 Civilization** George Andrews Hedger, 2017-01-10 Excerpt from An Introduction to Western Civilization Revised The
 classroom is the real testing ground of a textbook Six years Of educational experience with n Introduction to Western
 Civilization has brought to its authors the usual cargo of approval suggestion and criticism The present revision Of the work
 has been responsive in large measure to the judgments Of those using the book both here at Cincinnati and else where The
 march of events has been even more pressing in its demands Much water has run under the mill since 1933 when the
 Introduction was first published Events whose significance could be seen but dimly six years ago now appear momentous in
 their portent for the present and the future They have made necessary radical changes in those chapters dealing with
 contemporary events and problems in the fields Of economics politics and international relations The revision has been
 thoroughgoing throughout the volume The omission of considerable matter found in the first edition has opened the way for
 additions Of new material designed to enrich the content Of the book and enhance its value for both teacher and student But
 with all the omissions and additions the original plan and organization remain unchanged It is the conviction Of the authors
 that the arrangement of materials tested by results measured in terms of the educational aims originally set up has proved its
 value For the information Of those who may be using the volume for the first time we take the liberty Of drawing on the
 preface to the first edition for a restatement of Objectives The book makes a modest attempt to correlate selected bodies Of
 material from the social sciences The subject matter has been prepared by men working in the fields Of economics education
 geography history literature political science and sociology The character of the work has been dictated largely by the desire
 to provide an adequate preparation for students who will later enter those fields for more detailed study but in no sense is
 the work designed as a substitute for the special courses in the social sciences About the Publisher Forgotten Books

Civilization in the West Mark A. Kishlansky, 1991-02-01 *Civilization in the West* Mark A. Kishlansky, Patrick J. Geary, Patricia O'Brien, 2010 For more than 60 years instructors and their students have looked to Penguin trade paperbacks for state of the art scholarship accessibility and fair prices Pearson Longman Penguin s sister company aims to meet those same expectations with textbooks in our Penguin Academics Series We ve created the Penguin Academics Series with ease of use in mind the books are conveniently portable and highly readable with engaging typefaces and interior designs Concise yet thorough in their coverage of the basics Penguin Academics titles are ideal for use either by themselves or in combination with other books such as Penguin Classics We made a number of decisions early in the project that we believed contributed to our goal First we were not writing an encyclopedia on Western civilization Information was not to be included in a chapter unless it related to the themes of that chapter There was to be no information for information s sake and each of us was called upon to defend the inclusion of names dates and events whenever we met to critique one another s chapters We found to our surprise that by adhering to the principle that information included must contribute to or illustrate a particular point or dominating theme we provided as much if not more material than books that habitually list names places and dates without any second context Second we were committed to integrating the history of ordinary men and women into our narrative We believe that isolated sections placed at the end of chapters that deal with the experience of women or minority groups in a particular era profoundly distort historical experience We called this technique caboozing and whenever we found ourselves segregating women or families or the

masses we stepped back and asked how we might recast our treatment of historical events to account for a diversity of actors How did ordinary men women and children affect the course of historical events How did historical events affect the fabric of daily life for men women and children from all walks of life We tried to rethink critical historical problems of civilization as gendered phenomena To assist us in the endeavor we engaged two reviewers whose sole responsibility was to evaluate our chapters for the integration of those social groups into our discussion We took the same approach to the coverage of central and eastern Europe that we did to women and minorities Even before the epochal events of 1989 that returned this region to the forefront of international attention we realized that in too many textbooks the Slavic world was treated as marginal to the history of Western civilization Thus with the help of a specialist reviewers we worked to integrate more of the history of eastern Europe into our text than is found in most others and to do so in a way that presented the regions their cultures and their institutions as integral rather than peripheral to Western civilization To construct a book that students would want to read we needed to develop fresh ideas about how to involve them with the material how to transform them from passive recipients to active participants We borrowed from computer science the concept of being user friendly We wanted to find ways to stimulate the imagination of the student and the more we experimented with different techniques the more we realized that the most effective way to do this was visually It is not true that contemporary students cannot be taught effectively by the written word it is only true that they cannot be taught as effectively as they can by the combination of words and images the pictorial chapter openers the large number of maps the geographical tours of Europe at certain times in history and the two page special feature essays each with its own illustration
