Women And Human Development The Capabilities Approach The Seeley Lectures:

Women and Human Development Martha C. Nussbaum, 2000-03-13 In this major book Martha Nussbaum one of the most innovative and influential philosophical voices of our time proposes a kind of feminism that is genuinely international argues for an ethical underpinning to all thought about development planning and public policy and dramatically moves beyond the abstractions of economists and philosophers to embed thought about justice in the concrete reality of the struggles of poor women Nussbaum argues that international political and economic thought must be sensitive to gender difference as a problem of justice and that feminist thought must begin to focus on the problems of women in the third world Taking as her point of departure the predicament of poor women in India she shows how philosophy should undergird basic constitutional principles that should be respected and implemented by all governments and used as a comparative measure of quality of life across nations *Women and Human Development*, 2000 *Women and Human Development* Martha C. Nussbaum, 2000 Martha Nussbaum proposes a kind of feminism that is genuinely international *The Capability Approach and the Sustainable Development Goals* Brian Vincent Ikejiaku, 2024-07-26 This book demonstrates how the capability approach to human development can contribute to the realisation of the 2015 United Nations Sustainable Development Goals SDGs The capability approach dictates that success should not be measured by economic indicators but by people leading meaningful free fulfilled happy or satisfied lives Drawing from a range of disciplinary perspectives this book argues that it is vital that the focus for the SDGs should shift to benefiting the most vulnerable Case studies from across Asia Africa Latin America Global South and the United States the United Kingdom and Australia Global North consider how the capability approach can contribute as a practical framework to achieving the SDGs ambitions for social economic political and legal progress Drawing on insights from a range of disciplines this book will be of interest to researchers and practitioners from the fields of law politics international relations criminology international development sociology public policy area studies and others *The Capability Approach on Social Order* Niels Weidtmann, Yanti Martina Hölzchen, Bilal Hawa, 2012 The Capabilities Approach as pioneered by Martha C Nussbaum and others elevates the enabling of free self development to a criterion of social justice In recent years it has become a widely accepted paradigm in Western development policies and currently it is discussed to which extent this normative framework can be applied to other social areas This volume presents interdisciplinary papers resulting from discussions that young scholars of different disciplines had with Martha C Nussbaum during the Unseld Lecture 2010 at the Forum Scientiarum of Tübingen University Series Interdisciplinary Research Works at FORUM SCIENTIARUM Interdisziplinäre Forschungsarbeiten am FORUM SCIENTIARUM Vol 4 **Ethics of Digital Well-Being** Christopher Burr, Luciano Floridi, 2020-08-19 This book brings together international experts from a wide variety of disciplines in order to understand the impact that digital technologies have had on our well being as well as our understanding of what it means to live a life that is good for us The multidisciplinary perspective that this collection offers

Hänel, Johanna M. Müller, 2024-10-15 Made popular by John Rawls ideal theory in political philosophy is concerned with putting preferences and interests to one side to achieve an impartial consensus and to arrive at a just society for all In recent years ideal theory has drawn increasing criticism for its idealised picture of political philosophy and its inability to account for the challenges posed by inequalities of for example race gender and class and by structural injustices stemming from colonialism and imperialism The Routledge Handbook of Non Ideal Theory is the first handbook or reference source on this important and fast growing debate Comprised of 34 chapters by an international team of contributors the Handbook is divided into three clear parts Methodological Challenges Intersections Applied Issues and Contemporary Challenges Within these sections key topics are addressed including the question of whether non ideal theory is methodologically linked to ideal theory its intersection with feminist philosophy critical race theory decolonial theory and critical theory its characteristic features the role of the non ideal theorist its relation to activism and its application in the context of disability and health studies climate justice global injustices colonialism and many more As well as a comprehensive introduction which provides important background to the debate between ideal and non ideal theory the Handbook also features a contribution by the late philosopher Charles Mills on non ideal theory as ideology The Routledge Handbook of Non Ideal Theory is essential reading for students and scholars of political philosophy ethics and political theory and will also be of interest to those studying and researching related subjects such as gender race and social justice *Learning from My Daughter* Eva Feder Kittay, 2019-03-06 Through personal narrative and philosophical argumentation Eva Feder Kittay relates how raising a multiply disabled daughter has altered her views on what matters and gives meaning in life She explores such difficult topics as the desire for normalcy reproductive technology's promise that we can choose our children the importance of care and the need for an ethic of care [Using the Greek Goddesses to Create a Well-Lived Life for Women](#) Martha Beck, 2019-01-15 This book brings to life the meaning of the

stories of the seven goddesses of Greek mythology Each goddess represents a sacred calling a way of life whose goal is to live for the sake of something greater than oneself Athena is the goddess of wisdom and justice Artemis is the woods woman who protects the natural world Demeter is the goddess of the fertility of the earth and the birth and nurturing of children Hera is the wife of Zeus the king who dedicates her life to creating a high quality of public life through nurturing various community activities Aphrodite is the goddess of creativity Persephone is the victim who was raped by Hades and abducted to the underworld where she punishes those who victimized others while alive and Hestia is the contemplative she who reflects upon human affairs and sees how all the parts fit a larger whole The book will allow readers to recognize themselves and their own sacred passions in these stories Once recognized women can educate themselves and each other They can use the wisdom represented in Greek mythology to create meaningful and complete lives in the context of a culture that is still dominated by men and their passions In this way women will be liberated to do everything they can to leave a better world behind for their children grandchildren and future generations
