Through Vegetal Being Two Philosophical Perspectives Critical Life Studies:

Through Vegetal Being Luce Irigaray, Michael Marder, 2016-07-05 Blossoming from a correspondence between Luce Irigaray and Michael Marder *Through Vegetal Being* is an intense personal philosophical and political meditation on the significance of the vegetal for our lives our ways of thinking and our relations with human and nonhuman beings The vegetal world has the potential to rescue our planet and our species and offers us a way to abandon past metaphysics without falling into nihilism Luce Irigaray has argued in her philosophical work that living and coexisting are deficient unless we recognize sexual difference as a crucial dimension of our existence Michael Marder believes the same is true for vegetal difference Irigaray and Marder consider how plants contribute to human development by sustaining our breathing nourishing our senses and keeping our bodies and minds alive They note the importance of returning to ancient Greek tradition and engaging with Eastern teachings to revive a culture closer to nature As a result we can reestablish roots when we are displaced and recover the vital energy we need to improve our sensibility and relation to others This generative discussion points toward a more universal way of becoming human that is embedded in the vegetal world *Countersexual Manifesto* Paul B. Preciado, 2018-12-18 *Countersexual Manifesto* is an outrageous yet rigorous work of trans theory a performative literary text and an insistent call to action Seeking to overthrow all constraints on what can be done with and to the body Paul B. Preciado offers a provocative challenge to even the most radical claims about gender sexuality and desire Preciado lays out mock constitutional principles for a countersexual revolution that will recognize genitalia as technological objects and offers step by step illustrated instructions for dismantling the heterocentric social contract He calls theorists such as Derrida Foucault Butler and Haraway to task for not going nearly far enough in their attempts to deconstruct the naturalization of normative identities and behaviors Preciado's claim that the dildo precedes the penis that artifice not nature comes first in the history of sexuality forms the basis of his demand for new practices of sexual emancipation He calls for a world of sexual plasticity and fabrication of bio printers and dildonics and he invokes countersexuality's roots in the history of sex toys pornography and drag in order to rupture the supposedly biological foundations of the heterocentric regime His claims are extreme but supported through meticulous readings of philosophy and theory as well as popular culture The *Manifesto* is now available in English translation for its twentieth anniversary with a new introduction by Preciado *Countersexual Manifesto* will disrupt feminism and queer theory and scandalize us all with its hyperbolic but deadly serious defiance of everything we've been told about sex *Foucault's Futures* Penelope Deutscher, 2017-04-04 In *Foucault's Futures* Penelope Deutscher reconsiders the role of procreation in Foucault's thought especially its proximity to risk mortality and death She brings together his work on sexuality and biopolitics to challenge our understanding of the politicization of reproduction By analyzing Foucault's contribution to the politics of maternity and its influence on the work of thinkers such as Roberto Esposito Giorgio Agamben and Judith Butler Deutscher provides new insights into the conflicted

political status of reproductive conduct and what it means for feminism and critical theory **Posthumous Life** Jami Weinstein, Claire Colebrook, 2017-03-28 Posthumous Life launches critical life studies a mode of inquiry that neither endorses nor dismisses a wave of recent turns toward life matter vitality inhumanity animality and the real Questioning the nature and limits of life in the natural sciences the essays in this volume examine the boundaries and significance of the human and the humanities in the wake of various redefinitions of what counts as life They explore the possibility of theorizing life without assuming it to be either a simple substrate or an always mediated effect of culture and difference Posthumous Life provides new ways of thinking about animals plants humans difference sexuality race gender identity the earth and the future

Breathe - Critical Research into the Inequalities of Life Sandra Noeth, Janez Jansa, 2023-04-03 Breathing is an unavoidable vital act yet it cannot be taken for granted as the experiences of the pandemic profound changes in our environment but also structural racist discrimination make clear In the physical act of breathing we are symbolically materially and radically thrown back to our own bodies and connected to the bodies of others In conversation with artists and theorists from different fields the contributors to this volume explore different acts of suffocation and release They show how the protection of bodies is unequally and ambivalently distributed and how it can be an act of resistance It is an insistence on life a demand for existential political symbolic and ethical recognition **Speculative Taxidermy** Giovanni Aloï, 2018-01-23 Taxidermy once the province of natural history and dedicated to the pursuit of lifelike realism has recently resurfaced in the world of contemporary art culture and interior design In Speculative Taxidermy Giovanni Aloï offers a comprehensive mapping of the discourses and practices that have enabled the emergence of taxidermy in contemporary art Drawing on the speculative turn in philosophy and recovering past alternative histories of art and materiality from a biopolitical perspective Aloï theorizes speculative taxidermy a powerful interface that unlocks new ethical and political opportunities in human animal relationships and speaks to how animal representation conveys the urgency of addressing climate change capitalist exploitation and mass extinction A resolutely nonanthropocentric take on the materiality of one of the most controversial mediums in art this approach relentlessly questions past and present ideas of human separation from the animal kingdom It situates taxidermy as a powerful interface between humans and animals rooted in a shared ontological and physical vulnerability Carefully considering a select number of key examples including the work of Nandipha Mntambo Maria Papadimitriou Mark Dion Berlinda De Bruyckere Roni Horn Oleg Kulik Steve Bishop Sn bj rnsd ttir Wilson and Cole Swanson Speculative Taxidermy contextualizes the resilient presence of animal skin in the gallery space as a productive opportunity to rethink ethical and political stances in human animal relationships **Perishability Fatigue** Vincent Bruyere, 2018-09-25 The Svalbard Global Seed Vault project is an arctic archive designed to preserve the world's agricultural biodiversity What do it and other novel forms of storage tell us about our relationship to the future in a time of resource depletion and extinction scenarios In this innovative book Vincent Bruyere offers an invitation to look at the present we live in through a

