Time Line Therapy And The Basis Of Personality:

Time Line Therapy and the Basis of Personality Tad James, 2017-10-10 Written by Tad James and Wyatt Woodsmall

Time Line Therapy and the Basis of Personality is a compelling study of the important elements that make up a person's core personality and a detailed exploration of and introduction to how Time Line therapy works in practice Utilizing discoveries made by Richard Bandler Time Line Therapy and the Basis of Personality expands and updates our knowledge of how people actually store their memories and sheds light on the effect that the system used for memory storage has on the individual The authors contend that the concept of Time Line or the notion of time that you have stored in your mind shapes and structures your experience of the world and consequently shapes your personality Time Line therapy is therefore based on the premise that the client goes back to the first time they remember a particular problem does change work utilizing Neuro Linguistic Programming NLP to eliminate irritating behaviors or issues and if necessary goes to subsequent times when their behavior or response was a problem and undertakes further change work to resolve it Written in an informative and engaging manner Time Line Therapy and the Basis of Personality offers readers the opportunity to see how Time Line therapy works providing a clear description of how to elicit the Time Line and sharing step by step methods to subsequently help the client to release a limiting decision or trauma remove anxiety or set a future goal All of these key aspects are explained using clear language and easy to follow steps and the authors expert commentary is further complemented by examples exercises and transcripts in order to help the reader transfer the theory into effective practice In Section I the authors explain the NLP Communication Model and share their in depth analysis of the filters values beliefs attitudes decisions memories and meta programs which we subconsciously use as we process the world around us and which form the basis of our personalities Section II provides a comprehensive description of the Time Line and how it works laying down a theoretical basis for the technique before offering insight into its practice and application with a demonstrative transcript of Time Line elicitation and change work in order to illustrate the concepts explored In Section III the authors move on to carefully survey simple and complex meta programs and how they can be changed before exploring the formation evolution and changing of values in Section IV which includes a helpful exercise that gives guidance on how to elicit values from the client Exploring many interesting contexts and how personality can be positively changed to help people live happier lives Time Line Therapy and the Basis of Personality is a worthy addition to any therapist's or NLP practitioner's library and is suitable reading for anyone interested in behavioral change Sections include Section I Introduction Section II Time Line Therapy Section III Meta Programs Section IV Values Time Line Therapy and the Basis of Personality was originally published in 1988 by Meta Publications

Handbook of NLP Harry Alder, 2017-05-15 Since its Californian beginnings a generation ago Neurolinguistic Programming NLP has won world wide recognition as probably the most powerful set of tools available for improving communication thinking and problem solving Derived from the study of leading practitioners in fields as disparate as

psychotherapy and selling NLP is now used extensively in business management human resource development and sport Dr Alder's Handbook brings together in one volume the ideas and skills involved in applying NLP to achieve superior performance at both the personal and the professional level Part 1 sets out the underlying principles and introduces key concepts such as outcomes representational systems anchoring modelling and reframing together with the techniques required for putting them to work Part 2 shows how to use NLP in training selling negotiating interviewing coaching and presentation Throughout the text there are examples and exercises designed to help readers profit from rather than simply understand the procedures described Other valuable features include a glossary of terms and a sources and resources section containing an annotated reading list and details of organizations offering NLP training Anyone seeking a comprehensive guide to NLP theory and practice need look no further

The Working Classroom Matt Bromley, Andy Griffith, 2023-11-08 Schools do amazing work to support children from disadvantaged backgrounds But this book will enable them to do more Disadvantage comes in many forms but cultural poverty where some students have relative knowledge gaps compared with their more affluent peers can be addressed successfully by schools The Working Classroom explores how working class students are disadvantaged by a flawed system and what schools can do to close the gap Written by two experienced authors with a deep understanding of the challenges that poverty and low aspiration can bring and a passion for social justice The Working Classroom examines how and why we must seek systemic changes The book focuses on actions within the control of teachers and school leaders which will ensure that we create a socially just education system one that builds on the rich heritage of the working class rather than seeing their background as a weakness It offers practical ways for students and families to build on the best of working class culture whilst also empowering teachers students and parents to change the system The Working Classroom provides teachers with useful methods to improve the cultural capital of students from disadvantaged backgrounds that can be easily replicated and implemented in their own setting Backed up by practical case studies that have a proven impact in schools with high levels of deprivation this book will enable teachers to audit their current provision and encourage them to adopt new systems and practices so that they and the wider school will have a greater impact on the lives of working class students and their families Suitable for both teachers and leaders in a secondary school or sixth form college setting who seek to support social change in education and anyone in the corporate or non education world who wants to practice effective altruism or philanthropy

