web dynamic mechanical analysis dma is a technique that is widely used to characterize a material s properties as a function of temperature time frequency stress atmosphere or a combination of these parameters the dma 8000 dynamic mechanical analyzer is one of the most flexible cost effective instruments available today

web dynamic mechanical analysis dma describes a procedure in which the mechanical properties of materials are measured as a function of time temperature and frequency in basic terms dynamic mechanical analysis involves the application of a stressor on a target such as the reverberation of soundwaves acting upon a sample