fresh lens the difference between storage and burial in the age of sustainability science Perishability Fatigue considers questions of permanence and the potentiality of retrieval noting the tensions within our collective sense of time and finitude Bruyere reflects on the nature and significance of perishability asking what it means to have one's sense of temporality engendered by seed banks and frozen embryo storage genetically modified organisms and the de-extinction of species nuclear waste repositories oncology and palliative care He draws attention to the scripts and scenarios that mediate our relations to loss and decay preservation and conservation emphasizing the inequalities implicit in technologies of perishability which promise continuity in the future to some while refusing it to others A highly interdisciplinary study Perishability Fatigue reframes the environmental humanities and humanistic inquiry into sustainability science by developing a new language to commemorate fatigue and transience in a culture of preparedness and survival

Making Kin with Trees Solvejg Nitzke, 2025-09-30 This book analyzes how trees act as mediators of interspecies relationships in popular science writing and creative nonfiction Making Kin with Trees argues that trees emerge as agents of arboreal poetics shaping not only fictional but also material interactions Following how speculative care practices infuse scientific and poetic texts formatting practices of reading sensing knowing and communicating with trees while affirming both cultural and scientific meaning making processes This book shows how arboreal thinking connects and might ultimately require breaking down the barrier between fact and fiction human and plant onlooker and artwork This book will be of interest to audiences based in fields including environmental humanities science and technology studies and ecocriticism and everyone engaged in science communication and interested in the relationship between scientific fact and narrative

Plants in Place Edward S. Casey, Michael Marder, 2023-12-26 Plants are commonly considered immobile in contrast to humans and other animals But vegetal existence involves many place based forms of change stems growing upward roots spreading outward fronds unfurling in response to sunlight seeds traveling across wide distances and other intricate relationships with the surrounding world How do plants as sessile growing decaying and metamorphosing beings shape the places they inhabit and how are they shaped by them How do human places interact with those of plants in lived experience in landscape painting in cultivation and contemplation in forests fields gardens and cities Examining these questions and many more Plants in Place is a collaborative study of vegetal phenomenology at the intersection of Edward S. Casey's phenomenology of place and Michael Marder's plant thinking It focuses on both the microlevel of the dynamic

constitution of plant edges or a child's engagement with moss and the macrolevel of habitats that include the sociality of trees. This compelling portrait of plants and their places provides readers with new ways to appreciate the complexity and vitality of vegetal life. Eloquent, descriptively rich and insightful, the book also shows how the worlds of plants can enhance our understanding and experience of place more broadly.

Earthborn Democracy Ali Aslam, David W. McIvor, Joel Alden Schlosser, 2024-09-10 Ecological crises threaten all forms of life on earth. Democracy too is endangered as popular discontent, elite malfeasance, and unresponsive institutions imperil its survival. Present political concepts have proven inadequate to meeting these challenges, and their inadequacies are themselves symptoms of the failures of prevailing political, cultural, and ecological stories and practices. This book offers a new vision of ecological and participatory democratic life for a time of crisis. Identifying myth and ritual as key resources for contemporary politics, *Earthborn Democracy* excavates practices and narratives that illustrate the interdependence necessary to inspire ecological renewal. It tells stories of multispecies agency and egalitarian political organization across history, from ancient Mesopotamia and the precolonial Americas to contemporary social movements, emphasizing Indigenous traditions and resistance. Resonating across these practices and stories, past and present, is a belief that we are all human as well as nonhuman, earthborn, and this can serve as the basis for reimagining democracy. Allying visionary political theory with environmental activism, *Earthborn Democracy* provides a foundation and a guide for collective action in pursuit of earthly flourishing.

Gospel Jesuses and Other Nonhumans Stephen D. Moore, 2017-08-04 Essential reading for biblical studies students and scholars interested in cutting-edge critical theory. The current global ecological crisis has prompted a turn to the nonhuman in critical theory. This book breaks new ground in biblical studies as the first to bring nonhuman theory to bear on the gospels and Acts. Nonhuman theory, a confluence of several of the main theoretical streams that have issued forth since the heyday of high poststructuralism, includes affect theory, posthuman animality studies, critical plant studies, object-oriented new materialisms, and assemblage theory. Nonhuman theory dismantles and reassembles the Western concept of the human that coalesced during the Enlightenment and testifies to other conceptions of the human and of the nonhuman, not least those found in the canonical gospels and Acts. Stephen D. Moore's exegetical explorations and defamiliarizations of these overly familiar texts and excavations of their incessantly erased strangeness are the central feature of this provocative book. Features: New paths in biblical ecotheology and ecocriticism. A significant contribution to the analysis of emotions in biblical texts. Class resource for courses in methods for biblical studies, the gospels, and the Bible and ecology.

is to explore critically and reflexively the plurality of phenomenologies and their becoming in the context of Management and Organization Studies We detail in the introduction the genealogy of the phenomenological moment and make a distinction between four streams of phenomenologies phenomenology as a phenomenological moment post phenomenologies anti phenomenologies and non phenomenologies Beyond many clichés about phenomenologies we argue that phenomenologies cultivate critical perspectives ontologies and even for some of them metaphysics that make them particularly interwoven with other philosophical traditions We draw implications for Management and Organization Studies as a field
