The case of Eclectic Architecture in Buenos Aires Garrido, Federico Andrés, 2023-05-26 The research deals with a question about Architecture and its design strategies combining historical information and digital tools Design strategies are historically defined they rely

on geometry context building technologies and other factors The study of Architecture's own history particularly in the verge of technological advancements like the introduction of new materials or tools may shed some light on how to internalize digital tools like parametric design and digital fabrication

Technological Paradigms and Digital Eras Giacomo Chiesa, 2019-07-24 The book connects the ICT and the architectural worlds analyzing modeling materialization and data driven visions for design issues at different scales Furthermore using sample modeling and materialization tools it explores the links between performance driven design approaches and the application of new digital technologies Intended for architects and urbanists it provides a theoretical framework to address the implications of the digital revolution in building design and operation Furthermore combining insights from IT and ICT with architectural and urban design know how it offers engineering professionals a technology driven interpretation of the building design field

Migrant Housing Mirjana Lozanovska, 2019-03-01 Migrant Housing the latest book by author Mirjana Lozanovska examines the house as the architectural construct in the processes of migration Housing is pivotal to any migration story with studies showing that migrant participation in the adaptation or building of houses provides symbolic materiality of belonging and the platform for agency and productivity in the broader context of the immigrant city Migration also disrupts the cohesion of everyday dwelling and homeland integral to housing and the book examines this displacement of dwelling and its effect on migrant housing This timely volume investigates the poetic and political resonance between migration and architecture challenging the idea of the house as a singular theoretical construct Divided into three parts Histories and theories of post war migrant housing House home and Mapping migrant spaces of home it draws on data studies from Australia and Macedonia with literature from Canada Sweden and Germany to uncover the effects of unprivileged post war migration in the late twentieth century on the house as architectural and normative model and from this perspective negotiates the disciplinary boundaries of architecture

books about BIM have tended to favour case study analyses or instruction on the use of specific software BIM Design highlights how day to day design operations are shaped by the increasingly generative and collaborative aspects of these new tools BIM strategies are described as operations that can enhance design rather than simply make it more efficient Thus this book focuses on the specific creative uses of information modelling at the operational level including the creative development of parametric geometries and generative design the evaluation of environmental performance and the simulation and scheduling of construction fabrication operations This book also engages BIM's pragmatic efficiencies such as the conflict checking of building systems and the creation of bills of quantities for costing and in so doing it demonstrates how BIM can make such activities collaborative Throughout projects are used to illustrate the creative application of BIM at a variety of scales These buildings showcase work by firms executing projects all over the world SHoP Architects and Construction New York Morphosis Los Angeles Populous London GRO Architects New York Reiser Umemoto New York Gensler Shanghai and UNStudio Amsterdam
