What Is Religion What Is Religion:

What is Religion? Robert George Crawford, 2002 What is Religion serves not only as an introduction to the different belief systems flourishing throughout the modern world but asks us to consider how the very boundaries of faith might be drawn now and in the future

What is Religion? Robert Crawford, 2003-09-02 We all know what religion is or do we Confronted with religious pluralism and cultural diversity it manifests itself in many forms What is Religion serves not only as an introduction to the different belief systems flourishing throughout the modern world but asks us to consider how the very boundaries of faith might be drawn now and in the future How might religion interact with political ends or permeate culture society and everyday life Is the post secular world in thrall to religions of its own kind materialism humanism medicine science And what logic separates common sense or academic knowledge from the immutable but unstable boundaries of faith Which is the more certain What does it mean to believe Combining clear accounts of contemporary global religious practice with an incisive philosophical interrogation of the dynamics and aims of belief What is Religion offers a fresh and wide ranging introduction to the perennial human questions of ritual faith ethics and salvation

What is Religion? Wilhelm Bousset, 1911

Religion Hent de Vries, 2008 What do we talk about when we talk about religion Is it an array of empirical facts about historical human civilizations Or is religion what is in essence unpredictable perhaps the very emergence of the new In what ways are the legacies of religion its powers words things and gestures reconfiguring themselves as the elementary forms of life in the twenty first century Given the Latin roots of the word religion and its historical Christian uses what sense if any does it make to talk about religion in other traditions Where might we look for common elements that would enable us to do so Has religion as an overarching concept lost all its currency or does it ineluctably return sometimes in unexpected ways the moment we attempt to do without it This book explores the difficulties and double binds that arise when we ask What is religion Offering a marvelously rich and diverse array of perspectives it begins the task of rethinking religion and religious studies in a contemporary world Opening essays on the question What is religion are followed by clusters exploring the relationships among religion theology and philosophy and the links between religion politics and law Pedagogy is the focus of the following section Religion is then examined in particular contexts from classical times to the present Pentecostal revival leading into an especially rich set of essays on religion materiality and mediatization The final section grapples with the ever changing forms that religion is taking such as spirituality movements and responses to the ecological crisis Featuring the work of leading scholars from a wide array of disciplines traditions and cultures Religion Beyond a Concept will help set the agenda for religious studies for years to come It is the first of five volumes in a collection entitled The Future of the Religious Past the fruit of a major international research initiative funded by the Netherlands Organization for Scientific Research

What is Religion? Jeppe Sinding Jensen, 2014-09-11 Religious belief is one of the most pervasive and ubiquitous characteristics of human society Religion has shadowed and illuminated human lives since

primitive times shaping the world views of cultures from isolated tribes to vast empires Starting from the premise that religion is a concept which can be analysed and compared across time and cultures What is Religion brings the most up to date scholarship to bear on humankind s most enduring creation The book opens with a brief history of the idea of religion then divides the study of religion into four essential topics types representations practices and institutions and concludes with a final eye opening chapter on religion today Packed with case studies from a wide range of religions past and present What is Religion offers a very current comprehensive yet intellectually challenging overview of the history theories practices and study of religion Accessible wide ranging engaging and short What is Religion is written primarily for undergraduate students in the study of religion but it will also be invaluable for students of anthropology history psychology sociology and theology as well as anyone interested in how and why humans came and continue to be religious *The Meaning and End of Religion* Wilfred Cantwell Smith,1991 Wilfred Cantwell Smith maintained in this vastly important work that Westerners have misperceived religious life by making religion into one thing He shows the inadequacy of religion to capture the living endlessly variable ways and traditions in which religious faith presents itself in the world Religion Thomas William Hall,Richard B. Pilgrim,Ronald R. Cavanagh,1985 **What Is Religion?** Nigel Ajay Kumar,2013-09-11 What Is Religion is one of those questions rarely asked by Christian theologians who engage in interreligious discourse Nigel Kumar makes the case however that to answer the question is critical for Christian scholars attempting to negotiate multiple religious identities as well as for those who want a clearer understanding of their own faith as religion Kumar takes a historical approach to answering the question He traces the development of the concept of religion and then formulates a theological answer not only by looking at an Indian theologian Chenchiah but also by listening to other secular and theological voices

