Mind Expanding: Teaching for Thinking and Creativity in Primary Education Rupert Wegerif, 2010-08-16 An essential addition, Wegerif zooms in on the most important ingredient of all in a learning to learn classroom culture: the kinds of talk that are allowed and encouraged, and brings together both scholarly and practical approaches in a highly fruitful and accessible way. Guy Claxton, author of *Building Learning Power*, *What's the Point of School*, and *New Kinds of Smart*. This is a thought provoking and readable book which makes a very good case for the importance of teaching thinking skills and encouraging creativity through dialogue. Professor Neil Mercer, University of Cambridge, UK, author of *Words and Minds* and *Dialogue and Development*. There is growing interest in developing flexible thinking and

learning skills in the primary classroom but there has been little agreement as to exactly what these skills are and how best to teach for them This innovative book responds to that challenge with a coherent account of what thinking and creativity are and how they can be taught Taking a dialogic approach it shows how engaging children in real dialogue is possible in every area of the curriculum and how this can lead to more reflective considerate and creative children who are able to think for themselves and to learn creatively Wegerif explores the success of approaches such as Philosophy for Children Thinking Together Dialogic Teaching and Building Learning Power Using illustrations and activities he explains how teaching and learning across the primary curriculum can be transformed This book is important reading for all primary teachers and trainees who are looking for practical ideas for teaching thinking It will also be valuable for anyone who wants to understand education and think more about what is most important in education

Children who Fail to Thrive Dorota Iwaniec, 2004-04-02. Three to five per cent of children fail to thrive. Without early intervention, this can lead to serious growth failure and delayed psychomotor development. Such children typically present difficulties with feeding and sleeping, as well as other behavioural problems. Failure to grow can also involve attachment disorders, emotional maltreatment, neglect, and abuse. Dorota Iwaniec has carried out the longest ever study on failure to thrive, following up on 198 clinical cases after a 20-year period. This extensive practical guide includes numerous checklists and other instruments for use in assessments, four chapters on intervention and treatments with a particular focus on multidisciplinary approaches, a comprehensive literature review alongside original research data, case studies drawn from the author's lengthy clinical experience. Jay van Zyl,2011-11-12 Built to Thrive is about unpacking the drivers that I have noticed in the landscape that do not yet have a place in our existing vocabulary It is about ceasing to ignore the signs and beginning to embrace the changes that are becoming more tangible with every day that passes It is about recognizing the amplified importance of the human as a social being in this dawning age of transparency and systemic activity The individual becomes the collective as we move into a sphere of shared value creation ideation and knowledge dissemination Existing in this new business landscape is not about eliminating the competition but rather working together in a bid to share resources and expand far beyond what we could ever hope to achieve as individual organizations Through Built to Thrive I hope to open your mind and introduce you to a way of thinking that will fundamentally shift your views and may provide a lifeline in a world where the new school will rule

Geographies of Knowledge and Imagination in 19th Century Philological Research on Northern Europe

Joachim Grage,Thomas Mohnike,2017-08-21 Comparative philology was one of the most prolific fields of knowledge in the humanities during the 19th century Based on the discovery of the Indo European language family it seemed to admit the reconstruction of a common history of European languages and even mythologies literatures and people However it also represented a way to establish geographies of belonging and difference in the context of 19th century nation building and identity politics In spite of a widely acknowledged consensus about the principles and methods of comparative philology the results depended on local conditions and practices If Scandinavians were considered to be Germanic or not for example was up to identity politics that differed in Berlin Strasbourg Copenhagen and Paris The contributors here elaborate these dynamics through analyses of the changing and conflicting versions of imaginative geographies that the actors of comparative philology evoked by using Scandinavian literatures and cultures They also show how these seemingly delocalized scientific models depended on ever different local needs and practices Through this the book represents the first distinctly transnational dynamic geography and history of the philological knowledge of the North not only as a history of a

scientific discourse but also as a result of doing and performing scientific work
