History Education and Historical Inquiry Bob Bain,Arthur Chapman,Alison Kitson,Tamara Shreiner,2024-04-01 Inquiry plays a vital role in history as a discipline which constructs knowledge about the past and it is a vital organizing principle in history education in many countries around the world Inquiry is also much debated however and although it has prominent contemporary advocates around the world it also has prominent critics in education studies This volume in the International Review of History Education explores the role of historical inquiry in history curricula and in history classrooms and addresses a series of linked questions including the following What does historical inquiry mean in history classrooms What forms does classroom based historical inquiry take and to what extent is it understood in differing ways in different contexts What do we know about the affordances and constraints associated with inquiry based learning in history what is the evidence of the effectiveness or ineffectiveness of inquiry based historical learning We address these questions in the volume by presenting

seventeen papers from eight different international contexts exploring historical inquiry that will be of interest both to history teachers curriculum designers and history education researchers seven papers from England three from the US two from Sweden and one each from Argentina Australia Belgium Canada and Singapore The volume adds to our knowledge about teachers thinking about inquiry and teachers inquiry practices It adds to our knowledge about the impact and value of inquiry in developing children s historical learning It also explores the challenges that implementing inquiry can present for history teachers and provides support for implementation and examples of successful practice

ENDORSEMENT A wonderful overview of the global story of historical inquiry Canvassing everything from finding opportunities to teach history through all levels of education through to the complexities of navigating different views on the past inside and outside of the classroom History Education and Historical Inquiry provides a practical and empowering approach for educators around the world Recommended reading for anyone who wants to feel the support of educators from around the world in strengthening the place of inquiry in complex times Marnie Hughes Warrington University of South Australia

An Accidental History of Canada Megan J. Davies, Geoffrey L. Hudson, 2024-07-15 Although Canadian history has no shortage of stories about disasters and accidents the phenomena of risk upset and misfortune have been largely overlooked by historians Disasters get their due but not so the smaller scale accident where fate is more intimate Yet such events often have a vivid afterlife in the communities where they happen and the way in which they are explained and remembered has significant social cultural and political meaning *An Accidental History of Canada* brings together original studies of an intriguing range of accidents stretching from the 1630s to the 1970s These include workplace domestic childhood and leisure accidents in colonial Indigenous rural and urban settings Whether arising from colonial power relations urban dangers perils in resource extraction or hazardous recreations most accidents occur within circumstances of vulnerability and reveal precarity and inequities not otherwise apparent Contributors to this volume are alert to the intersections of the settler agenda and the elevation of risk that it brings Indigenous and settler ways of understanding accidents are juxtaposed with chapters exploring the links between accidents and the rise of the modern state *An Accidental History of Canada* makes plain that whether they are interpreted as an intervention by providence a miscalculation an inevitability or the result of observable risk accidents and our responses to them reveal shared values

Building New Nuclear Great Britain. Parliament. House of Commons. Energy and Climate Change Committee, 2013 Failure to build a new fleet of nuclear power stations in the UK could make it much more expensive to meet our climate change targets and Ministers must urgently develop a back up energy strategy The nuclear industry has outlined plans that would deliver 16GW new nuclear power stations by 2025 Although the Government and industry have learnt some important lessons from this process there are still a number of obstacles which could delay new build projects in

the UK The Committee supports the Government's use of Contracts for Difference CfDs to help make new nuclear power stations easier to finance but are concerned at the lack of transparency around the price negotiations The new contracts must provide value for money for consumers and should not be offered at a price that is higher than other low carbon sources of energy such as offshore wind which is hoped to be around 100 MWh by 2020 Public attitudes have an important role to play in projects to build new nuclear power stations The Committee is concerned that local communities might not be able to take part in planning consultations on an equal footing with the project developers The report recommends that the Government should consider providing more support to local community groups so that they can engage better with the planning process The Government has plans to allow local authorities hosting renewable energy projects to retain business rates The report argues that this scheme should be extended to new nuclear projects too
