Venice From The Water Architecture And Myth In An Early Modern City:

Venice from the Water Daniel Savoy, 2012 The floating city of Venice has enchanted visitors for centuries with its maze of scenic canals For this pioneering book Daniel Savoy set out by boat to explore the built environment of these waterways gaining new insights into the architectural history of this major early modern Italian center By viewing the architecture and experience of the canals in relation to the production of Venetian civic mythology the author found that the waterways of Venice and its lagoon were integral areas of the city's pre modern urban space and that their flanking buildings were constructed in an intimate dialogue with the water's visual spatial and metaphorical properties Enhancing the natural wonder of their aquatic setting the builders of Venice used illusory aesthetic and scenographic practices to create waterfront buildings that appear to float blend into the water and glide into view around bends in the canals transporting visitors into a seemingly otherworldly realm This book's striking photographs of Venice as seen from its waterways will likewise transport readers with breathtaking views of this captivating city New Saints in Late-Mediaeval Venice, 1200-1500 Karen E.

McCluskey, 2019-10-08 This book focuses on the comparatively unknown cults of new saints in late mediaeval Venice These new saints were near contemporary citizens who were venerated by their compatriots without official sanction from the papacy In doing so the book uncovers a sub culture of religious expression that has been overlooked in previous scholarship The study highlights a myriad of hagiographical materials both visual and textual created to honour these new saints by members of four different Venetian communities The Republican government the monastic orders mostly Benedictine the mendicant orders and local parishes By scrutinising the hagiographic portraits described in painted vita panels written vitae passioness votive images sermons and sepulchre monuments as well as archival and historical resources the book identifies a specifically Venetian typology of sanctity tied to the idiosyncrasies of the city's site and history By focusing explicitly on local typological traits the book produces an intimate and complex portrait of Venetian society and offers a framework for exploring the lived religious experience of late mediaeval societies beyond the lagoon As a result it will be of keen interest to scholars of Venice lived religion hagiography mediaeval history and visual culture **Street Life in Renaissance Italy**

Fabrizio Nevola, 2020-11-24 A radical new perspective on the dynamics of urban life in Renaissance Italy The cities of Renaissance Italy comprised a network of forces shaping both the urban landscape and those who inhabited it In this illuminating study those complex relations are laid bare and explored through the lens of contemporary urban theory providing new insights into the various urban centers of Italy's transition toward modernity The book underscores how the design and structure of public space during this transformative period were intended to exercise a certain measure of authority over its citizens citing the impact of architecture and street layout on everyday social practices The ensuing chapters demonstrate how the character of public space became increasingly determined by the habits of its residents for whom the streets served as the backdrop of their daily activities Highlighting major hubs such as Rome Florence and

Bologna as well as other lesser known settings Street Life in Renaissance Italy offers a new look at this remarkable era
