Time Conflict And Human Values:

Time, Conflict, and Human Values Julius Thomas Fraser, 1999 Over the course of history Fraser argues human values have served primarily not as conservative influences that promote permanence continuity and balance as commonly believed but as revolutionary forces that in the long run promote change by generating and sustaining certain unresolvable conflicts

BOOK JACKET **Information and Human Values** Kenneth Fleischmann, 2022-06-01 This book seeks to advance our understanding of the relationship between information and human values by synthesizing the complementary but typically disconnected threads in the literature reflecting on my 15 years of research on the relationship between information and human values advancing our intellectual understanding of the key facets of this topic and encouraging further research to continue exploring this important and timely research topic The book begins with an explanation of what human values are and why they are important Next three distinct literatures on values information and technology are analyzed and synthesized including the social psychology literature on human values the information studies literature on the core values of librarianship and the human computer interaction literature on value sensitive design After that three detailed case studies are presented based on reflections on a wide range of research studies The first case study focuses on the role of human values in the design and use of educational simulations The second case study focuses on the role of human values in the design and use of computational models The final case study explores human values in communication via about or using information technology The book concludes by laying out a values and design cycle for studying values in information and presenting an agenda for further research

Time and Time Again Julius Thomas Fraser, 2007 This work represents a guided tour to the interdisciplinary integrated study of time Through twenty two connected essays selected from the author's extensive writings Time and Time Again advances new insights into understanding the nature of time seen through philosophy the arts and letters the sciences of matter life mind and society Traditionally attitudes to future past and present remained distinct for different cultures But upon the globalizing earth all cultural regions are now in instant by instant communication There is a consequent turmoil about individual and collective identities and about value judgments in all of which attitudes to time play crucial roles The book explores this turmoil and through its references it also serves as a guide to the broadly spread literature about time

The Dialectics of Liberty Chris Matthew Sciabarra, Edward W. Younkins, Roger E. Bissell, 2019-06-04 This collection of essays explores the ways in which the defense of liberty can be bolstered by use of a dialectical method that is a mode of analysis devoted to grasping the full context of philosophical cultural and social factors requisite to the sustenance of human freedom Its strength lies in the variety of disciplines and perspectives represented by contributors who apply explicitly dialectical tools to a classical liberal libertarian analysis of social and cultural issues In its conjoining of a dialectical method typically associated with the socialist left to a defense of individual liberty typically associated with the libertarian right this anthology challenges contemporary attitudes on both

ends of the political spectrum Though this conjunction of dialectics and liberty has been explored before in several works including a trilogy of books written by one of our coeditors Chris Matthew Sciabarra this volume will be the first one of its kind to bring together accomplished scholars in political science economics philosophy aesthetics psychology law history education and rhetoric

International Relations and the Problem of Time Andrew R. Hom,2020-05-26 What is time and how does it influence our knowledge of international politics For decades International Relations IR paid little explicit attention to time Recently this began to change as a range of scholars took an interest in the temporal dimensions of politics Yet IR still has not fully addressed the issue of why time matters in international politics nor has it reflected on its own use of time how temporal ideas affect the way we work to understand political phenomena Moreover IR remains beholden to two seemingly contradictory visions of time the time of the clock and a longstanding tradition treating time as a problem to be solved International Relations and the Problem of Time develops a unique response to these interconnected puzzles It reconstructs IR s temporal imagination by developing an argument that all times from natural rhythms to individual temporal experience spring from social and practical timing activities or efforts to establish meaningful and useful relationships in complex and dynamic settings In IR s case across a surprisingly wide range of approaches scholars employ narrative timing techniques to make sense of confounding processes and events This innovative account of time provides a more systematic and rigorous explanation for time in international politics It also develops provocative insights about IR s own history its key methodological commitments supposedly timeless statistical methods historical institutions and the critical vanguard of time studies This book invites us to reimagine time and in so doing to significantly rethink the way we approach the analysis of international politics

Jesus and Time Ma'afu Palu,2012-05-03 This work offers an examination of Jesus conception of time on the basis of Mark 1 15 Palu contends that the background which makes Mark 1 15 most intelligible is God s covenant with day and night which is established in the act of creation specified in prophetic eschatology and developed in Second Temple literature it is God s commitment to give day and night in their appointed time promising the restoration of Israel under David s offspring On the basis of recent

developments in scholarly literature concerning the Greek verbal aspect this study argues that the perfect verbs in Mark 1 15 denote an ongoing dynamic of time fulfilment closely tied to the ultimate restoration of Israel This begins with the appearance of Jesus during the days of John the Baptist and is mapped onto two phases of the horizon of Jesus view of time Palu concludes that the biblical notion of time is to be tied intimately to the hope of the restoration of Israel ultimately manifested as the establishment of the Kingdom of God Human Values from the Greeks to Modern Times Glenn S.

