Woman under Monasticism: Chapters on Saint-Lore and Convent Life between A.D. 500 and A.D. 1500 Lina Eckenstein, 2020-09-28 In order to gain an insight into the causes of the rapid development of monasticism among the German races it is necessary to enquire into the social arrangements of the period which witnessed the introduction of Christianity and into those survivals of the previous period of social development which German Christianity absorbed Among peoples of German race monastic life generally and especially monastic life which gave scope for independent activity among women had a development of its own Women of the newly converted yet still barbarian race readily gathered together and dwelt in religious settlements founded on their own initiative and ruled independently of men A reason for this must be sought in the drift of contemporary life which we shall thus have to discuss at some length During the period of declining heathendom for how long measuring time by centuries it is not yet possible to say the drift of society had been towards curtailing woman's liberty of movement and interfering with her freedom of action When the Germans crossed the threshold of history the characteristics of the father age were already in the ascendant the social era when the growing desire for certainty of fatherhood caused individual women and their offspring to be brought into the possession of individual men had already begun The influence of women was more and more restricted owing to their domestic subjection But traditions of a time when it had been otherwise still lingered Students of primitive history are recognising for peoples of German race among others the existence of an early period of development when women played a greater part in both social and tribal life Folk lore philology and surviving customs yield overwhelming evidence in support of the few historic data which point to the period conveniently called the mother age when women held positions of authority inside the tribal group and directly exercised influence on the doings of the tribe This period the mother age is generally looked upon as an advance from an earlier stage of savagery and considered to be contemporaneous with the beginnings of settled tribal life It brought with it the practice of tith and agriculture and led to the domestication of some of the smaller animals and the invention of weaving and spinning achievements with which it is recognised that women must be credited In matters of polity and sex it established the paramount importance of the woman it is she who regulates the home who notes the changes of the seasons who stores the results of experience and treasures up the intellectual wealth of the community in sayings which have come down to us in the form of quaint maxims and old world saws As for family arrangements it was inside the tribal group and at the tribal festival that sex unions were contracted and this festival traditions of which survive in many parts of Europe to this day and which was in its earliest forms a period of unrestrained license for the women as well as the men was presided over by the tribal mothers an arrangement which in various particulars affords an explanation of many ideas associated with women in later times Woman under monasticism Lina Eckenstein, 1896 **Woman under Monasticism** Lina Eckenstein, 2022-05-29 In *Woman under Monasticism* Lina Eckenstein delves into the historical complexities that defined

womanhood within the religious and monastic communities between A D 500 and A D 1500 By offering an intricate examination of feminist perspectives on matriarchal leadership and the roles of women in medieval convents Eckenstein contributes a nuanced account of the interplay between gender and power during this era marked by socio political upheaval With a literary style that is both erudite and engaging the book situates itself in the rich tradition of feminist historical scholarship shedding light on overlooked aspects of monastic life and female agency Eckenstein s seminal work stands out for its depth of research and thought provoking analysis in the broader literary context of feminist history and medieval studies Lina Eckenstein an intellectual ahead of her time crafted this meticulous work at the convergence of the 19th and 20th centuries a period when academic attention to the dynamics of gender in historical religious settings was scarce Drawing upon a robust body of knowledge and personal convictions about the importance of elucidating women s history Eckenstein s dedication allowed her to piece together a mosaic of women s experiences within the framework of monasticism Her insights likely stem from her broader engagement with women s roles in societal structures and the impact of institutional powers on the feminine sphere *Woman under Monasticism* is an essential read for scholars of feminist history medieval studies and those intrigued by the legacies of female monastic communities Eckenstein s detailed exegesis serves as an illuminating beacon to those yearning to understand the confluence of faith gender and authority against a backdrop of historical tumult This well researched and eloquently composed tome will challenge readers to reevaluate their notions of past female autonomy and influence within a religious context that has often been misunderstood or misrepresented

Women as Scribes Alison I. Beach, 2004-04-29 Professor Beach's book on female scribes in twelfth century Bavaria a full length study of the role of women copyists in the Middle Ages is underpinned by the notion that the scriptorium was central to the intellectual revival of the Middle Ages and that women played a role in this renaissance The author examines the exceptional quantity of evidence of female scribal activity in three different religious communities pointing out the various ways in which the women worked alone with other women and even alongside men to produce books for monastic libraries and discussing why their work should have been made visible whereas that of other female scribes remains invisible Beach's focus on manuscript production and the religious intellectual social and economic factors which shaped that production enables her to draw wide ranging conclusions of interest not only to palaeographers but also to those interested in reading literacy religion and gender history
