What Is History What Is History:

What Is History? Edward Hallett Carr, 1967-10-12 Who is to say how things really were In formulating a modern answer to the question What is History Professor Carr shows that the facts of history are simply those which historians have selected for scrutiny Millions have crossed the Rubicon but the historians tell us that only Caesar's crossing was significant All historical facts come to us as a result of interpretative choices by historians influenced by the standards of their age Yet if absolute objectivity is impossible the role of the historian need in no way suffer nor does history lose its fascination With lucidity Carr casts a light on the proper function of the historian and the vital importance of history in modern society This is an admirably stimulating and intrepid book a bold excursion into a region of central importance where most contemporary philosophers and historians unaccountably either fear or disdain to tread Isaiah Berlin New Statesman What is History? a branch of literature Historians have been treated as masters of style or of the creative imagination to be ranked alongside poets or dramatists rather than simply as historians with an art and science of their own Thucydides has been read for his Greek Livy for his Latin Carlyle ranks in book lists with the word painter Ruskin Now and again historical criticisms of the great masters have appeared and scholarly studies of limited fields But so long as history could be viewed as primarily a part of literature its own history could not be written for the recovery of the past is a science as well as an art The history of History therefore had to await the rise of scientific historical
