Parnell,2013-01-15 Balancing theory with practice this fully updated fourth edition of John A Parnell s acclaimed text continues to provide detailed accessible coverage of the strategic management field Taking a global perspective the text addresses concepts sequentially from external and internal analysis to strategy formulation strategy execution and strategic control To help readers build their analytic skills as they master course concepts Parnell aligns each chapter s key concepts with 25 case analysis steps Current examples and high interest cases largely drawn from The Wall Street Journal and Financial Times illustrate the key role of strategic management in the United States and around the world Ideal for the capstone strategic management course Strategic Management is appropriate for a range of undergraduate and graduate courses **A History of the Humanities in the Modern University** Sverre Raffnsøe,2024-03-27 This book challenges commonplace assertions that the humanities are presently undergoing a severe crisis as a result of a longstanding decline Rather than hearkening to the widespread reactive call for a last ditch defense of the humanities under attack from an ungracious world this book fundamentally reverses the perspective and makes a plea for a different affirmative approach It contends that the humanities have incessantly arrived at critical turning points since they were first constituted in a form that remains recognizable today and assumed a leading role in knowledge organization with the establishment of the modern university around 1800 Assuming a historical perspective the monograph takes the human sciences back to their rightful place in the family tree of sciences and gives due recognition to their continuously decisive role in the production of new knowledge and the creation of new fields of knowledge Situating the ongoing gemmation of the humanities in a broader context this monograph also offers an encompassing introduction to the over all development of knowledge in the last two hundred years Left Behind Lily Geismer,2022-03-01 The 40 year history of how Democrats chose political opportunity over addressing inequality and how the poor have paid the price For decades the Republican Party has been known as the party of the rich arguing for business friendly policies like deregulation and tax cuts But this incisive political history shows that the current inequality crisis was also enabled by a Democratic Party that catered to the affluent The result is one of the great missed opportunities in political history a moment when we had the chance to change the lives of future generations and were too short sighted to take it Historian Lily Geismer recounts how the Clinton era Democratic Party sought to curb poverty through economic growth and individual responsibility rather than asking the rich to make any sacrifices Fueled by an ethos of doing well by doing good microfinance charter schools and privately funded housing developments grew trendy Though politically expedient and sometimes profitable in the short term these programs fundamentally weakened the safety net for the poor This piercingly intelligent book shows how bygone policy decisions have left us with skyrocketing income inequality and poverty in America and widened fractures within the Democratic Party that persist to this day

Entrepreneurs and Capitalism since Luther Ivan Light, Léo-Paul Dana, 2020-08-20 In *Entrepreneurs and Capitalism since Luther* Rediscovering the Moral Economy Ivan Light and L o Paul Dana study the history of business capitalism and entrepreneurship to examine the values of social and cultural capital Six chapters evaluate case studies that illustrate contrasting relationships between social networks vocational culture and entrepreneurship Light and Dana argue that in capitalism s early stages cultural capital is scarcer than social capital and therefore more crucial for business owners Conversely when capitalism is well established social capital is scarcer than cultural capital and becomes more crucial Light and Dana then trace moral legitimations of capitalism from the Reformation to the Enlightenment the Gilded Age and finally to Joseph Schumpeter whose concept of creative destruction freed elite entrepreneurs from moral restraints that encumber small business owners After examining the availability of social and cultural capital in the contemporary United States Light and Dana show that business owners social capital enforces conventional morality in markets facilitating commerce and legitimating small businesses the old fashioned way As their networks become more isolated elite entrepreneurs must claim and ultimately deliver successful results to earn public toleration of immoral or predatory conduct