The Five Clues (Don't Doubt The Rainbow 1) Anthony Kessel, 2021-11-02 The first book in the series The Five Clues is a real time murder mystery thriller and family drama combining an exciting race against time with a heart rending story about a teenager learning to live with the loss of a beloved parent Walking back from her mother's grave 13 year old schoolgirl Edie Marble finds a note in a pocket of the sheepskin coat that she hasn't worn since the day a year earlier when she received the awful news of her mother's death The note is from her mother who had been looking into a corporate human rights violation and had become fearful for her life

after receiving death threats She trusts only Edie because of their special bond and Edie s intelligence and has laid a trail of clues for Edie to find that will help her to shed light on the violation and uncover the mystery around her death Through her wit and determination Edie steadily gathers evidence and negotiates the dramatic twists and turns of the story by collaborating with her friends and family to gradually unearth a sinister attempt by a pharmaceutical company to conceal their illegal development of a lethal virus As Edie s investigations progress she is introduced in parallel to the Three Principles which help her conquer various psychological stresses and support her in coming to terms with her grief Reading age 11

Making Every PE Lesson Count James Crane,2024-06-18 Written by James Crane Making Every PE Lesson Count Six principles to support great physical education teaching provides realistic and practical strategies that will help teachers make abstract ideas more concrete and meaningful in both practical and theory PE PE provides a unique opportunity for some students to flourish and become professional athletes or achieve excellent academic outcomes However if you ask any PE teacher their main aim is that all students leave school with a love of physical activity and lifelong participation in sport The benefits on physical mental and social health are undeniable The place PE holds in the curriculum is therefore fundamental to society in that it acts as a vehicle to promote resilience determination and perseverance Writing in the engaging style of the award winning Making Every Lesson Count series James Crane articulates the fundamentals of great PE teaching and shares simple and practical strategies designed to challenge students across all aspects of the subject In an age of educational quick fixes and ever moving goalposts this precise and timely book returns to the fundamental questions that all PE teachers must consider What can I do to help my students thrive in the wide world of physical education Making Every PE Lesson Count is underpinned by six pedagogical principles challenge explanation modelling practice feedback and questioning Good PE teaching is littered with all these principles not as a checklist or plan as such but to ensure that teaching is well structured and thought out This book aims to bring the evidence around effective teaching linked to the six pedagogical principles to life through the lens of a physical education teacher It focuses on all aspects of PE in secondary schools with reference to real life examples from a huge range of sports and physical activities and classroom theory James links his findings back to the subject throughout and offers reflective questions for teachers to sharpen their practice Making Every PE Lesson Count aims to synthesise the latest research on teaching and learning and link it specifically to PE There is a huge amount of evidence available for teachers and this book acts as an practical guide that will successfully bridge the gap between the world of academic research and PE teaching

Conceptual Maths Peter Mattock,2023-04-05 Written by Peter Mattock Conceptual Maths Teaching about rather than just how to do mathematics in schools aims to empower teachers to support students on a comprehensive and coherent journey through school mathematics Showcasing the best models metaphors and representations it provides excellent examples explanations and exercises that can be used across the curriculum Concepts are at the heart of the study of mathematics They are the ideas that remain

constant whenever they are encountered but which combine and build upon each other to create the mathematical universe. It is the structure of each concept that gives rise to the procedures that are used in calculation and problem solving and by learning about these structures a learner can make sense of how different processes work and use them flexibly as need demands. In his first book *Visible Maths* Peter Mattock focused on the use of representations and manipulatives as images and tools and how this can provide a window into some of these mathematical structures. His aim in *Conceptual Maths* is to go deeper beyond the procedures and to shed greater light on the structures of the subject's different concepts. The book explores how a variety of visual tools and techniques can be used in the classroom to deepen pupils' understanding of mathematical structures, concepts and operations including number, addition and subtraction, multiplication and multiples, division and factors, proportionality, functionality, measures, accuracy, probability, shape and transformation and vectors among many others. In so doing, Peter equips teachers with the confidence and practical know-how to help learners assimilate knowledge of mathematical concepts into their schema and take their learning to the next level. Containing numerous full-colour diagrams and models to illustrate the conceptual takeaways and teaching techniques discussed, *Conceptual Maths* also includes a glossary covering the key mathematical terms. Suitable for teachers of maths in primary, secondary and post-16 settings.

