Two Introductory Lectures on the Science of International Law Travers Twiss, 1856 **Two Introductory Lectures on the Science of International Law** Travers Twiss, 1856 Two Introductory Lectures on the Science of International Law Travers Twiss, 2025-05-22

Two Introductory Lectures on the Science of International Law by Travers Twiss offers a glimpse into the foundations of international legal thought during the mid 19th century. These lectures provide an overview of the principles and historical context that shaped the development of international law. Twiss explores the philosophical and ethical considerations underpinning the relationships between nations. This work is valuable for scholars and students interested in the history of international law, legal theory, and the evolution of diplomatic practices. The lectures provide a historical perspective on the challenges and opportunities facing the international community during a period of significant geopolitical change. Twiss's insights offer a window into the intellectual currents that shaped modern international relations. This work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it. Excerpt from Two Introductory Lectures on the Science

of International Law Upon the general theory of the Law of Nations much has been written by authors of great name and ability Upon practical questions much has been laid down by those distinguished civilians who have adorned the British and American Courts of Admiralty and whose masterly judgments full of wisdom and learning are the most perfect expositions of the best and purest principles of that law It has been attempted in the following lectures to pass briefly in review both series of authorities and to note the chief characteristics of the most eminent amongst them with a view to make them known to the student and not with any pretence to novelty of view or originality of treatment On the contrary the materials supplied by others have been freely used where the doctrine appeared to be sound or the criticism just About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

King Leopold's Ghostwriter Andrew Fitzmaurice, 2024-12-17 A dramatic intellectual biography of Victorian jurist Travers Twiss who provided the legal justification for the creation of the brutal Congo Free State Eminent jurist Oxford professor advocate to the Archbishop of Canterbury Travers Twiss 1809 1897 was a model establishment figure in Victorian Britain and a close collaborator of Prince Metternich the architect of the Concert of Europe Yet Twiss's life was defined by two events that threatened to undermine the order that he had so stoutly defended a notorious social scandal and the creation of the Congo Free State In *King Leopold's Ghostwriter* Andrew Fitzmaurice tells the incredible story of a man who driven by personal events that transformed him from a reactionary to a reformer rewrote and liberalised international law yet did so in service of the most brutal regime of the colonial era In an elaborate deception Twiss and Phara lde van Lynseele a Belgian prostitute sought to reinvent her as a woman of suitably noble birth to be his wife Their subterfuge collapsed when another former client publicly denounced van Lynseele Disgraced Twiss resigned his offices and the couple fled to Switzerland But this failure set the stage for a second successful act of re creation Twiss found new employment as the intellectual driving force of King Leopold of Belgium's efforts to have the Congo recognised as a new state under his personal authority Drawing on extensive new archival research *King Leopold's Ghostwriter* recounts Twiss's story as never before including how his creation of a new legal personhood for the Congo was intimately related to the earlier invention of a new legal personhood for his wife Combining gripping biography and penetrating intellectual history *King Leopold's Ghostwriter* uncovers a dramatic ambiguous life that has had lasting influence on international law

Sovereignty, Property and Empire, 1500-2000 Andrew Fitzmaurice, 2014-10-23 This book analyses the laws that shaped modern European empires from medieval times to the twentieth century Its geographical scope is global including the Americas Europe Africa Asia

Australia and the Poles Andrew Fitzmaurice focuses upon the use of the law of occupation to justify and critique the appropriation of territory He examines both discussions of occupation by theologians philosophers and jurists as well as its application by colonial publicists and settlers themselves Beginning with the medieval revival of Roman law this study reveals the evolution of arguments concerning the right to occupy through the School of Salamanca the foundation of American colonies seventeenth century natural law theories Enlightenment philosophers eighteenth century American colonies and the new American republic writings of nineteenth century jurists debates over the carve up of Africa twentieth century discussions of the status of Polar territories and the period of decolonisation

The Project of Positivism in International Law Mónica García-Salmones Rovira, 2013-11-28 International legal positivism has been crucial to the development of international law since the nineteenth century It is often seen as the basis of mainstream or traditional international legal thought The Project of Positivism in International Law addresses this theory in the long standing tradition of critical intellectual histories of international law It provides a nuanced analysis of the resilience of the economic positivist theory and shows how influential its role was in shaping the modern frameworks of international law The book argues that the rise of positivist international law was inseparable from philosophical developments placing the notion of conflict of interests at the centre of collective life Where previously international thought was dominated by notions of the right the just and the good increasingly international relations became viewed as interests in need of harmonisation In this context international law was re founded as the universal law that could harmonise the interests of both public and private international entities The book argues that these evolutions in philosophical thought were bound up with the consolidation of capitalism and with the ideas about human existence and human nature which emerged in that process It provides an innovative analysis of the selected biography of ideas which it presents including a detailed focus on the work of Hans Kelsen one of the leading positivist thinkers of the twentieth century It also argues that the work of Lassa Oppenheim should be included within this analysis as providing some of the key founding texts of positivism in international law This book will be a fascinating read for scholars and students of international legal theory historians of ideas and legal philosophers
