Love and Spirit Thomas R. Martin,2015-10-22 Who is God What must we come to know in order to know God What is the kingdom of Heaven What sums up God s law that all the prophets spoke to What is the source of the universe and all that exists What binds us to God and to one another Why did He come into our world What gives us eternal life What is the great beginning and the ultimate end Is there something truly universal that we can come to know answering all of these questions Love and Spirit says there is presenting one word that could explain everything It lives in the hearts of all people waiting to be discovered nurtured and understood love *Undivided Heart* Lucy Mills,2020-04-28 Give me an undivided heart Something in my soul has always been snagged by that phrase in Psalm 86 Something in it speaks to me of my own heart division my own disarray It captures a deeper longing beyond the surface chatter of my mind I find amid the muddle that is me that there is something someone calling me on gathering together my disparate fraying threads and weaving them into a story greater than I could ever perceive Why do we do what we do What makes us who we are And what could make us more In Undivided Heart Lucy Mills digs deep in search of an understanding of human identity purpose and living by faith asking what the influences are that shape us and define us She explores what it might mean to have an undivided heart to live a life compelled by Christ s love undistracted by all other motives This is not a book of easy answers It is a book of deep questioning of relationship honesty and encounter counter cultural in our age of social media soundbite news and mass communication But God can meet us in our confusion and distraction as much as in our certainty Join Lucy on her exploration of this demanding fragmented life and the quest for a faith that is deeper stronger and undivided

ideas often develop gradually after studying a problem at length but not always Sometimes an insight hits like a bolt from the blue For Archimedes clarity struck while he was taking a bath For Gustav Mahler it came as the blades of his oars touched the water And for Albert Einstein it emerged while he was talking to a friend Why do these moments of insight strike so suddenly Why do they so often come to us when we are focused on something completely unrelated And when great ideas come to us where do they come from In *Aha The Moments of Insight that Shape Our World* philosopher William B Irvine author of *A Guide to the Good Life* and *On Desire* explores these epiphanies from the minor insights that strike us all daily to the major realizations that alter the course of history Focusing on aha moments as they take place in five different domains religion morality science math and art Irvine provides case studies that shed light on the different ways epiphanies happen in the different domains and on their differing social impact Along the way he describes some of the great aha moments in history from ancient times to the present day We like to think that our greatest thoughts are the product of our conscious mind Irvine demonstrates though that it is our unconscious mind that is the source of our most significant insights and that the role the conscious mind plays in eliciting these insights is to try unsuccessfully to solve certain problems Only if the conscious mind is willing to do this and thereby experience considerable frustration is the unconscious mind likely to reward it with a breakthrough insight that the conscious mind will then take credit for Irvine explores not only the neuroscience of aha moments but also their personal and social ramifications How does a person respond to having a breakthrough insight that goes against a dominant paradigm And how does the world respond when she shares that insight Irvine shows that in many cases what is most remarkable about those who have had the great insights of human history is not their but their courage and perseverance in fighting for the world to accept those insights *Aha* is a must read for cognitive scientists intellectual historians philosophers and anyone who has ever been blown away by the ideas that enlighten us when we least expect it
