Smart Things Mike Kuniavsky, 2010-09-14 The world of smart shoes appliances and phones is already here but the practice of user experience UX design for ubiquitous computing is still relatively new Design companies like IDEO and frogdesign are regularly asked to design products that unify software interaction device design and service design which are all the key components of ubiquitous computing UX and practicing designers need a way to tackle practical challenges of design Theory is not enough for them luckily the industry is now mature enough to have tried and tested best practices and case studies from the field Smart Things presents a problem solving approach to addressing designers needs and concentrates on process rather than technological detail to keep from being quickly outdated It pays close attention to the capabilities and limitations of the medium in question and discusses the tradeoffs and challenges of design in a commercial environment Divided into two sections frameworks and techniques the book discusses broad design methods and case studies that reflect key aspects of these approaches The book then presents a set of techniques highly valuable to a practicing designer It is intentionally not a comprehensive tutorial of user centered design as that is covered in many other books but it is a handful of techniques useful when designing ubiquitous computing user experiences In short Smart Things gives its readers both the why of this kind of design and the how in well defined chunks Tackles design of products in the post Web world where computers no longer have to be monolithic expensive general purpose devices Features broad frameworks and processes practical advice to help approach specifics and techniques for the unique design challenges Presents case studies that describe in detail how others have solved problems managed trade offs and met successes

Interaction Design for 3D User Interfaces Francisco R. Ortega, Fatemeh Abyarjoo, Armando Barreto, Naphtali Rishé, Malek Adjouadi, 2016-01-06 This book addresses the new interaction modalities that are becoming possible with new devices by looking at user interfaces from an input perspective It deals with modern input devices and user interaction and design covering in depth theory advanced topics for noise reduction using Kalman Filters a case study and multiple chapters showing hands on approaches to relevant technology including modern devices such as the Leap Motion Xbox One Kinect inertial measurement units and multi touch technology It also discusses theories behind interaction and navigation past and current techniques and practical topics about input devices

Mobile and Ubiquitous Systems: Computing, Networking, and Services Kan Zheng, Mo Li, Hungbo Jiang, 2013-08-15 This book constitutes the thoroughly refereed post conference proceedings of the 9th International ICST Conference on Mobile and Ubiquitous Systems Computing Networking and Services MobiQuitous 2012 held in Beijing China Denmark in December 2012 The revised full papers presented were carefully reviewed and selected

Smart Digital Signage Johan Hallen,Kajsa Sörlien,2016-09-07 Bachelor Thesis from the year 2016 in the subject Communications Public Relations Advertising Marketing Social Media grade A 5 0 Stockholm University Department of Computer and Systems Sciences course Bachelor thesis in computer and systems sciences IB015F 15 hec language English abstract Within the topic of Internet of Things IoT smart objects are a key concept The concept of making everyday objects smart Smart objects that can understand and react to their environment creating a smart environment However with the fast technological development leading to more smart environments in the physical world not much research has been done on how this will influence users from an Environmental Psychology perspective Earlier research on smart technologies has shown that users who received real time feedback on their behavior got their attitude influenced and also changed their behavior creating an interest to further explore the possibilities and impact of this technology Marketing researchers have done Environmental Psychology studies for a long time to examine how other environmental stimuli light music scents and digital signage etc influence people s perception emotions and behaviors using the Mehrabian Russell model to build stimulating environments also known as atmospherics

This study aims to solve the lack of research on how the emerging smart environments will influence consumers. With the following research question: How will a retail example of a smart environment influence consumers from an environmental psychology perspective? The research strategy was a scenario-based case study where the participants got to experience a retail scenario with a simulated smart environment. The data collection method was in-depth semi-structured interviews that was conducted on 10 participants randomly selected. Thereafter, a thematic analysis was conducted as a data analysis method. Data extracts were theory-driven coded and categorized under the environmental psychology themes.

Planning and Designing Smart Cities in Developing Nations Zoughbi, Saleem Gregory, 2022-02-18

As smart cities are rapidly developing, it is vital that they are built on a combination of support and active participation of self-decisive, independent, and aware citizens by ensuring strong human capital, social capital, and information and communications technology infrastructure. Due to this evolution across the globe, it is critical to examine how others are working to create smarter cities in order to learn and revolutionize the way cities are planned and executed.

Planning and Designing Smart Cities in Developing Nations explores smart city implementation in developing countries by highlighting the challenges and opportunities of smart cities and showcasing various developments and accomplishments, and presents a framework to implement strategic plans for smart development. Covering topics such as smart technologies and social capital, it is ideal for policymakers, economic and development professionals, city planners and designers, government officials, academicians, professors, and students.
