Web Journalism Practice And Promise Of A New Medium:

Web Journalism James Glen Stovall, 2004 Journalism on the Web explores the current practices and future possibilities of Web journalism and examines the characteristics of the Web that distinguish it from traditional media. The author guides students through discussion of the traditional practices of journalism such as reporting, editing, photojournalism, and design while showing how the distinguishing features of the Web—capacity, immediacy, flexibility, permanency, and interactivity—offer new storytelling possibilities. The traditional principles of journalism, particularly journalistic writing that emphasizes accuracy, clarity, precision, and efficiency, are emphasized throughout the text. Features: The first three chapters offer an in-depth examination of the Web as an individual news medium, taking students beyond the idea that Web news is simply a newspaper on screen. An inside look at MSNBC provides students with an idea of what it's like to be inside a 24-hour Web news organization. Ch 13: Three chapters on lateral thinking ask students to think beyond the traditional narrative storytelling forms of the inverted pyramid and present a variety of forms and structures to present information. 4, 5, 6: Cool Ideas sidebars located throughout the book offer short descriptions of innovative ideas of Web journalism to stimulate creative thinking. Web site references at the end of each chapter provide professors with the best sites available for keeping up with advances in Web journalism.

The Web as History Niels Brügger, Ralph Schroeder, 2017-03-06 The World Wide Web has now been in use for more than 20 years. From early browsers to today's principal source of information, entertainment, and much else, the Web is an integral part of our daily lives to the extent that some people believe if it's not online, it doesn't exist. While this statement is not entirely true, it is becoming increasingly accurate and reflects the Web's role as an indispensable treasure trove. It is curious, therefore, that historians and social scientists have thus far made little use of the Web to investigate historical patterns of culture and society, despite making good use of letters, novels, newspapers, radio, and television programmes and other pre-digital artefacts. This volume argues that now is the time to ask what we have learnt from the Web so far. The 12 chapters explore this topic from a number of interdisciplinary angles through histories of national web spaces and case studies of different government and media domains, as well as an introduction that provides an overview of this exciting new area of research.

Covering the Environment Bob Wyss, 2010-09-28 Covering the Environment serves as a primer for future and current journalists reporting on environmental issues across all types of media. It also provides background to help environmental journalists identify their audiences and anticipate reactions to environmental news. Contents include: An overview and history of the environment and journalism spotlighting the most significant issues in the beat. Guidance on understanding environmental and health science ranging from issues of risk to scientific research and studies to interviewing

scientists Insights into government and regulatory communities and environmental advocates on all sides of the political spectrum Assistance in accessing public records and conducting computer assisted reporting Guidance in writing the story for print broadcast and Internet audiences An examination of the future of journalism and coverage of the environment Observations and story excerpts from experienced journalists provide a real world component illuminating the practice of environmental journalism Additional features in each chapter include study questions story assignments and resources for additional information The book also provides a glossary of environmental science regulator and journalism terms as well as a reference section and index This resource has been developed to train advanced undergraduate and graduate journalism students to cover the science and environment community writing print and broadcast stories to a general audience It also serves as a guide for working journalists who cover the environment in their work *Australian Studies in Journalism* ,2004

Production Nico Carpentier, Benjamin De Cleen, 2008 In an era when especially new media are celebrated for their
 participatory potential questions about the nature and intensity of these participatory processes seem to be superfluous But
 raising these questions pushes us into a critical mode towards the changes that have lead to the present day media landscape
 This volume TM s authors aim to activate this critical mode and reflect on the participatory nature of contemporary media
 organizations and products In order to stand even a remote chance to realize this objective and to critically unravel the
 societal role of participation we need to acknowledge that participation is a complex and contested notion covering a wide
 variety of meanings and practices that are converging into a hybrid of technologies genres and formats At the same time
 prudence is required as many of the empowering and transformative opportunities cover up a multitude of restrictions that
 deal with muting voices appropriations techniques of surveillance inequalities and exclusions This volume thus provides its
 readership with a set of analyses that reconcile the appreciation for the analogue and digital empowerment and emancipation
 with the critical analysis of their boundaries Participation and Media Production is the result of the intellectual work of the
