Web Resources for Science Activities Amy Gammill, 2004-01-05 **The Art of Teaching Science** Jack Hassard, 2005
This is a core teaching textbook designed for the professional development of middle and high school science teachers. Differing from other texts in its constructivist approach to learning and teaching, it provides meaningful learning experiences and connections with the most recent research and understanding of science teaching. Each chapter is organized into two sections: the first focuses on the content of the major theme of the chapter, while the second consists of a newspaper-like feature called The Science Teaching Gazette containing a variety of strategies for extending the learning process. Packed with learning tools, hands-on inquiry activities, case studies, think pieces, and interviews with teachers around the world, this is a remarkably comprehensive textbook designed to prepare a new cadre of science teachers. Midwest Resources in Education, 2001-04 **Science Activities Using the World Wide Web** Kathy Sage, 1999. Get kids wired up, then fired up with this step-by-step guide to using the Internet to study six science topics: flight, germs, simple machines, sharks, the digestive system, and weather. Each topic includes Web search directions, Web addresses, and model lessons for the whole class, small groups, or individuals. Reproducible and clear directions for both teachers and students make this book a practical tool to blend teaching with technology. Informal Mathematics and Science Education, 1998 **Educators Guide to Free Internet Resources** Educators Progress Service, 2005-04. To provide our customers with a better understanding of each title in our database, we ask that you take the time to fill out all details that apply to each of your titles.
