Galileo used his telescope to show that the earth was not the center of the universe how Newton divined gravity from the falling apple how Einstein unlocked the mysteries of time and space with a simple equation This history is made up of long periods of ignorance and confusion punctuated once an age by a brilliant thinker who puts it all together These few tower over the ordinary mass of people and in the traditional account it is to them that we owe science in its entirety This belief is wrong A People s History of Science shows how ordinary people participate in creating science and have done so throughout history It documents how the development of science has affected ordinary people and how ordinary people perceived that development It would be wrong to claim that the formulation of quantum theory or the structure of DNA can be credited directly to artisans or peasants but if modern science is likened to a skyscraper then those twentieth century triumphs are the sophisticated filigrees at its pinnacle that are supported by the massive foundation created by the rest of us **Wallaces**