The Student Mindset Steve Oakes, Martin Griffin, 2019-02-28. In *The Student Mindset* A 30-item toolkit for anyone learning anything. Steve Oakes and Martin Griffin provide clear, effective and engaging tools designed to help students plan, organise and execute successful learning. Successful students find a way to succeed. They get the results they want. And they achieve this not by superior ability but by sticking to habits, routines and strategies that deliver those results. By cutting through the noise surrounding academic success and character development, bestselling authors Steve Oakes and Martin Griffin have identified the five key traits and behaviours that all students need in order to achieve their goals: vision, effort, systems, practice and attitude. VESPA. These characteristics beat cognition hands down. And in *The Student Mindset*, Steve and Martin provide a ready-made series of study strategies, approaches and tactics designed to nurture these qualities and transform your motivation, commitment and productivity. The book's thirty activities, while categorised thematically under the VESPA umbrella, have been organised around six key phases of learning so that you can recognise which phase you're in before choosing from the range of tools and techniques to help you get through it. The six co-existing key phases are: preparation, starting, study, collecting and shaping, adapting, testing and performing, flow and feedback, and dealing with the dip. At each phase you'll experience challenges and discover new ways of working, and this book's activities have been designed to help you gain control and become a better learner by sharing workload management tactics and revision strategies associated with calm, purposeful study and ultimately getting good results. These tools include a range of effective prioritisation, stress reduction, procrastination busting and mindset development approaches, all neatly packaged into this outstanding practical guide to becoming a successful and confident student. Suitable for all students. Shortlisted for the Non

Obvious Book Award Artificial Intelligence in the Primary Classroom Gemma Clark, 2024-05-28 Artificial intelligence AI has sparked a huge debate among teachers and school leaders Many questions arise about the trajectory of this new technology and where it will take us How will we differentiate between student authored work and AI generated content Will it lead to a loss of creativity and critical thinking skills What impact will it have on the dynamics of learning and teaching within schools These are all crucial topics for discussion yet AI has already become part of our reality and Gemma Clark firmly believes that embracing its potential is in our best interests In an era defined by technological advances Artificial Intelligence in the Primary Classroom stands as an indispensable resource that holds the key to transforming teaching and learning For educators burdened by bureaucratic tasks that divert precious time from actual teaching this book offers a lifeline It demonstrates how AI powered tools can alleviate administrative burdens enabling teachers to focus on the important job of nurturing young minds and to channel their energy and resources into higher impact activities such as crafting tailored learning experiences giving children personalised feedback and improving engagement From time consuming tasks like lesson planning assessment marking and automating report writing processes to facilitating content creation the book details tangible ways in which AI can streamline workflows improve teaching and restore work life balance Other examples include Spelling Lessons Save time when planning your spelling lessons by using AI to automatically generate a comprehensive list of phonemes or sounds suitable for teaching young children Mindfulness in the Classroom If you are interested in incorporating mindfulness games and activities to assist children in relaxation and focus AI can provide valuable suggestions for fostering pupil and staff wellbeing PE Lessons You don t have to be an expert in sports to teach PE Whether it s tennis football rugby or running AI can offer suggestions for activities warm ups and cool downs to use in your PE lessons Art Lessons AI can be an excellent resource for planning art lessons especially when seeking suggestions to emphasize one of the eight elements such as line shape form colour value texture space and value Maths Lessons As with spelling AI can significantly reduce the time spent on creating maths questions and simplify the process of differentiation Artificial Intelligence in the Primary Classroom is filled with practical strategies engaging activities and useful tips and tricks that will save teachers time and energy Gemma provides transferrable ideas and lesson plans with step by step instructions that can be adapted and used in secondary settings as well as primary Backed up by real world examples throughout this book empowers teachers to embrace AI as a tool in fostering enhanced learning experiences while also reclaiming invaluable time for pedagogical creativity Suitable for primary school teachers of all levels of experience The Neurophysics of Human Behavior Mark E. Furman, Fred P. Gallo, 2000-06-22 How do brain mind matter and energy interact Can we create a comprehensive model of the mind and brain their interactions and their influences Synthesizing research from neuroscience physics biology systems science information science psychology and the cognitive sciences The Neurophysics of Human Behavior advances a unified theory of *Storycraft* Jon Mayhew, Martin Griffin, 2020-01-22 Martin Griffin and Jon Mayhew s

