The papers for this Research Topic should focus on the use of LSAMP activities programs and collaborations to develop pathways to success and graduation of STEM majors from minority groups that are underrepresented in STEM. These pathways can include any segment from pre college through graduate school. Areas of special interest include mentoring research experiences transitions between levels and novel approaches for retention. The studies should be research based and rigorous. They can be pure research studies curriculum and design or literature reviews but they must be at a cutting edge level and be subject to detailed review and assessment.
