proceedings which was summarized into the following four topics Translation and Interpreting Theory and Practice Translation and Cross cultural Studies Evaluation of Translation and Interpretation and Studies on the Teaching of Translation By no means is it difficult to find some interesting and thought provoking papers under each topic For example concerning Translation and Interpreting Theory and Practice To Translate or not to Translate That is the Question On Metaphor Translation in Chinese Political works by Dong Yu explains that in judging whether or not a Chinese metaphor can be translated into English an indispensable step is to decide whether or not the two cultural connotations can be connected But this can easily be influenced by subjective factors Yu has suggested some ways in which subjective factors could be controlled to some extent so that the translator could be more confident in his or her decision He has also suggested three steps The first step is to assume that the cultural connotation of the Chinese metaphor can be connected with that of its English version For example the metaphor in could be translated as rain or shine The second step is to find out whether or not this translated version is acceptable both linguistically and culturally in English The third step is to consider the systematicity of the metaphor in regard with the context in both the source and target texts This involves a process of recontextualization When it comes to Translation and Cross cultural Studies On Translation of the English Guide interpreter from the Perspective of Intercultural Communication by Fengxia Liua and Xiaoning Bi points out that inbound tourism serves as a window through which foreign tourists get to know China so the interaction between the guide interpreters and foreign tourists are the typical activity of cultural communication Foreign language speaking guides are usually regarded as people to people ambassadors or cultural ambassadors who have played an essential role in the international tourist industry Therefore they argue that it is extremely important for tourist guides to cultivate their cross cultural communication awareness enhance their overall communicative competence observe and distinguish east and west differences with multi dimensional perspective transcend cultural barriers and learn to use translation skills Studies on the Teaching of Translation is another interesting topic that has attracted enormous attention such as Business Translation Teaching from the Perspective of Metaphors by Dandan Li which explores application of conceptual metaphor theory in the translation process of business lexicons business discourse and business English culture so as to provide a new perspective in business English pedagogy Another study entitled Cognitive Studies in Translation by Xin Huang analyzes the cognitive studies of translation interpreting processes over the past three decades with focus on the issues examined the findings reached as well as the recent development She explains that cognitive studies of translation process examine the translation competence on line translation behaviors such as how the eye gazes and how the words are typed and the brain activities when doing translation Special interests are paid to the working memory problem solving the executive function and some linguistic relative factors such as text difficulty Over the past thirty years the interest in the field has been gaining considerable momentum and increasing issues have been involved Finally she concludes that with the advancement of technologies and interdisciplinary

approaches the black box the previously unforeseeable cognitive activities of how human process translation can be unfolded Considering the importance of integrating theory with practice the proceedings are therefore compiled in such a way as to be balanced and inclusive in the hope of summarizing current accomplishments as well as providing certain insights for teaching and further research in the field of translation and interpretation studies Correspondences and Contrasts in Foreign Language Pedagogy and Translation Studies Katarzyna Piątkowska, Ewa Kościółkowska-Okońska, 2013-05-24 The book constitutes a selection of 18 papers on foreign language pedagogy 11 papers and translation studies 9 papers The first part of the book is devoted to foreign language pedagogy The articles in this part focus on issues such as English as lingua franca foreign language teacher training the role of individual learner differences in language learning and teaching especially with respect to strategies of language learning as well as psychological and socioaffective factors The part focusing on translation studies comprises articles devoted to a variety of topics It places a wide range of readings within the context of varying translation domains such as translation competence literary translation translation strategies translation teaching including strategies of dictionary use and translator training The combination of the above aspects intends to underline the truly interdisciplinary nature of translation Intercultural Competence Past, Present and Future María Dolores López-Jiménez, Jorge Sánchez-Torres, 2021-01-08 This book explores the benefits of teaching reflection upon one's own culture to develop intercultural competence and looks into the relationship between the proficiency level of the second language and the target culture It introduces new debates on the concept of critical cultural awareness in intercultural learning and teaching for example the indiscriminate use of terminologies related to the idea of intercultural encounters Also it provides insight into the relationship between language and culture using a new tool such as the Autobiography of Intercultural Encounters through Visual Media The presentation of different approaches tools barriers educational and cultural realities online intercultural exchange projects and concepts such as motivation attitudes stereotyping otherization and critical cultural awareness makes this book an excellent instrument not only for teachers but also for researchers policy makers and private and public institutions that want to explore culture and interculturality and to promote an intercultural competence and global citizenship among its learners users clients and or an interculturally oriented language education