Storycraft How to teach narrative writing is an inspiring and practical resource to support secondary school teachers in developing their students creative writing This book is not a style manual Authors Martin Griffin and Jon Mayhew think there are plenty of those about Instead it picks apart the craft of narrative writing and equips teachers with activities designed to help their students overcome the difficulties they experience when tasked with creating something from nothing Written by two fiction writers and English teachers with over forty years combined experience in education Storycraft packs in expert guidance relating to idea generation and the nature of story and provides off the peg writing prompts that teachers can immediately adopt and adapt in the classroom The book breaks down the simple components that must be in place for a narrative to work the crafting of character setting shape and structure and shares fifty one stimulating activities that will get students writing narratives regularly more creatively and with greater confidence Martin and Jon also include helpful advice in a chapter dedicated to the process of editing in which they provide activities designed to help students diagnose and improve misfiring narratives and they close the book with invaluable tips for GCSE exam preparation written directly for students and with an impending creative writing exam in mind Suitable for English teachers of students aged eleven to eighteen

The Brain Box David Hodgson,2014-02-27 The Brain Box a personal journal for each student to be their best at school boost grades improve motivation memory learning and understanding exam techniques It will help teachers prove they apply many Ofsted guidelines but will also appeal to parents By using Neuro Linguistic Programming and explaining neuroscience the authors take students on their journey from building their profile to looking at what motivates them their ambitions and their future goals Case studies anecdotes of success motivation are littered throughout and questions are posed to get students thinking about their journey

Leading Maths Peter Mattock,2023-11-09 Leading maths at any school is a unique challenge and comes with pressures not experienced in many other subject areas The relatively abstract nature of the subject content combined with the contrasting societal and parental attitudes to mathematics can complicate communication and stifle progress Most pupils and parents will recognise the importance of maths but many feel it s perfectly acceptable to be no good at it Leading maths in schools is about managing these contradictions and getting the very best out of every teacher and pupil Offering a fresh perspective and practical strategies for maths teachers and leaders at any level Leading Maths explores how to make the most of a maths leadership role and manage the daily pressures and demands that come with it Backed up by specific examples from fifteen years of experience leading maths Peter Mattock goes on to examine the more long term strategic view of maths leadership including how leaders can work with their teams to develop high quality mathematics teaching and learning for all pupils The book covers day to day issues that arise when leading maths in particular results and accountability as well as difficult situations more generally It offers useful takeaways at the end of each chapter with a summary of key points and advice from the chapter Leading Maths explores how to manage an inspection developing improvement plans and the appraisal process before touching on taking maths leadership beyond

one specific school and into system leadership In addition to Peter's insight *Leading Maths* also contains contributions from other experienced maths practitioners including Becky Lawrence, Jemma Sherwood, Rhiannon Rainbow and Dave Tushingham. Becky examines some of the specific approaches to leading primary maths whilst Jemma does the same from her perspective as a maths lead across a large multi-academy trust. Rhiannon and Dave then go on to discuss how to manage significant change from their experience of adapting curriculum and CPD during the COVID pandemic including the beginnings of their now famous book club. An essential guide for current new or aspiring maths leaders.

