La arquitectura cómplice Carlos Gimenez, Marta Miras, Julio Valentino, 2021-06-01 En el marco de la cultura contemporánea la teoría y la práctica de la arquitectura no plantean hoy marcos estables ni sistemas generalizables El carácter fragmentario es característico de los escritos de los arquitectos y también de las publicaciones teóricas que adoptan el formato antológico En este horizonte la disciplina modifica la mirada sobre su propia condición e intenta explicaciones más complejas que den sentido y justifiquen un modo de hacer Pero además en muchos casos se establecen aportes que provienen de otros campos del conocimiento comprometidos cada vez más con ámbitos ajenos a su especificidad Cuando Peter Eisenman dice que Utilizando una analogía entre la construcción biológica y la arquitectura esta cadena puede ser traspasada de una a otra produciendo una arquitectura cómplice de la disciplina que alberga expresa claramente esta idea All the author aligns for an architecture that reaches more all the limits that impose the tradition and that establishes complicity with the programs that give origin to enrich themselves with the plurality and the diversity of other knowledges Este entrecruzamiento disciplinar adopta distintas modalidades tal como se verifica aquí a través del análisis de una selección de memorias descriptivas de proyectos Este texto indaga las características particulares que adquieren estos vínculos los términos en que estos se manifiestan y cómo modifican los discursos y los procesos de ideación de la disciplina Ya que a través de la utilización del pensamiento analógico este cruce pareciera constituir una de las fuentes de creatividad más novedosas que alimentan el hacer del proyecto arquitectónico contemporáneo
