Time Emergence Grammar Talk Interaction:

Emergent Syntax for Conversation Yael Maschler, Simona Pekarek Doehler, Jan Lindström, Leelo Keevallik, 2020-02-15 This volume explores how emergent patterns of complex syntactic structures beyond a simple clause relate to the local contingencies of action formation in social interaction. It examines both the on-line emergence of clause combining patterns as they are patched together on the fly as well as their routinization and sedimentation into new grammatical patterns across a range of languages: English, Estonian, Finnish, French, German, Hebrew, Italian, Mandarin, and Swedish. The chapters investigate how the real-time organization of complex syntax relates to the unfolding of turns and actions, focusing on i) how complex syntactic patterns or routinized fragments of canonical patterns serve as resources for projection, ii) how complex syntactic patterns emerge incrementally moment by moment out of the real-time trajectories of action, iii) how formal variants of such patterns relate to social action, and iv) how all of these play out within the multimodal ecologies of action formation. The empirical findings presented in this volume lend support to a conception of syntax as fundamentally temporal, emergent, dialogic, sensitive to local interactional contingencies, and interwoven with other semiotic resources. **Current**

Approaches to Syntax András Kertész, Edith Moravcsik, Csilla Rákosi, 2019-05-06 Even though the range of phenomena syntactic theories intend to account for is basically the same, the large number of current approaches to syntax shows how differently these phenomena can be interpreted, described, and explained. The goal of the volume is to probe into the question of how exactly these frameworks differ and what, if anything, they have in common. Descriptions of a sample of current approaches to syntax are presented by their major practitioners. Part I is followed by their metatheoretical underpinnings. Part II is given. Given that the goal is to facilitate a systematic comparison among the approaches, a checklist of issues was given to the contributors to address. The main headings are Data, Goals, Descriptive Tools, and Criteria for Evaluation. The chapters are structured uniformly, allowing an item-by-item survey across the frameworks. The introduction lays out the parameters along which syntactic frameworks must be the same and how they may differ, and a final paper draws some conclusions about similarities and differences. The volume is of interest to descriptive linguists, theoreticians of grammar, philosophers of science, and studies of the cognitive science of science. **The Routledge Handbook of Discourse Analysis** Michael

Handford, James Paul Gee, 2023-05-15 The Routledge Handbook of Discourse Analysis covers the major approaches to discourse analysis, from critical discourse analysis to multimodal discourse analysis, and their applications in key educational and institutional settings. The handbook is divided into eight sections: Approaches to Discourse Analysis, Gender, Race, and Sexualities, Narrativity and Discourse, Genre and Register, Spoken Discourse, Social Media and Online Discourse, Educational Applications, and Institutional Applications. The chapters are written by a wide range of contributors from around the world, each a leading researcher in their respective field. With a focus on the application of discourse analysis to real-life problems, the contributors introduce the reader to a topic and analyse authentic data. This fully revised second edition includes new

sections on Gender Race and Sexualities Narrativity and Discourse Genre and Register Spoken Discourse Social Media and Online Discourse and nine new chapters on topics such as digital communication and public policy and political discourse This volume is vital reading for all students and researchers of discourse analysis in linguistics applied linguistics communication and cultural studies social psychology and anthropology Grammar in Use across Time and Space Misumi Sadler, 2007-11-06 This monograph contains the first systematic investigation of the Japanese dative subject construction across time and space It demonstrates that in order to capture what speakers writers know about how to put an utterance or a clause together it is necessary to pay attention to what they do in actual language use and in different discourse types The work also shows the importance of diachronic perspectives to help us better understand the ways in which a particular grammatical structure is represented synchronically By utilizing modern Japanese conversation contemporary Japanese novels and a pre modern and modern Japanese literature corpus the study highlights the role of dative subjects at the semantic and discourse pragmatic levels Specifically it demonstrates that what has been considered to be a most grammatical aspect of Japanese actually turns out to be rather pragmatically oriented **The Development of L2**