Test-Enhanced Learning Kristian Still, 2023-05-13. Written by Kristian Still. *Test-Enhanced Learning* A practical guide to improving academic outcomes for all students is an informative guidebook that explores the wealth of evidence behind and the benefits of test-enhanced learning, spaced retrieval practice and personalisation. Detailing the most up-to-date research into improving learning and retention, it takes us on a journey into test-enhanced learning, spaced retrieval practice, motivation, metacognition and personalisation. In so doing, the book provides a blueprint for all teachers and schools to improve the academic outcomes of their students and to achieve this in ways that improve the motivation of learners and reduce the workload for teachers. Kristian Still has been developing these ideas with his classes for many years and has achieved considerable success in terms of the direct learning gains and improved assessment grades of his pupils and the indirect gains in students' growing confidence in lessons with a wider group of pupils contributing to class and improved classroom behaviour. Consequently, students are finding greater comfort in class and experiencing less pressure or underpreparedness when a question is asked. The book is supported by the free *Remembermore* app which uses digital flashcards as an aid to deliver the learning gains of personalised spaced retrieval practice, providing teachers with insights into the effectiveness of their own teaching. It also contains a number of practical case studies from teachers using these techniques and the app to produce great results in their schools. Spaced retrieval practice is a highly effective but counter-intuitive revision technique in that it involves forgetting and relearning knowledge. *Test-Enhanced Learning* provides a blueprint for motivating students to adopt this technique in favour of seemingly easier but less effective techniques such as re-reading. Moreover, the *Remembermore* app does most of the convincing for you. It is a tool not only to provide the flashcards for retrieval practice but also to demonstrate the power of the technique to pupils. The book goes a step beyond mere retrieval practice, offering a fresh approach to test-enhanced learning, both pre-testing and post-testing, supported by real classroom-based routines that have been tried and tested by both Primary and Secondary teachers across a range of subjects. Exploring the research behind test-enhanced learning, it reveals that both pre-testing and post-testing retrieval practice offers improved memorisation and secures long-term learning. Suitable for all teachers in all settings.

VESPA Handbook Steve Oakes, Martin Griffin, 2024-08-09. The *Vespa Handbook* builds on the success of Steve and Martin's acclaimed books *The A Level Mindset* and *The GCSE Mindset* by introducing 40 new activities that will help teachers improve the grades of their students. The handbook is a perfect introduction to the *VESPA* approach as well as a

practical addition to previous resources Just like their previous books *The Vespa Handbook* will help teachers develop the five key characteristics and behaviours that students need in order to regulate their own learning vision effort systems practice and attitude When it comes to achieving academic success these characteristics are crucial The ability of students to have a vision commit the effort be organised practise and revise well and have a positive attitude and good work ethic are vital to their success The 40 activities included are set out clearly and categorised thematically under the VESPA umbrella making them easy to navigate and use in any setting Each activity can be delivered one to one to a tutor group or to a whole cohort and is designed to take fifteen to twenty minutes to complete These activities will help your students to set goals work more efficiently organise their resources and manage their workload *The Vespa Handbook* will empower learners to unlock their potential overcome obstacles and take control of their own knowledge and skills It has been written with students in mind and includes spaces for them to record and reflect on their answers and organise their thought process The book offers a comprehensive toolkit of study techniques strategies and approaches that can be applied for effective learning planning organization and execution Steve and Martin share practical advice and valuable insights for teachers looking to improve their students resilience and ambition based on their combined 40 plus years of experience in teaching and coaching Suitable for teachers tutors and parents who want to boost academic outcomes in 14 18 year olds and equip them with powerful tools and techniques in preparation for further education and employment

The Buzz David Hodgson, 2015-08-25 If you are considering higher education or wondering what future career would suit you *The Buzz* is packed with techniques and advice to point you in the right direction By blending NLP and personality type theory David Hodgson helps people understand themselves how they learn and what motivates them in order to discover their potential and what they really want from life The brain is an amazing thing It is the most complicated known thing in the universe Sometimes it helps make us believe we can do amazing things great inventions acts of incredible bravery when we are at our best It is better to understand how our brain works and control it for the life we really want rather than stick to habits that hinder us Most people use about 10 per cent of their potential With *The Buzz* you can access the other 90 per cent How much of it do you dare use *The Buzz* has been developed with and used by thousands of young people It works They have been surprised at how easy it can be to start living a great life discover new strengths and skills dream dreams plan to make them happen and enjoy feeling great while moving in a positive direction that feels right We can build a great life around our strengths the things we enjoy and are good at *The Buzz* also shows us simple ways in which we can alter our behaviour to succeed in the different situations and challenges we face Young people consistently say they want the same three things from life to be happy confident and successful *The Buzz* shows everyone how to achieve all of these through a fantastic and illuminating journey of self discovery Complex theories and approaches are clearly presented in an easy to understand form David Hodgson presents a unique and highly effective method of realising potential and making the best choices for you Advice includes tips on how to get out of an

argument choosing presents for people the power of laughter talking to people you fancy improving your sports performance how to relax and reduce stress building self esteem employability skills learning and thinking better choosing a course or career and understanding your personality