Visher,1997 How did human values develop Were they inherent in our being Were they selected to insure human survival For those interested in understanding the foundations for their own belief system this book provides thought provoking answers to these questions **Back to Human Nature** Charles B. Osburn,2020-10-01 Emotions feelings and morality play a critical

role in our daily decision making With the rapid advance of industry and technology however this subjective information is becoming less valued in critical decisions Rational thought and the accumulation of objective knowledge are often credited with humanity s thriving success in recent centuries This book makes the case that humanity s social progress has only been possible through these too often repressed subjective factors and will be equally crucial in altering the present course of society Origins and Futures: Time Inflected and Reflected Raji C. Steineck,Claudia Clausius,2013-05-16 Origins and

Futures Time Inflected and Reflected provokes an interdisciplinary dialogue about culture politics and science s strategies to divert the relentless trajectory of time Literature socio political policy physics among other subjects demonstrate the human refusal to enlist in temporal determinism Articles ranging from how detective fiction and international terrorism manipulate the narration of events to the unlocking of political trauma through forgiveness to the genetic archaeology of the Human Genome project and the lacunar amnesia of nuclear energy corporations all argue that wherever human minds meet they wrestle to undo the irrevocable the irreversible the fixed Although such efforts look to the future they rarely look straight ahead Whatever their enterprise writers philosophers and scientists believe that origins are alacritous keys to future hopes and aspirations Contributors include Marcus Bullock Michael Crawford Patricia Engle Carol Fischer J T Fraser Sabine Gross Paul Harris Rosemary Huisman Karmen MacKendrick Steven Ostovich Walter Schweidler Friedel Weinert and Masae Yuasa

Montemayor Jo Alyson Parker Katie Paterson Walter Schweidler Raji C Steineck Daniela Tan Frederick Turner Thomas P Weissert Marc Wolterbeek and Barry Wood **Critical Terms in Futures Studies** Heike Paul, 2019-12-02 This volume provides the essential vocabulary currently employed in discourses on the future in 50 contributions by renowned scholars in their respective fields which examine future imaginaries across cultures and time Not situated in the field of futurology proper it comes at future studies sideways and offers a multidisciplinary treatment of a critical futures vocabulary The contributors have their disciplinary homes in a wide range of subjects history cultural studies literary studies sociology media studies American studies Japanese studies Chinese studies and philosophy and critically illuminate numerous discourses about the future or futures past and present In compiling such a critical vocabulary this book seeks to foster conversations about futures in study programs and research forums and offers a toolbox for discussing them with an adequate degree of complexity *The Rough Guide to The Future* Jon Turney, 2010-11-01 Find the future now with 50 predictions in The Rough Guide to the Future Wondering what's really in store for the human race Nanotechnology and gene enhancements solar power and carbon capture Or oil shocks water wars food shortages and mass extinction The Rough Guide to the Future cuts a clear path through the jungle of scientific research and political debate steering you around the prophets of doom and the utopian visionaries to take you on a tour of the likeliest possibilities for the rest of this century and beyond It covers 50 predictions from the world's leading futurologists and chronicles predictions from the past along with visions of the future You'll find out where we go from here with The Rough Guide to the Future *Wicked Valuations* Michael McDermott, 2018-07-16 Traditional valuation approaches are increasingly recognised as being insufficient to address the wicked valuation problems of the diverse peoples and groups that inhabit the globe from north south east to west This book demonstrates the limitations of science and in particular economics as the foundation on which valuations are traditionally based It demonstrates the importance of and provides justification for the personal cultural values and norms which underpin our assessment of value and the fact that these vary across the world In Wicked Valuations Michael McDermott develops a means of engaging with highly complex valuation problems His autoethnography provides a lens to draw on knowledge and experience from his 40 years in land valuation in Africa and the Asia Pacific while documentary analysis is used to draw in the views of other valuation practitioners and scholars who are becoming increasingly aware of the need to develop ways to adapt land valuation processes to the complexity of our contemporary landscapes *Natural Religion* Frederick Turner, 2017-07-12 There is widespread belief that the world's religions contradict each other It follows that if one religion is true the others must be false an assumption that implies and may actually create religious strife In Natural Religion acclaimed poet critic and essayist Frederick Turner sets out to show that the natural world offers grounds for stating that all religions are in some respect true Through the ages various ways have been proposed to resolve religious differences Some argue for the destruction of all religions but one's own Others substitute an abstract principle for the real ritual and moral

practice of religion Still others doubt all religious truth and consequently all truth Others accept a kind of pluralistic relativism This book explores syncretism whereby all religions are seen as grasping the same strange and complex reality but by very different means and handles The idea that all religions are true raises a supervening question if so what must the real physical universe be like Turner approaches these questions in terms of scientific inquiry There is not enough room in space itself to fit in all theologies but there may be enough room in time if new scientific descriptions of time s nature are to be believed Turner argues that in the time models of contemporary cosmological and evolutionary science all times may be connected and time may be infinitely branched and causally looped so that both forward in time and backward in time factors may be in operation in the same event Thus the fundamental substance of the universe may be information rather than matter or energy The universe is more like a vast living organism than a vast machine Turner argues that all existing religions can be shown to fit into this model which in turn points to deeper implications of religious doctrines languages and practices There would be plenty of room in such a view of time for a tree of different yet linked religious w

Simultaneity: Temporal Structures And Observer Perspectives Otto E Rossler,Susie Vrobel,Terry Marks-tarlow,2008-03-14 This book presents an interdisciplinary approach to the question of how observer participant perspectives are generated what constrains them and how they may be modified These questions are of vital importance and must be addressed in any discipline before formulating a hypothesis or designing a model about reality Both epistemological questions about the nature of temporal nested structures and practical applications of our ability to contextualize are discussed The resulting temporal observer participant perspectives reflect approaches to the concept of simultaneity from the viewpoints of philosophers logicians cyberneticists and systems theorists mathematicians psychologists medical practitioners physicists educationists economists and musicologists Although the main focus is on the cognitive sciences as constraints to observer perspectives arise primarily from this field the book will appeal to researchers of all disciplines and interested layman readers
