children in Nanjing playing a ballgame parents in Edinburgh organising a community school villagers in Yunnan dealing with common pool resource problems and families in Kinmen in Taiwan worshipping their dead together On the one hand these case studies illustrate some uniquely Chinese cultural factors such as those related to kinship ideals and institutions that shape the experience and practice of cooperation They also illustrate on the other hand how China s recent history not least the rise and fall of collectivism in various forms continues to shape the experience of cooperation for ordinary people in China today Finally they show that in spite of the cultural and historical particularity of Chinese cooperation it does share some underlying features that would be familiar to people coming from radically different backgrounds

Young Adults in Urban China and Taiwan Désirée Remmert,2019-08-22 This book compares aspirations and life choices among educated young adults in urban China and Taiwan As two places that share a cultural heritage but very different political and economic systems it assesses how the socio economic and political trajectories of China and Taiwan have influenced young people s decision making and the strategies they apply to realize their goals Drawing upon ethnographic research this book analyzes young adults choices in the areas of education career and marriage considering their individual social backgrounds and economic resources In this context it also discusses how feelings of hope doubt and disenchantment are mitigated by the specific societal atmospheres and ideological discourses Whereas stable employment and marriage appeared to be universal goals this book demonstrates how young adults in Beijing had more autonomy in decision making concerning individual life choices than those in Taipei Among other things China s demographic controls and urban migration policies appear to increase the independence of young people from their parents Further the prevalence of boarding school education in China compared to Taiwan provides an opportunity for earlier autonomy for young people in China Taking a comparative approach *Young Adults in Urban China and Taiwan* will be a valuable resource to students and scholars of Chinese Studies and Taiwan Studies as well as social and cultural anthropology and youth culture