Interactional Competence Klara Skogmyr Marian, 2022-11-01 This book presents unique insights into the development of L2 interactional competence through the lens of complaining demonstrating how a closer study of complaining as a social activity can enhance our understanding of certain aspects of language learning with implications for future L2 research The volume employs a multimodal longitudinal conversation analytic CA approach in its analysis of data from video recorded interactions of several elementary and advanced L2 speakers of French as they build their interactional competence understood as the ability to accomplish social actions and activities in the L2 in context dependent and recipient designed ways Skogmyr Marian calls attention to three key dimensions of complaining in these conversations its structural organization the interactional resources people use when they complain and how speakers shared interactional histories and changing social relationships affect complaint practices The volume underscores the fundamentally multimodal socially situated and co constructed nature of L2 interactional competence and the socialization processes involved in its development indicating paths for new work on interactional competence and L2 research more broadly This book will be of appeal to students and scholars interested in second language acquisition social interaction and applied linguistics The Open Access version of this book available at www.taylorfrancis.com has been made available under a Creative Commons Attribution 4.0 license

Constructions Peter Auer, Stefan Pfänder, 2011-08-29 This volume embarks on an exploration of the processual and dynamic character of grammatical constructions in emergence both from an emergent and an emerging perspective Emerging constructions develop out of their discourse contexts Talking of emerging constructions is compatible with a view of grammar as a stable system of rules and structures which may emerge i e come into existence out of a pool of previously unordered elements Emergent constructions on the contrary are due to the on line production of grammar in time The term emergent emphasises the fact that a grammatical structure is always temporary and ephemeral In both senses grammar is modelled as a highly adaptive resource for interaction On the basis of empirical studies on spoken English German Hebrew Swedish and French the volume addresses the following questions How can what initially appears to be construction x end up being construction y in on line syntax What are the local interactional needs which such processes respond to in the process of their emergence Does the on line re modelling of a construction concern its syntactic or semantic side or both And finally Should emergent grammatical structures as they unfold in real time be seen as stages in the emerging of grammar

Temporality in Interaction Arnulf Deppermann, Susanne Günthner, 2015-03-20 Time is a constitutive element of everyday interaction all verbal interaction is produced and interpreted in time However it is only recently that research in linguistics has started to take the temporality of linguistic production and reception in interaction into account by studying the real time and on line dimension of spoken language This volume is the first systematic collection of studies exploring temporality in interaction and its theoretical foundations It brings together researchers focusing on how temporality impinges on the production and interpretation of linguistic structures in interaction and how linguistic resources are designed to deal with the exigencies and potentials of temporality in interaction The volume provides new insights into the temporal design of a range of heretofore unexplored linguistic phenomena from various languages as well as into the temporal aspects of linguistic structures in embodied interaction

Grammar and Interaction Emma Betz, 2008-10-29 This monograph provides a micro analytic description of the structure and communicative use of syntactic pivot constructions in German Using the methodology of Conversation Analysis this work shows that pivots emerge in interaction in response to local communicative needs Exclusively found in spoken German pivots allow a speaker to extend an utterance beyond a possible completion point in a syntactically and prosodically unobtrusive way Speakers utilize this basic property to promote context specific actions managing boundaries of speakership bridging sequential and topical junctures and dealing with different types of interactional trouble Through a close examination of syntactic pivots as an interactional resource this work shows that spoken linguistic structures can only be fully understood if we acknowledge the temporality of language and view grammar as usage based and negotiable This book thus contributes to a growing body of research at the intersection of grammar and interaction

Appositive Relative Clauses in English Rudy Loock, 2010 This book sheds new light on Appositive Relative Clauses (ARCs) a structure that is generally studied from a merely syntactic point of view in opposition to Determinative or Restrictive Relative Clauses (DRCs) In this volume ARCs are examined from a discourse pragmatic point of view independently of DRCs in order to provide a positive definition of the structure After a presentation of the morphosyntactic semantic and pragmatic characteristics of ARCs a taxonomy of their functions in discourse is established for both written and spoken English based on the results of a corpus based investigation Constraints are then defined within an information packaging approach to syntactic structures to show why speakers choose ARCs over other competing allostructures i.e. syntactic structures that fulfil similar discourse functions e.g. nominal appositives independent clauses adverbials noun premodifiers topicalization The end result is a deeper understanding of the richness of ARCs in their natural contexts of use
