Legends of the Modern Didier Maleuvre,2019-11-28 What made art modern What is modern art The Legends of the Modern demystifies the ideas and legends that have shaped our appreciation of modern art and literature Beginning with an examination of the early modern artists Shakespeare Michelangelo and Cervantes Didier Maleuvre demonstrates how many of the foundational works of modern culture were born not from the legendry of expressive freedom originality creativity subversion or spiritual profundity but out of unease with these ideas This ambivalence toward the modern has lain at the heart of artistic modernity from the late Renaissance onward and the arts have since then shown both exhilaration and disappointment with their own creative power The Legends of the Modern lays bare the many contradictions that pull at the fabric of modernity and demonstrates that modern art s dissatisfaction with modernity is in fact a vital facet of this cultural period

Attentional Engines William P. Seeley,2020 Attentional Engines explores the potential of the growing field of cognitive sciences and aesthetics Along the way it introduces readers to the philosophy of art and evaluates what psychology and neuroscience can and cannot tell us about the nature and value of artworks Seeley utilizes a case study approach to explain how research in perceptual psychology and the neuroscience of attention can contribute to our everyday understanding of art

Embodying Art Chiara Cappelletto,2022-11-08 In recent years neuroscientists have made ambitious attempts to explain artistic processes and spectatorship through brain imaging techniques But can brain science really unravel the workings of art Is the brain in fact the site of aesthetic appreciation Embodying Art recasts the relationship between neuroscience and aesthetics and calls for shifting the focus of inquiry from the brain itself to personal experience in the world Chiara Cappelletto presents close readings of neuroscientific and philosophical scholarship as well as artworks and art criticism identifying their epistemological premises and theoretical consequences She critiques neuroaesthetic reductionism and its assumptions about a mind body divide arguing that the brain is embodied and embedded in affective cultural and historical milieus Cappelletto considers understandings of the human brain encompassing scientific philosophical and visual and performance arts discourses She examines how neuroaesthetics has constructed its field of study exploring the ways digital renderings and scientific data have been used to produce the brain as a cultural and visual object Tracing the intertwined histories of brain science and aesthetic theory Embodying Art offers a strikingly original and profound philosophical account of the human brain as a living artifact
