Time and Clocks Sir Henry H. Cunynghame,2017-07-06 When we read the works of Homer or Virgil or Plato or turn to the later productions of Dante of Shakespeare of Milton and the host of writers and poets who have done so much to instruct and amuse us and to make our lives good and agreeable we are apt to look with some disappointment upon present times And when we turn to the field of art and compare Greek statues and Gothic or Renaissance architecture with our modern efforts we must feel bound to admit our inferiority to our ancestors And this leads us perhaps to question whether our age is the equal of those which have gone before or whether the human intellect is not on the decline This feeling however proceeds from a failure to remember that each age of the world has its peculiar points of strength as well as of weakness During one period that self denying patriotism and zeal for the common good will be developing which² is necessary for the formation of society During another the study of the principles of morality and religion will be in the ascendant During another the arts will take the lead during another poetry tragedy and lyric poetry and prose will be cultivated during another music will take its turn and out of rude peasant songs will evolve the harmony of the opera To our age is reserved the glory of being easily the foremost in scientific discovery Determinations of Aerodynamic-drag Parameters of Small Irregular Objects by Means of Drop Tests ,1961 During the 1955 and 1957 Test Operations at the Nevada Test Site NTS masses and velocities were

determined for more than 20 000 objects such as glass fragments from windows stones steel fragments and spheres which were energized by blast winds resulting from nuclear explosions Following the field tests a mathematical model was devised to help explain quantitatively the experimental results This model required certain aerodynamic drag information in regard to the displaced objects It was the purpose of the study outlined in this report to determine the necessary drag properties for the objects by means of drop tests In addition to the objects mentioned above small laboratory animals mice rats guinea pigs and rabbits were used in the drop tests **Measurement, Instrumentation and Sensors** Mr. Rohit Manglik,2024-01-16

Imaginings of Time in Lydgate and Hoccleve's Verse Karen Elaine Smyth, 2016-05-13 Using empirical research to

explore medieval writers imaginings of time this study presents a new morphology by which to study narratives of time in fifteenth century literary culture focusing on poems of John Lydgate and Thomas Hoccleve Karen Smyth begins with an overview of medieval time keeping devices and considers collective and individual attitudes and perceptions of time She then examines a range of Middle English authors appropriations and innovations in relation to such perceptions identifying competitions of tradition and innovation allowing for an interrogation of commonly accepted medieval theories of time An empirically based morphology emerges and is used to examine narratives of time in Lydgate and Hoccleve s work Through a series of close readings of selected short poems and Lydgate s Troy Book Fall of Princes and Siege of Thebes and of Hoccleve s Regiments of Princes and Series Karen Smyth looks at expressions of time and examples of the authors negotiation of time consciousness illustrating how both poets manipulate a range of cultural narratives of time in order to create multiple and sometimes competing temporalities within a single poem Smyth simultaneously draws attention to Lydgate s and Hoccleve s underestimated artistic skills and lays out a means to re evaluate medieval cultural attitudes towards time
