Typology From The Differentiable Viewpoint:

Creole Languages and Linguistic Typology Parth Bhatt, Tonjes Veenstra, 2013-12-15 It is generally assumed that Creole languages form a separate category from the rest of the world's languages. The papers in this volume written by internationally renowned scholars in the field of Creole studies seek to explore more deeply this commonly held assumption by comparing the linguistic properties of specific Creole languages to each other and also to non-Creole languages. Using a variety of methodological and analytical approaches, the contributions to this volume show that the linguistic classification of Creole languages continues to be a topic of intense debate that requires the re-examination of the premises of linguistic typology. What is the linguistic motivation for considering that languages are related or unrelated? How and why do common linguistic properties arise? Are Creoles indeed exceptional? This volume examines these questions and provides a strong foundation for continued research into the phonological, morphological, syntactic and semantic features found in Creole languages. Most of these articles were previously published in the *Journal of Pidgin and Creole Languages* 26:1 2011. The article by Jeff Good was previously published in the *Journal of Pidgin and Creole Languages* 27:1 2012. Contemporary Management: Issues and Viewpoints Joseph William McGuire, 1974 Responses to Governance John C. Dixon, 2003-04-30 Dixon and his colleagues provide a behaviorist perspective on governance. Their concern is with the governed's responses to those who seek to govern them: their governors and the counter-responses that they induce from the governors. They take as axiomatic that the governed are not a homogenized and amorphous mass; rather, they are a dichotomy reduced to what Carlyle called a dead logic formula. For the purpose of this analysis, they leave begging all the relevant questions. The governed are not a disembodied abstraction; they are an aggregate of men and women of flesh and blood. In a corporation, they are corporate directors whose governors are those who own or perhaps have a stake in that corporation; corporate managers whose governors are the corporate directors; corporate employees whose governors are the corporate managers. In a society, they are individuals or groups of individuals, perhaps in corporations located within its jurisdiction whose governors are the members of societal, political and administrative elites. At the global level, they are individuals or groups of individuals in countries and corporations within the jurisdiction of international governmental organizations and international regimes whose governors are those who seek to control those global governance mechanisms. Whether the governed's response to their governors' processes is one of compliance or antagonism, and how the governors' response to any antagonism has implications for governance capacity, good governance and governability. A provocative study that will be of interest to students and scholars of political theory, international relations and management and organizational theory as well as those who are concerned with issues of governance at all levels: corporate, societal and global. *Theory of Action (Routledge Revivals)* Richard Münch, 2010-12-01 Modern sociology owes its existence and the progress it has made to the integration of differing kinds of orientations. In this work, first published 1987, Professor Richard Münch sets out to reformulate the theory of

action a notion central to sociology and one to which all schools of thought within sociology have contributed He gives an exposition of the voluntaristic theory of action as found in Talcott Parson s work reconstructing and extending Parson s theory from the perspective of the present day level of development In this way he both integrates opposing orientations to action theory and presents the voluntaristic theory of action in a readable and teachable form

Romance Languages and Modern Linguistic Theory Paul Hirschbühler,E.F.K. Koerner,1992-01-01 The contributions in this volume are selected and revised papers from the 20th Linguistic Symposium on Romance Languages held in Ottawa in 1990 They reflect the state of Romance linguistics carried out within a broadly defined generative framework

Local Self-Governance in Antiquity and in the Global South Dominique Krüger,Christoph Mohamad-Klotzbach,Rene Pfeilschifter,2022-12-31 The nucleus of society is situated at the local level in the village the neighborhood the city district This is where a community first develops collective rules that are intended to ensure its continued existence The contributors look at such configurations in geographical areas and time periods that lie outside of the modern Western world with its particular development of society and statehood in Antiquity and in the Global South of the present Here states tend to be weak with obvious challenges and opportunities for local communities How does governance in this context work Scholars from various disciplines Classics Theology Political Science Sociology Social Anthropology Human Geography Sinology analyze different kinds of local arrangements in case studies and

they do so with a comparative approach The sixteen papers examine the scope and spatial contingency of forms of self governance its legitimization and the collective identity of the groups behind them the relations to different levels of state governance as well as to other local groups Overall this volume makes an interdisciplinary contribution to a better understanding of fundamental elements of local governance and statehood *Sound* Michel Chion, 2015-12-17 First published in French in 1998 revised in 2010 and appearing here in English for the first time Michel Chion's *Sound* addresses the philosophical interpretive and practical questions that inform our encounters with sound Chion considers how cultural institutions privilege some sounds above others and how spurious distinctions between noise and sound guide the ways we hear and value certain sounds He critiques the tenacious tendency to understand sounds in relation to their sources and advocates acousmatic listening listening without visual access to a sound's cause to disentangle ourselves from auditory habits and prejudices Yet sound can no more be reduced to mere perceptual phenomena than encapsulated in the sciences of acoustics and physiology As Chion reminds us and explores in depth a wide range of linguistic sensory cultural institutional and media and technologically specific factors interact with and shape sonic experiences Interrogating these interactions Chion stimulates us to think about how we might open our ears to new sounds become more nuanced and informed listeners and more fully understand the links between how we hear and what we do
