Air Force, 1986-07 Tim Keefe Charlie Bevis, 2015-10-29 One of the greatest pitchers of the 19th century Tim Keefe 1857-1933 was an ardent believer in the artisan work ethic that was becoming outmoded in burgeoning industrial America A master craftsman he compiled 342 career victories during his 14 season Major League career while adapting to numerous changes in pitching rules during the 1880s Known as a strategic pitcher he outsmarted batters particularly with his change of pace pitch He led the New York Giants to the National League pennant in 1888 and 1889 establishing a Major League record with 19 consecutive pitching victories in 1888 He taught pitching as a college baseball coach wrote several articles about his craft and established a sporting goods firm where he manufactured a baseball of his own design He was a proponent for players rights as the secretary of the Brotherhood of Professional Base Ball Players which formed the ill fated Players League in 1890 This first ever biography of Keefe covers the career of the 1964 Baseball Hall of Fame inductee **A Complete Manual of Canon Law** Oswald Joseph Reichel, 1896 Technology Choices Diane E. Bailey, Paul M. Leonardi, 2015-01-23 An analysis of the occupational factors that shape the technology choices made by people who perform the same type of work Why do people who perform largely the same type of work make different technology choices in the workplace An automotive design engineer working in India for example finds advanced information and communication technologies essential allowing him to work with far flung colleagues a structural engineer in California relies more on paper based technologies for her everyday work and a software engineer in Silicon Valley operates on multiple digital levels simultaneously all day continuing after hours on a company supplied home computer and network connection In *Technology Choices* Diane Bailey and Paul Leonardi argue that occupational factors rather than personal preference or purely technological concerns strongly shape workers technology choices Drawing on extensive field work a decade s worth of observations and interviews in seven engineering

firms in eight countries Bailey and Leonardi challenge the traditional views of technology choices technological determinism and social constructivism Their innovative occupational perspective allows them to explore how external forces shape ideas beliefs and norms in ways that steer individuals to particular technology choices albeit in somewhat predictable and generalizable ways They examine three relationships at the heart of technology choices human to technology technology to technology and human to human An occupational perspective they argue helps us not only to understand past technology choices but also to predict future ones
