Visual Protest, Viral Images, and Virtual Participation Nicole A. Schneider, 2025-06-30 This interdisciplinary study sees press photographs of the BLM Movement in the US as agents for Black liberation Close reading both the images and theoretical considerations on Blackness photography and the often intangible articulations of racism in today's society the book focuses on the work the photographs do for the movement as they politically garner attention and create discursive places historically unsettle seemingly fixed narratives about the African American past and virtually establish room for digital activist debate Based on Azoulay's event of photography and Rancière's politics of aesthetics it builds the theory of an attentive reading of photography and addresses the larger frameworks of photography as event in anti racist considerations In their political aesthetic and performative dimensions these photographs negotiate the current matter of Black lives in the United States and articulate ontological dimensions of Blackness as political struggle and affirmative position They become mobile and material discursive places that lift the protested debates into wider fields of consideration and visibility complicating notions of society politics and interaction

NoveList America in the Age of Trump Douglas E. Schoen, Jessica Tarlov, 2017-07-04 America in the Age of Trump is a bracing essential look at the failure of a great nation to meet the needs of its people and the challenges of the age and the resulting collapse of public trust in government as well as a pervasive crisis of national values from broken families to a loss of faith in the American idea itself This crisis of values occurs just as the country faces an unprecedented array of fiscal economic social and national security challenges out of control federal spending frighteningly large deficits massive gaps of income and opportunity cultural division and a dangerous world in which American power seems increasingly incidental In America in the Age of Trump Douglas E. Schoen and Jessica Tarlov offer a definitive and unique assessment of a nation in turmoil looking beneath well known problems to identify underlying yet poorly understood causes Readers will confront the crises one by one of trust values and governance of education economic opportunity and fiscal solvency of national security domestic tranquility and race relations America in the Age of Trump gathers in one place a clear and comprehensive evaluation of the fundamental issues confronting the American future while offering bold fresh approaches to meeting these challenges Other books have described the specter of American decline but none has been so comprehensive in its diagnosis or forward looking and non ideological in its remedies explaining how we might yet overcome national self doubt to reclaim our traditional optimism reassert our place in the world and secure a prosperous future for our citizens

Ambitious Like a Mother Lara Bazelon, 2022-04-19 In this captivating and radical look at work life balance Lara Bazelon reframes our understanding of working women and shows how prioritizing your career benefits mothers kids and society at large In this

singular cultural moment mothers have unparalleled opportunities to succeed at work while continuing to face the same societal impediments that held back our mothers and grandmothers We still encounter entrenched gender bias in the workplace and are expected to shoulder the lion's share of labor and burdens at home while being made to feel as if we're never doing enough All the while we're told that the perfect work-life balance is possible if only we try hard enough to achieve it It's time to change the conversation about work-life and balance Work and life are inextricably intimately intertwined We need to celebrate what we do give our children even and especially in moments of imbalance rather than apologizing for what we don't In this way we can model for our children how we use our talents to help others and raise awareness about the issues closest to our hearts We can embrace the personal fulfillment and financial independence that pursuing meaningful work can bring as a way of showing our children how to live happy purpose-driven lives Bazelon argues not only that we can but that we should Being ambitious at work and being a good mother to our children are not at odds these qualities mutually reinforce each other Backed up by research and filled with personal stories from Bazelon's life as well as that of her mother and the many other women she interviewed across the cultural and financial spectrum *Ambitious Like a Mother* is an anthem a beacon for all to recognize and celebrate the pioneering women who reject the false idols of the Selfless Mother and Work-Life Balance and a call to embrace your own ambitions and model your multiplicities for your children

Women and Politics Lynne Ford, 2018-05-15 *Women and Politics* is a comprehensive examination of women's use of politics in pursuit of gender equality How can demands for gender equality be reconciled with sex differences Resolving this paradoxical question has proceeded along two paths the legal equality doctrine which emphasizes gender neutrality and the fairness doctrine which recognizes differences between men and women The text's clear analysis and presentation of theory and history helps students to think critically about the difficulties faced by women in politics and about how public policies in education labour and the economy and family and fertility impact gender equality The fully revised fourth edition explores new critical perspectives recent political events and current challenges to gender equality including the 2016 presidential election and Hillary Clinton's candidacy the fight for equal pay and paid leave and the debate over reproductive rights and campus sexual assault It also includes current scholarship on the intersections of race class and gender and expanded coverage of minority women women in the military and conservative women This text and its two-path framework is essential to understanding women's pursuit of equality via the political system

This book is a case study collection examining the influences and functions of British Columbia s BC borders in the 21st century British Columbia s Borders in Globalization examines bordering processes and the causes and effects of borders in the Cascadian region from the perspective of BC The chapters cover diverse topics including historical border disputes and cannabis culture and identity the governance of transboundary water flows migration and preclearance policies for goods and people and the emerging issue of online communities The case studies provide examples that highlight the simultaneous but contradictory trends regarding borders in BC while boundaries and bordering processes at the external borders shift away from the territorial boundary lines self determination local politics and cultural identities re inscribe internal boundaries and borders that are both virtual and real Moreover economic protectionism racial discourses and xenophobic narratives driven by advances in technology reinforce the territorial dimensions of borders These case studies contribute to the literature challenging the notion that territorial borders are sufficient for understanding how borders function in BC and in a few instances they illustrate the nuanced ways in which borders or bordering processes are becoming detached from

territory The chapters in this book were originally published as a special issue of the Journal of Borderlands Studies

The Taming of Scarcity and the Problems of Plenty Francis J. Gavin, 2024-03-07 The underlying structure incentives and costs shaping international relations state behaviour and the nature of power are profoundly different today to how they were in the past in ways that are scarcely recognised and widely misunderstood For much of history world politics was marked by profound scarcity in resources information and security A series of historical revolutions has largely tamed this scarcity in ways few could have imagined These revolutions however have generated new potentially catastrophic challenges for the world the problems of plenty In this Adelphi book Francis J Gavin argues that the institutions practices theories and policies that helped explain and largely tamed scarcity by generating massive prosperity and which were sometimes used to justify punishing conquest are often unsuitable for addressing the problems of plenty Successful grand strategy in this new age of abundance requires new thinking New conceptual lenses innovative policies and processes and transformed institutions will be essential for confronting and solving the problems of plenty without undermining the expanding efforts against scarcity
