Winning The Future A 21st Century Contract With America:

Winning the Future Newt Gingrich, 2005-01-10 According to former House Speaker Newt Gingrich America currently faces five threats that could undermine if not eliminate the United States if immediate steps are not taken to correct them The threats as he sees them are Islamic terrorists and rogue dictatorships armed with nuclear or biological weapons the removal of God from American public life a loss of patriotism and sense of America's history a decline in economic supremacy because of poor science and math education and the increasing budgetary burden of Social Security and Medicare To tackle these problems Gingrich offers his 21st Century Contract with America which he outlines in great detail in this bold and thought provoking book His updated contract which comes a decade after the original Republican Contract with America that marked the high point of Gingrich's national power calls for a dramatically simplified tax code that favors savings and investment government investment in science and technology particularly regarding space energy and the environment transforming Social Security into personal savings accounts overhauling the civil justice system to reduce the burden of lawsuits and updating the federal government including the privatization of some functions so that it moves at the speed and effectiveness of the information age And that's just the beginning He also calls for tripling the size of America's intelligence community reforming its election system developing a more intelligent health care system that creates jobs and increases quality of life and balancing the federal budget Gingrich believes that this ambitious agenda can be accomplished but only if it receives grassroots support The entrenched political system with its lobbyists bloated bureaucracies and the complicity of the media is too self serving to fix itself he stresses Concise and clearly presented *Winning the Future* is long on specifics and short on rhetoric and it succeeds as a springboard for political discourse Gingrich's aim is clearly to inspire citizens to take responsibility for the country's direction by demanding more of their government and their leaders

The Impact of Globalization on the United States Michelle Bertho, Beverly Crawford, Edward A. Fogarty, 2008-09-30 Over the past decade a virtual cottage industry has arisen to produce books and articles describing the nature origins and impact of globalization Largely and surprisingly absent from this literature however has been extensive discussion of how globalization is affecting the United States itself Indeed it is rarely even acknowledged that while the United States may be providing a crucial impetus to globalization the process of globalization once set in motion has become a force unto itself Thus globalization has its own logic and demands that are having a profound impact within the United States often in ways that are unanticipated This set offers the first in depth systematic effort at assessing the United States not as a globalizing force but as a nation being transformed by globalization Among the topics studied are globalization in the form of intensified international linkages globalization as a universalizing and or Westernizing force globalization in the form of liberalized flows of trade capital and labor and globalization as a force for the creation of transnational and superterritorial entities and allegiances These volumes examine how each of these facets of globalization affects American government law business economy society and culture
