Pre-nursing Student Progression Towards Admission to Nursing School at Indiana University Bloomington

Amberly Maurine Reynolds, 2020 Undergraduate Human Anatomy ANAT A215 is a prerequisite course for admission to the Bachelor of Nursing BSN program at Indiana University Bloomington Ten years of Student Information Systems data 2008-2019 was analyzed to explore pre nursing student success in this course with correlation to admissions into the BSN Special attention was focused on repeat attempts of the course Correlations between A215 grades and grades in nursing courses determine the importance of anatomy for nursing school A qualitative interview portion was also included to garner perspective on the importance of anatomy and achievement in anatomy Results were extensive from both the quantitative and qualitative portions Only 24.1% of IUB pre nursing students are accepted into the IUB BSN Students who achieve an A in ANAT A215 are most likely to be admitted 81.7% supported qualitatively with recognition that anatomy is important for a nursing career but of most importance for students is achieving an A For each decrease in letter grade there is a decrease in acceptances and 0% for a B or less Students who choose to repeat the course need an A for a chance at nursing school admission 66.7% and acceptance is progressively less likely for each decrease in grade The importance of ANAT A215 is clear with positive academic correlations indicated for two nursing courses PHSL P215 and NURS B261 Pre nursing students not admitted to nursing move across majors with 22.4% choosing a major in the School of Public Health and 40.3% leave IUB

without a degree From the qualitative data and the many implications of the statistics there is a need for more advisors in the School of Nursing to handle the many implications of this data and the large population of pre nursing students Changes in nursing admission standards and practices advising of pre nursing students and support for the importance of ANAT A215 are needed