Make Your Own Rainbow Leonie Briggs, 2025-04-28 Why not spend your day creating your very own rainbow Looking to add some STEAM to your day but unsure of the best way to do it Dive into this creative STEAM book to spark young people's interest in a simple safe and cost effective way Leonie provides a colourful approach to teaching tricky subjects ranging from colour and chemical reactions to photosynthesis with many more in between *Make Your Own Rainbow* is a compilation of fun easy creative and effective activities for teachers of both primary and secondary school children ideas that parents and carers can also enjoy at home The aim of this book is to inspire young people to discover interact with and enjoy STEAM subjects and in doing so to help them develop a life long love of these topics *Make Your Own Rainbow* offers a fresh perspective on teaching STEAM with a real emphasis on memorable learning Leonie aims to make STEAM accessible to all through a range of tasks resources and activities inspired by the colours of the rainbow Examples include Rainbow Trail Are you able to create a rainbow from nature in the home or classroom Bubbles Understand the colour and structure of bubbles in this mesmerising experiment Rainbow Indicator Investigate if certain household objects are acid or alkali Plant Growth Ever wanted to know what the best colour light is for plant growth *Make Your Own Rainbow* Experiment with white light to make your own rainbow This book is for those who want to develop their knowledge of STEAM subjects with minimum fuss but maximum results *Making Your Own Rainbow* will ignite a spark to really encourage educators parents carers and young people to get involved with enjoy and take further steps in STEAM Suitable for teachers community group leaders parents and carers with an interest in STEAM subjects

Teach Like You Imagined It Kevin Lister, 2019-09-17 Kevin Lister's *Teach Like You Imagined It* Finding the right balance shares a wealth of tools ideas and encouragement to help teachers manage the conflicting pressures of teaching and become the educators they imagined Teaching is an incredible profession but it also comes with a potentially toxic workload You do not have to put up with burn out however and one way to avoid it is to return to how you imagined teaching to be in the first place Before you became a teacher you pictured yourself as a teacher in your imagination you almost certainly saw yourself as happy efficient and able to manage your worklife balance effectively Yet chances are that the reality of teaching is a little different and it is this disconnect that can give rise to stress anxiety and frustration But what if you could use simple strategies to get a handle on your schedule and take control of your workload Covering lesson planning behaviour management the streamlining of marking and getting the best out of CPD Kevin Lister has drawn on his background in engineering to fill this book with trusted techniques and savvy suggestions to help you maximise your productivity and teach like you imagined it Each chapter examines a different aspect of the day to day reality of teaching and suggests alternative practical ways to look at or approach common tasks Throughout the book Kevin touches on topics such as time management prioritisation educational

research leadership psychology and other diverse concepts that his personal experiences and education have led him to explore After each area of discussion there are prompts for action where Kevin asks you to reflect on your working habits question your practices and decide what you will do in response Suitable for both new and experienced teachers looking to boost their day to day efficiency and find the right balance **Restorative Practice at Work** Lesley Parkinson,2023-08-31

Restorative practice is emerging in healthcare settings and systems as a highly effective means of improving relationships and enabling positive change It consists of a set of theories principles skills and processes that shape our thinking around the way we interact with others When restorative practice is adopted consistently within and between teams it becomes the way we do things round here a set of restorative practice habits that we all recognise use and refer to Restorative Practice at Work identifies a set of six complementary habits which will help to change and improve everyday communications conversations and accountability in healthcare These habits demonstrate how restorative practice can help to improve day to day communications in the form of behaviour language and conversations ease some of the daily challenges faced in healthcare and foster more effective working relationships potentially leading to improvements in patient care and patient safety They are Navigating the Mountain Looking beyond challenging behaviour Recognising Needs Noticing and responding to needs and unmet needs Engaging Brains and Behaviours Informing our responses to outward behaviours Remembering the Relational Window Solving problems together Running Circle Meetings An alternative meeting process Drawing on Restorative Enquiry Processing incidents and problems Lesley firmly believes that restorative practice habits can ease the current pressures on the health service by enabling better relationships improved communication and a focus on positive mental health It can also be part of key solutions staff engagement and retention team cohesion patient safety and care culture change and improvement The book offers practical and engaging takeaways to help you get started with restorative practice and includes reflective learning opportunities and transferrable lessons supported by evidence from case studies and contributions from experienced healthcare professionals The aim of Restorative Practice at Work is to make a notable positive difference to your daily workplace experience whether you are a public facing receptionist member of a clinical team administrator manager senior leader cleaner or consultant or indeed if you have any other role in healthcare This book will challenge and support your knowledge understanding and thinking around restorative practice as a workplace philosophy in healthcare Suitable for NHS leaders managers clinicians and staff and those in other healthcare settings such as researchers academics HR professionals and educators **Love Tutoring** Julia Silver,2024-09-06

