ABSOLUTE ETHICS and COSMIC MORALITY Frank Luger, 2019-07-23 This is the companion volume to *Absolute Relativity and the Relativity of the Absolute*. The human relevance of the Absolute is Ethics which is manifest by cosmic morality via cosmodynamics: the modus operandi of the Absolute. Human morality ought to mirror cosmic morality for optimal alignment with the Absolute for which a new set of guidelines, the Thirty Commandments, were introduced together with the basic propositions of a new ideology called Mirism from the Russian Mir meaning both world and peace. It was suggested that the solution to the external problems of Mankind is progressive colonization of outer space with the strict proviso of not exporting our Evil and contaminating the Cosmos thereby while the internal solution is moral maturation. Once maturation will have reached the level of integrity then Mankind will have earned evolution into the next phase, the Cosmic Era.

LEBENSWERT Frank Luger, 2019-07-23 *Lebenswert* is 3 books in one: the already published and available *Weltwesen*, *Weltheil*, and *Judenwelt*. The first book examined what's beyond the limits of the Universe and discussed the nature, structure, function, and relevance of the Absolute. The second book is concerned with the human relevance of the Absolute and that is cosmic morality: various optimal function mechanisms under the common term optimal efficiency. Morality is discussed as a subset of Absolute Ethics via cosmodynamics: the modus operandi of the Absolute. The third book is specifically concerned with the Jewish relevance of the Absolute and it is suggested that Jews may still fulfill their original mission of becoming light unto the nations and serving God by teaching ethical monotheism and righteousness. With such assistance, Man can grow into Cosmic Man, attain moral maturity, and enter the Cosmic Era in peace and harmony with Nature. *Blockchain and Modern Governance*

Manuel Quelhas Poças, 2025-03-21 This book shows how blockchain technology can transform the foundational systems of our society. Written by an industry expert with a background in political science, international relations, law, management, and technology, the book merges social, political, economic, and legal theories with technological expertise to present a groundbreaking framework for using blockchain in governance and public organizations. Imagine a country as a digital space where humans and resources interact seamlessly. This book explores such possibilities, illustrating how blockchain can redefine governance beyond physical borders. Addressing the urgent need for adaptive solutions in a globally interconnected world, the author provides a strategic roadmap for implementing blockchain in public governance. With clear explanations, real-world examples, and practical applications, this book will inspire and guide professionals and policy makers seeking to utilize blockchain technology for innovative governance solutions. *Reading Ruse*

The Algorithm of Creation Nicholas Hagger, 2023-10-27 2023 SMN Book Prize Winner Significant Contribution to its Field The Algorithm of Creation is the last of Nicholas Hagger's quartet on the unity of the universe and humankind and follows The Universe and the Light 1993 The One and the Many 1999 and The New Philosophy of Universalism 2009 It offers an algebraic formula

written out for him by Junzaburo Nishiwaki Japan's T S Eliot in Tokyo in October 1965 that sums up the wisdom of the East A 0 Based on ancient Chinese thinking yin dark yang light the Tao it shows all opposites reconciled in the underlying unity of the One Void whose emptiness is also a fullness During a dinner at a conference of leading scientists at Jesus College Cambridge in September 1992 watched by Nobel physics prizewinner Roger Penrose Hagger reversed the formula to 0 A A when he wrote down the maths for his view of the origin and creation of the universe and showed the first two particles emerging from the Void's singularity influenced by the 1992 discovery of ripples in the cosmic microwave background radiation and the Presocratic Anaximander of Miletus In this work Hagger shows how this algebraic formula has worked as a universal algorithm 0 A A 0 Its many variations have acted as rules that have controlled the creation and development of the expanding universe its evolution and the rise of human history religion and science and its ultimate fate The formula is behind many of Hagger's works and his application of this algorithm to all human knowledge of the universe and all disciplines takes him to a first ever Theory of Everything which is set out at the end the algorithm of Creation containing 100 mathematical symbols reflecting all the variations that can be summed up in the above algorithm This startling achievement has been made possible by his Universalist cross disciplinary approach which focuses on the fundamental oneness of the universe and humankind and the unitive vision
