Uncertain Business Risk Insurance And The Limits Of Knowledge:

Uncertain Business Richard Victor Ericson, Aaron Doyle, 2004-01-01 We live in an age of increasing doubt about whether our institutions and technologies can provide security against risks many of which they themselves have created Uncertain Business is an unprecedented inquiry into insurance industry practices and what they tell us about risks and uncertainties in contemporary society The core of the book is ethnographic studies in distinct fields of insurance premature death disability earthquake and terrorism These studies reveal that uncertainty pervades different fields of insurance the very industry that is charged with transforming uncertainty into manageable risk Scientific data on risk are variously absent inadequate controversial contradictory and ignored Insurers impose meaning on uncertainty through non scientific forms of knowledge that are intuitive emotional aesthetic moral and speculative Nevertheless the nature of uncertainty and the response to it varies substantially across the fields studied showing how contemporary society is characterized by competing risk logics Insurers perceptions and decisions about uncertainty with potential for windfall profits as well as catastrophic losses create crises in insurance availability and provoke new forms of inequality and exclusion Hence while the insurance industry is a central bulwark against uncertainty insurers also play a key role in fostering it *Social Theories of Risk and Uncertainty* Jens Zinn, 2008-03-17 Provides an overview of the historical developments and conceptual aspects of risk and identifies why theorizing on risk is necessary and highlights specific sociological contributions to this field of research Explores key topics including risk society and reflexive modernization culture and risk governmentality and risk systems theory and risk and edgework and voluntary risk taking **Michigan Law Review** , 2012-10 *Science & Public Policy* , 2005 Risk and Trust Law Commission of Canada, 2007 Exploring a broad range of case studies including young women in conflict with the law child soldiers welfare recipients genetic testing biotechnology and new technologies the contributors explore whether the concept of risk has undermined our sense of trust in society effectively eroding the definition of citizenship marginalizing particular people and groups needlessly heightening societal fears and rendering invisible social inequalities Environment & Planning , 2012 **Biosecurity** Brian Rappert, Chandré Gould, 2009-10-29 This book explores the origins interpretations and meanings of the term biosecurity in different national and international contexts Regulating Deviance Bernadette McSherry, Alan Norrie, Simon Bronitt, 2009 The criminal attacks that occurred in the United States on 11 September 2001 have profoundly altered and reshaped the priorities of criminal justice systems around the world Domestic criminal law has become a vehicle for criminalising new terrorist offences and other transnational forms of criminality Preventative detention regimes have come to the fore balancing the scales in favour of security rather than individual liberty These moves complement already existing shifts in criminal justice policies and ideologies brought about by adjusting to globalisation economic neo liberalism and the shift away from the post war liberal welfare settlement This collection of essays by leading scholars in the fields of criminal law and procedure criminology legal history law and

psychology and the sociology of law focuses on the future directions for the criminal law in the light of current concerns with state security and regulating deviant behaviour
