Shaping US Military Law Joshua E. Kastenberg,2016-04-01 Since the United States entry into World War II the federal judiciary has taken a prominent role in the shaping of the nation s military laws Yet a majority of the academic legal community studying the relationship between the Court and the military establishment argues otherwise providing the basis for a further argument that the legal construct of the military establishment is constitutionally questionable Centering on the Cold War era from 1968 onward this book weaves judicial biography and a historic methodology based on primary source materials into its analysis and reviews several military law judicial decisions ignored by other studies This book is not designed only for legal scholars Its intended audience consists of Cold War military and political historians as well as political scientists and military and national security policy makers Although the book s conclusions are likely to be favored by the military establishment the purpose of this book is to accurately analyze the intersection of the later twentieth century s American military political social and cultural history and the operation of the nation s armed forces from a judicial vantage

Drawdown Jason W. Warren, 2016-10-18 Analyzes the cultural attitudes political decisions and institutions surrounding the maintenance of armed forces throughout American history While traditionally Americans view expensive military structure as a poor investment and a threat to liberty they also require a guarantee of that very freedom necessitating the employment of armed forces Beginning with the seventeenth century wars of the English colonies Americans typically increased their military capabilities at the beginning of conflicts only to decrease them at the apparent conclusion of hostilities In Drawdown The American Way of Postwar a stellar team of military historians argue that the United States sometimes managed effective drawdowns sowing the seeds of future victory that Americans eventually reaped Yet at other times the drawing down of military capabilities undermined our readiness and flexibility leading to more costly wars and perhaps defeat The political choice to reduce military capabilities is influenced by Anglo American pecuniary decisions and traditional fears of government oppression and it has been haphazard at best throughout American history These two factors form the basic American liberty dilemma the vexed relationship between the nation and its military apparatuses from the founding of the first colonies through to present times With the termination of large scale operations in Iraq and the winnowing of forces in Afghanistan the United States military once again faces a significant drawdown in standing force structure and capabilities The political and military debate currently raging around how best to affect this force reduction continues to lack a proper historical perspective This volume aspires to inform this dialogue Not a traditional military history Drawdown analyzes cultural attitudes political decisions and institutions surrounding the maintenance of armed forces