Written by former school leader Julia Silver Love Tutoring Be the tutor your student needs is an essential guide to professional development for all tutors Based on her Foundations of Effective Tutoring course Julia shares an enthusiastic and enabling vision of tutoring as a burgeoning space within the educational landscape At a time when teacher retention and pupil attendance are at an all time low tutoring provides a gentler more person centred and holistic approach to teaching and learning Once considered a Plan B option

tutoring is fast becoming a legitimate career choice The rollout of the UK government's National Tutoring Programme has brought tutoring into the spotlight Previously considered shadow schooling over the last decade a quarter of all 11-16 year olds have received private tuition in England and Wales rising to 42% in London But for tutoring to take its place in the future of education and become an affordable option for all our students we need more and better qualified tutors Combining theory and practice this book provides tutors with a solid grounding in the pedagogy of tutoring Julia takes the big ideas from evidence based practice in teaching and learning today and makes them relevant and accessible to the ways tutors work Backed up by real life examples and interviews with professional tutors this book offers a broad insight into the tutoring profession and explores the different ways to make tutoring a career that you love Love Tutoring is an invitation a provocation and a call to action This book goes right to the heart of the tutoring relationship and will give every tutor a roadmap for becoming the tutor their student needs Suitable for tutors of all ages subjects and levels of expertise as well as interested parents agencies schools or other organisations who employ tutors

Activate James Mannion, Louise Stoll, Karen Spence-Thomas, Greg Ross, 2023-09-21 It's widely recognised that self regulated learners are more effective learners The Education Endowment Foundation EEF suggests that metacognition and self regulation are among the most important practices a school can focus on providing very high impact for very low cost based on extensive evidence EEF 2022 However teachers and leaders are often unsure what these terms mean or what they look like in practice This resource enables teachers and leaders to activate pupils to become the drivers of their own learning Comprising six sets of resource cards and a clear and detailed facilitator guide along with an extensive bibliography and additional downloadable materials Activate has been designed to support time pressed teachers and leaders to understand the theory and practice of self regulated learning in an accessible way Working through the activities will enable teachers and leaders to realise the potential of these powerful ideas in working with pupils while helping them to regulate their own learning Learning conversations enable educators to make meaning together connecting existing knowledge and experience with research evidence to create new ideas for how to improve their practice The Activate cards are designed to facilitate learning conversations and associated actions to help teachers leaders and pupils become more confident proactive self regulated learners The cards are grouped into two sets Research cards and Professional Learning and Leadership Learning cards The Research cards cover the key concepts and characteristics of self regulated learning offering a range of tried and tested techniques and strategies that teachers can put into practice in their own context The Professional Learning and Leadership Learning cards and associated Scenario cards contain stimulating activities designed to help teachers and leaders promote and model self regulated learning The resource has been developed by specialists at the UCL Centre for Educational Leadership in conjunction with colleagues from the global Cognita schools system

Adopting the Track of Term: An Emotional Symphony within **Time Line Therapy And The Basis Of Personality**

In some sort of eaten by displays and the ceaseless chatter of fast conversation, the melodic beauty and psychological symphony created by the written word frequently disappear into the backdrop, eclipsed by the relentless sound and disruptions that permeate our lives. Nevertheless, located within the pages of **Time Line Therapy And The Basis Of Personality** a stunning literary value brimming with fresh emotions, lies an immersive symphony waiting to be embraced. Crafted by a masterful composer of language, this captivating masterpiece conducts viewers on a mental journey, well unraveling the concealed tunes and profound affect resonating within each cautiously crafted phrase. Within the depths of this poignant evaluation, we shall examine the book is main harmonies, analyze their enthralling writing style, and submit ourselves to the profound resonance that echoes in the depths of readers souls.