What Religion is Bernard Bosanquet,1920 **Faith, Religion & Theology** Brennan Hill,Paul F. Knitter,William Madges,1997 This thoroughly updated text offers students and adults an overarching perspective The Faith section focuses on the nature of human faith and Christian faith The Religion section examines the personal and social value of religion religious belief and behavior and offers an overview of major world religions The Theology section includes an analysis of the theology faith relationship Suggested readings and study questions excellent end notes and index add to the value of this edition **The Study of Religion in an Age of Global Dialogue** Leonard J. Swidler,Paul Mojzes,2000 Religion is the most fundamental comprehensive of all human activities it tries to make sense out of not simply one or another aspect of human life but of all aspects of human experience At the core of every civilization lies its religion which both reflects and shapes it Thus if we wish to understand human life in general and our specific culture and history we need to understand religion What is religion Religion is an explanation of the ultimate meaning of life and how to live accordingly based on a notion of the Transcendent Normally it contains the four C s Creed Code Cult Community structure CREED refers To The cognitive aspect of a religion it is everything that goes into the explanation of the ultimate meaning of life CODE OF BEHAVIOR or ethics

includes all the rules and customs of action that somehow follow from one aspect or another of the Creed CULT means all the ritual activities that relate the follower to one aspect or another of the Transcendent either directly or indirectly prayer being an example of the former and certain formal behavior toward representatives of the Transcendent such as priests of the latter COMMUNITY STRUCTURE refers To The relationships among the followers this can vary widely from a very egalitarian relationship As among Quakers through a republican structure as Presbyterians have To a monarchical one As with some Hasidic Jews have with their Rebbe THE TRANSCENDENT As the roots of the word indicate means that which goes beyond the everyday The ordinary The surface experience of reality it can mean spirits gods a Personal God An Impersonal God Emptiness etc This volume looks at the ways we humans have developed to study religion However a new age in human consciousness is now dawning The Age of Global Dialogue a radically new consciousness which fundamentally shifts the ways we understand everything in life including religion This global dialogical way of understanding life does not lead to one global religion but it does lead toward a consciously acknowledged common set of ethical principles a Global Ethic The book looks at these two movements the Age of Global Dialogue and inchoative Global Ethic in order to help readers understand what is going on around them So they might make informed intelligent decisions about the meaning of life and how to live it Author note Leonard Swidler is Professor of Religion at Temple University Paul Mojzesis Academic Dean and Professor of Religious Studies at Rosemount College Religion Thomas A. Tweed, 2020 Religion plays a central role in human experience Billions of people around the world practice a faith and act in accordance with it Religion shapes how they enter the world and how they leave it how they eat dress marry and raise their children It affects law economy and government It sanctifies injustice and combats it Beginning with the first signs of religion among ancient humans and concluding with a look at modern citizens and contemporary trends leading scholar Thomas Tweed examines this powerful and enduring force in human society Religion A Very Short Introduction offers a concise non partisan overview of religion s long history and its complicated role in the world today **Thinking about Religion** Richard L. Purtill, 1978 This introduction to philosophy of religion is aimed at the problems which most interest students As the author explains in his preface Students today have a wide range of perplexities about religion many of them theological or historical rather than philosophical The topics I have covered in this book are those which I have found to create the most interest and cause the most discussion when they have come up in class **Introduction to the Study of Religion** Hillary P. Rodrigues, John S. Harding, 2008-08-20 Why do people study religion How have they studied it in the past How do we study religion today Is the academic study of religion the same as religious education These and many other questions are addressed in this engaging introduction to the discipline of religious studies written by two experienced university teachers The authors have crafted this book to familiarize novice students with key concepts and terminology in the study of religion More advanced students will find a varied array of theoretical perspectives and methodological approaches to the field Topics include definitions of

religion perspectives in the study and teaching of religion how religion began to be studied traditional perspectives philosophical and theological how people experience religion perspectives in the study of religious consciousness and perception phenomenological and psychological studying religion within communities Social and cultural perspectives anthropological sociological political and economic judging religion critical perspectives feminist approaches the interaction of popular literature and religion contextual perspectives historical and comparative The book encourages students to think critically about the theories and methods presented Students will find arguments for the strengths and limitations of these approaches understand connections among religious studies and other intellectual movements and develop their own ideas of how they might want to go about the study of religion Summary boxes a timeline a glossary and other pedagogic aids help students grasp key concepts along with a companion website at www.sastor.com

Studying Religion Russell McCutcheon, 2024-01-22 Widely used as a primer a class text or just a provocation to critical thinking Studying Religion clearly explains the methods and theories employed in the academic study of religion by tackling the problem of how scholars define and then study religion Written for all newcomers to the field its brief chapters explore the three main ways in which religion is defined and along the way also consider a range of related topics from the history and functions of religion to its public discourse religion in the courts and the classification of diverse groups into world religions The works of classic and contemporary scholars from Karl Marx and Sigmund Freud to Bruce Lincoln and Naomi Goldenberg are analyzed and explored in readable chapters and detailed supporting materials Studying Religion represents a shift away from the traditional descriptive and comparative approach and instead uses the study of religion to invite readers to consider how they divide up name and come to know the world around them This edition also includes a new final chapter Identification Matters adding to the case studies included throughout this book to present a collection of contemporary instances where different approaches to defining and studying religion make it possible to study other issues of contemporary relevance including those involving gender race and the rights of indigenous peoples The new chapter makes explicit the practical topics of

identity and status that have always been implicit throughout the entire book bringing into the classroom a wide variety of timely and relevant topics that can be better understood by its approach This book therefore remains invaluable to all students of religious studies whether in the introductory class or as an example of an alternative way of approaching the field
