Ecological Politics John Rensenbrink, 2016-11-21 Rejection of politics is deep and widespread Even sincere and responsible individuals who practice it hold their nose while doing so Yet politics must be practiced and well if the planet and the people are to survive A clue for our future success as a species lies in the fact that ecology has never really been tried in politics Yet ecology holds the secret of success for planet and people precisely in politics Deep in ecology is the astounding fact scientifically examined and attested to that we are already related Though taught by elite after elite that we are separate from nature and thus from everyone and everything this can now be seen as the great mistake and a perpetuated lie from generation to generation A new ontology of being related is the gateway of consciousness to a new and exciting politics for survival and democracy Waves of transformation lap at barriers in the political sphere But they are repulsed by an entrenched politics rooted not only in the greed and power hunger of a dominant few or in outmoded structures of economic and political power but in the old millennial ontology of being separate Our extraordinary times call for a new political party animated by the ecology of being related It is a party of a different kind one that frees itself from giant worldwide corporations is fully and overtly dedicated to non violence and rooted in the awareness that the people come first This party knows that elections must be fair and equal and must enable undistorted dialogue and that people in government must not only proclaim but practice the principle of being of for and by the people This book challenges The Green Party now on a footing in over 100 countries to be this party of a different kind
