Advances in Electrical Control and Signal Systems Gayadhar Pradhan, Stella Morris, Niranjana Nayak, 2020-07-01 This book presents select proceedings of the International Conference on Advances in Electrical Control and Signal Systems AECSS 2019. The focus is on the current developments in control and signal systems in electrical engineering and covers various topics such as power systems, energy systems, micro grid, smart grid, networks, fuzzy systems and their control. The book also discusses various properties and performance of signal systems and their applications in different fields. The contents of this book can be useful for students, researchers as well as professionals working in power and energy systems and other related fields. *Pacific Rural Press*, 1896. *'Crimes against Peace' and International Law* Kirsten Sellars, 2013-02-28 In 1946 the judges at the International Military Tribunal at Nuremberg declared crimes against peace, the planning, initiation or waging of aggressive wars to be the supreme international crime. At the time the prosecuting powers heralded the charge as being a legal milestone but it later proved to be an anomaly arising from the unique circumstances of the post-war period. This study traces the idea of criminalising aggression from its origins after the First World War through its high water mark at the post-war tribunals at Nuremberg and Tokyo to its abandonment during the Cold War. Today a similar charge, the crime of aggression, is being mooted at the International Criminal Court so the ideas and debates that shaped the original charge of crimes against peace assume new significance and offer valuable insights to lawyers, policy makers and scholars engaged in international law and international relations. *Energy Research Abstracts*, 1993. *International Socialist Review*, 2013.
